

# 最新免費的FCSS\_EFW\_AD-7.6考試題庫-免費下載試用 體驗FCSS\_EFW\_AD-7.6考題

P.S. PDFExamDumps在Google Drive上分享了免費的2026 Fortinet FCSS\_EFW\_AD-7.6考試題庫：<https://drive.google.com/open?id=1RpzHsdxD4yLwMVbhoIaRJKbs4LQINGAh>

所有購買 PDFExamDumps 題庫學習資料網‘Fortinet FCSS\_EFW\_AD-7.6 題庫學習資料’的考生，都將獲半年免費升級的售後服務，確保考生一次通過。我們網站的學習資料覆蓋了當前最新的知識點。如果你發現我們的題庫學習資料，存在重大的質量問題，一經核實，我們會無條件退換你的購買費用。事實證明，大多數考生對 Fortinet 的 FCSS\_EFW\_AD-7.6 權威考試題庫學習資料充滿信任，如果你不確定，可以免費下載 FCSS\_EFW\_AD-7.6 考題學習資料試用版本，這樣方便你了解真實考試軟件界面，熟悉操作流程，讓 FCSS\_EFW\_AD-7.6 試題的質量得到保證。

## Fortinet FCSS\_EFW\_AD-7.6 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>• Routing: This section of the exam measures the skills of a Network Infrastructure Engineer and covers the implementation of dynamic routing protocols for enterprise network traffic management. It includes configuring both OSPF and BGP routing protocols to ensure efficient and reliable data transmission across complex organizational networks.</li></ul>
主題 2	<ul style="list-style-type: none"><li>• System Configuration: This section of the exam measures the skills of a Network Security Architect and covers the implementation and integration of core Fortinet infrastructure components. It includes deploying the Security Fabric, enabling hardware acceleration, configuring high availability operational modes, and designing enterprise networks utilizing VLANs and VDOM technologies to meet specific organizational requirements.</li></ul>
主題 3	<ul style="list-style-type: none"><li>• VPN: This section of the exam measures the skills of a VPN Solutions Engineer and covers the implementation of various virtual private network technologies. It includes configuring IPsec VPN using IKE version 2 protocols and implementing Automatic Discovery VPN solutions to establish on-demand secure tunnels between multiple sites within an enterprise network infrastructure.</li></ul>
主題 4	<ul style="list-style-type: none"><li>• Central Management: This section of the exam measures the skills of a Security Operations Manager and covers the implementation of centralized management systems for coordinated control and oversight of distributed Fortinet security infrastructures across enterprise environments.</li></ul>

主題 5	<ul style="list-style-type: none"> <li>• Security Profiles: This section of the exam measures the skills of a Threat Prevention Specialist and covers the configuration and management of comprehensive security profiling systems. It includes implementing SSL</li> <li>• SSH inspection, combining web filtering and application control mechanisms, integrating intrusion prevention systems, and utilizing the Internet Service Database to create layered security protections for organizational networks.</li> </ul>

## Fortinet FCSS\_EFW\_AD-7.6考試證照，FCSS\_EFW\_AD-7.6套裝

PDFExamDumps的資深專家團隊研究出了針對Fortinet FCSS\_EFW\_AD-7.6考試的培訓教材。通過PDFExamDumps提供的教材培訓和學習，通過Fortinet FCSS\_EFW\_AD-7.6 認證考試將會很簡單。PDFExamDumps能100%保證你首次參加Fortinet FCSS\_EFW\_AD-7.6 認證考試就可以成功通過。我們給你提供的考試練習題和答案將在你考試的時候會出現。當你選擇了我們的幫助，PDFExamDumps承諾給你一份準確而全面的考試資料，而且會給你提供一年的免費更新服務。

## 最新的 Fortinet Certified Professional Network Security FCSS\_EFW\_AD-7.6 免費考試真題 (Q43-Q48):

### 問題 #43

Refer to the exhibit, which shows the FortiGuard Distribution Network of a FortiGate device.  
FortiGuard Distribution Network on FortiGate

License Information

Entitlement	Status	
Advanced Malware Protection	Licensed (Expiration Date: 2025/11/10)	
Attack Surface Security Rating	Licensed (Expiration Date: 2025/11/10)

SD-WAN Overlay as a Service	Not Licensed	Purchase

An administrator is trying to find the web filter database signature on FortiGate to resolve issues with websites not being filtered correctly in a flow-mode web filter profile.

