- A. CO It eliminates the need for a migration server.
- B. It allows for the migration of multiple tenants simultaneously.
- C. It is compatible with all database types.
- D. It requires less technical downtime compared ttraditional backup/restore methods.

Answer: D

NEW QUESTION # 66
What findings do you document in the Explore Phase Fit-to-standard workshops? Note: There are 3 correct answers to this question.

- A. Key user documentation
- B. Process models
- C. Detailed design of extensions
- D. Key business decisions
- E. Confirmation of scope

Answer: B,D,E

Explanation:
During the Explore Phase of the SAP Activate methodology, Fit-to-Standard workshops are conducted to validate the predefined SAP Best Practices business processes against the customer's business requirements.

The goal is to confirm the project scope, identify necessary configurations, and document key decisions and findings.

A). Detailed design of extensions

Detailed design activities are not part of the Explore Phase. These tasks are performed later during theRealize Phase, after the Fit-to-Standard workshops have been completed and the requirements have been validated.

Therefore, documenting detailed extension designs does not occur at this stage.

B). Key user documentation

Key user documentation is created later in the project, typically during testing or training preparation phases.

It is not an output of the Fit-to-Standard workshops and is therefore not documented during the Explore Phase.

C). Confirmation of scope

Confirmation of scope is a critical output of the Fit-to-Standard workshops. During these sessions, the project team verifies which SAP Best Practices processes are in scope and confirms that the defined scope aligns with the agreed project objectives. Any deviations or required adjustments are documented for follow-up.

D). Key business decisions

Fit-to-Standard workshops also result in documenting key business decisions that affect how standard processes will be used or adapted. These include process ownership decisions, master data responsibilities, and whether certain optional features or process variants will be implemented.

E). Process models

The business process models from SAP Best Practices are reviewed and discussed in the workshops. Any required adjustments, confirmations, or accepted changes are documented to ensure a clear understanding of the end-to-end processes to be implemented.

NEW QUESTION # 67

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition?

Note: There are 2correct answers to this question.

- A. Nomination of a lead conversion expert for content activation
- B. Nomination of a lead configuration expert for content activation
- C. Detailed Digital Discovery Assessment with SAP Best Practices
- D. Access to the Software Update Manager tool

Answer: B,D

NEW QUESTION # 68

Where can you find pre-delivered integration content? Note: There are 3correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Help Portal
- C. Cloud Integration Automation service
- D. SAP Discovery Center
- E. SAP Cloud ALM

Answer: A,C,D

Explanation:

Step 1 - Understanding the question

The question asks where you can find pre-delivered integration content for SAP S/4HANA Cloud, Private Edition.

Pre-delivered integration content includes:

Integration flows (iFlows)

APIs

Templates

Configuration guides

These artifacts simplify connecting SAP S/4HANA with other SAP or third-party systems.

Step 2 - Evaluate each option

Option A: Cloud Integration Automation service

This is correct.

The Cloud Integration Automation Service (CIAS) helps automate the setup of SAP-to-SAP integrations.

It provides guided workflows and integration content that simplify connecting SAP S/4HANA with other SAP solutions (for example, SAP SuccessFactors or SAP Ariba).

CIAS includes pre-delivered integration scenarios and scripts.

Option B: SAP Business Accelerator Hub

This is correct.

The SAP Business Accelerator Hub (formerly called SAP API Business Hub) is the primary public repository for all SAP pre-delivered integration content.

It includes:

APIs

Events

Integration flows (iFlows)

CDS views

Workflow definitions

You can browse, test, and download these for your integration projects.

Option C: SAP Help Portal

This is incorrect.

The SAP Help Portal provides documentation, guides, and release notes, but not executable or downloadable integration content. It is a reference site for learning, not a source of integration artifacts.

Option D: SAP Cloud ALM

This is incorrect.

SAP Cloud ALM is a project and operations management tool. It is used to manage tasks, monitor integrations, and track progress, but it does not host pre-delivered integration content.

Option E: SAP Discovery Center

This is correct.

The SAP Discovery Center offers pre-delivered integration missions, service descriptions, and best-practice guidance for SAP Business Technology Platform (BTP) services.

It helps customers understand how to implement integrations using SAP's pre-built content and accelerators.

Step 3 - Practical examples

Example 1:

A company wants to integrate SAP S/4HANA Cloud with SAP Ariba.

They access the SAP Business Accelerator Hub to find ready-to-use APIs and integration flows, and then use the Cloud Integration Automation Service to deploy and configure the integration scenario.

Example 2:

Another company is exploring how to connect SAP S/4HANA with SAP SuccessFactors.

They visit the SAP Discovery Center to review predefined integration missions and best practices that outline how to connect the two systems using SAP BTP services.

Step 4 - Final Answer

The correct answers are A. Cloud Integration Automation service, B. SAP Business Accelerator Hub, and E. SAP Discovery Center.
