The main business scenarios of One-Network Collaboration ("#####") include which of the following?

- A. Government services
- B. Government communications ("#####")
- C. Administrative meetings
- D. Trusted office

Answer: B,C,D

Explanation:

One-Network Collaboration mainly covers government communication, administrative meetings, and trusted /secure office collaboration across departments. Government services belong more to the One-Network Handling domain.

NEW QUESTION # 399

Which organizational model is commonly used for data-governance management in large enterprise groups?

- A. Federated Management
- B. Centralized Management
- C. Distributed Management

Answer: A

Explanation:

Federated management establishes central standards with delegated execution across subsidiaries-balancing control and flexibility for large, multi-branch corporations.

NEW QUESTION # 400

The connectivity hub is a full-stack integrated platform focusing on application and data connections, providing message, data, API, and device integration capabilities, supporting hybrid cloud and cross-regional data integration for internal and multi-cloud interoperability.

- A. False
- B. True

Answer: B

Explanation:

The described functionality accurately reflects enterprise-grade integration platforms, which provide comprehensive integration of applications, APIs, devices, and data. Hybrid-cloud and multi-cloud interoperability are key features of full-stack integration hubs in digital infrastructure systems.

NEW QUESTION # 401

During enterprise cloud migration, some applications remain on-prem while others move to the cloud. Which cloud service meets the requirement for high-speed, low-latency data exchange between them?