Why is the web filter database version not visible on the GUI, such as with IPS definitions?

- A. The web filter database is stored locally on FortiGate, but it is hidden behind the GUI. It requires enabling debug mode to make it visible.
- B. The web filter database is only accessible after manual syncing with a valid FDS server using diagnose test update info.
- C. The web filter database is not hosted on FortiGate: FortiGate queries FortiGuard or FortiManager for web filter ratings on demand.
- D. The web filter database is stored locally, but the administrator must run over CLI diagnose autoupdate versions.

答案: C

解題說明:

Unlike IPS or antivirus databases, FortiGate does not store a full web filter database locally. Instead, FortiGate queries FortiGuard (or FortiManager, if configured) dynamically to classify and filter web content in real time.

Key points:

# Web filtering works on a cloud-based model:

# When a user requests a website, FortiGate queries FortiGuard servers to check its category and reputation.

# The response is then cached locally for faster lookups on repeated requests.

# No local web filter database version:

# Unlike IPS and antivirus, which download and store signature updates locally, web filtering relies on cloud-based queries.

# This is why no database version appears in the GUI.

# Flow mode vs Proxy mode:

# In proxy mode, FortiGate can cache some web filter data, improving performance.

# In flow mode, all queries happen dynamically, with no locally stored database.

#### 問題 #44

An administrator is extensively using VXLAN on FortiGate.

Which specialized acceleration hardware does FortiGate need to improve its performance?

- A. NTurbo
- **B. NP7**
- C. ##9
- D. SP5

答案: B

解題說明:

VXLAN (Virtual Extensible LAN) is an overlay network technology that extends Layer 2 networks over Layer 3 infrastructure.

When VXLAN is used extensively on FortiGate, hardware acceleration is crucial for maintaining performance.

# NP7 (Network Processor 7) is Fortinet's latest network processor designed to accelerate high-performance networking features, including:

# VXLAN encapsulation/decapsulation

# IPsec VPN offloading

# Firewall policy enforcement

# Advanced threat protection at wire speed

NP7 significantly reduces latency and improves throughput when handling VXLAN traffic, making it the best choice for large-scale VXLAN deployments.

#### 問題 #45

Refer to the exhibit, which shows the HA status of an active-passive cluster.

Status	Priority	Hostname	Virtual Domains	Role	System Uptime
Virtual cluster 1					
Synchronized	150	FortiGate_A	Core1 root	Primary	4h 52m
Synchronized	100	FortiGate_B	Core1 root	Secondary	4h 52m
Virtual cluster 2					
Synchronized	150	FortiGate_A	Core2	Primary	
Synchronized	128	FortiGate_B	Core2	Secondary	

An administrator wants FortiGate\_B to handle the Core2 VDOM traffic.

Which modification must the administrator apply to achieve this?

- **A. The administrator must change the priority from 128 to 200 for FortiGate\_B.**
- B. The administrator must change the priority from 100 to 160 for FortiGate\_B.
- C. The administrator must change the load balancing method on FortiGate\_B.
- D. The administrator must disable override on FortiGate\_A.

答案: A

解題說明:

The exhibit shows an active-passive HA (high availability) cluster with two virtual clusters, where FortiGate\_A is the primary device for both Core1 and Core2. If the goal is to have FortiGate\_B take over Core2 traffic, its priority must be higher than FortiGate\_A for Virtual Cluster 2.

Currently, FortiGate\_A has a priority of 150 for Core2, while FortiGate\_B has 128. Increasing FortiGate\_B's priority to 200 ensures it becomes the primary for Virtual Cluster 2, taking over the Core2 VDOM traffic while keeping Core1 traffic on FortiGate\_A.

Disabling override would prevent forced failovers but wouldn't change the role distribution. Adjusting the load-balancing method is irrelevant in an active-passive setup, as it only applies to active-active configurations.

#### 問題 #46

What does the command `set forward-domain <domain_ID>` in a transparent VDOM interface do?

- A. It configures the interface to prioritize traffic based on the domain ID, enhancing quality of service for specified VLANs.
- B. It restricts the interface to managing traffic only from the specified VLAN, effectively segregating network traffic.
- C. It assigns a unique domain ID to the interface, allowing it to operate across multiple VLANs within the same VDOM.
- **D. It isolates traffic within a specific VLAN by assigning a broadcast domain to an interface based on the VLAN ID.**

答案: D

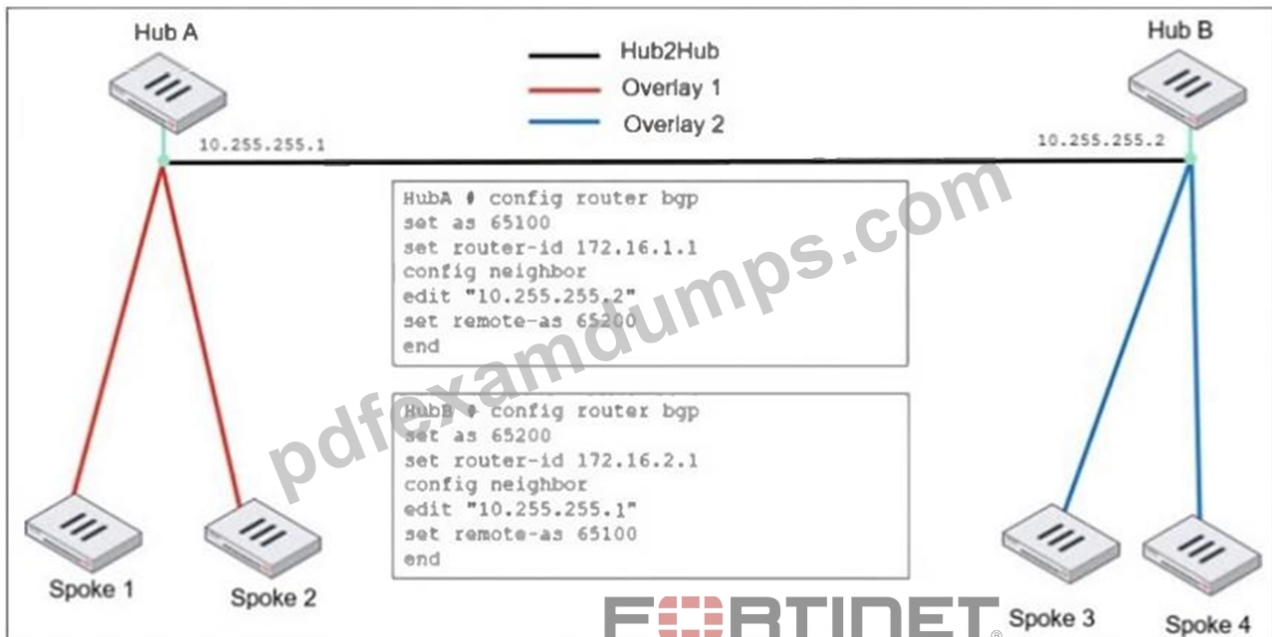

解題說明:

In a transparent mode Virtual Domain (VDOM) configuration, FortiGate operates as a Layer 2 bridge rather than performing Layer 3 routing. The `set forward-domain <domain_ID>` command is used to control how traffic is forwarded between interfaces within the same transparent VDOM.

A forward-domain acts as a broadcast domain, meaning only interfaces with the same forward-domain ID can exchange traffic. This setting is commonly used to separate different VLANs or network segments within the transparent VDOM while still allowing FortiGate to apply security policies.

#### 問題 #47

Refer to the exhibit, which shows an ADVPN network

An administrator must configure an ADVPN using IBGP and EBGP to connect overlay network 1 with 2.

What two options must the administrator configure in BGP? (Choose two.)

- A. `set ibgp-enforce-multihop advpn`
- **B. `set ebgp-enforce-multihop enable`**
- **C. `set next-hop-self enable`**
- D. `set attribute-unchanged next-hop`

答案: B,C

解題說明:

In this ADVPN (Auto-Discovery VPN) network, there are two hubs (Hub A and Hub B) connected via EBGP, while IBGP is used within each overlay. To ensure proper BGP routing between the overlays, the administrator must configure specific BGP options..

`set ebgp-enforce-multihop enable`

By default, EBGP requires directly connected neighbors. Since Hub A and Hub B are not directly connected but reach each other over an IPsec tunnel, multihop must be enabled for EBGP sessions to work.

`set next-hop-self enable`

In IBGP, the next-hop attribute does not change by default. When an IBGP route is advertised from a spoke to another hub or spoke, the next-hop needs to be updated to ensure proper reachability. Enabling next-hop-self forces the BGP speaker to advertise

itself as the next-hop, ensuring that all spokes properly reach routes across the overlays.

## 問題 #48
