

# NetSec-Pro zu bestehen mit allseitigen Garantien

Übrigens, Sie können die vollständige Version der DeutschPrüfung NetSec-Pro Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1hDrV5W5Pbuan9tk9IJ7tXFSPz8fzmMrf>

Wir DeutschPrüfung bieten Ihnen die freundlichsten Kundendienst. Nach der Kauf der Palo Alto Networks NetSec-Pro Prüfungssoftware, bieten wir Ihnen kostenlosen Aktualisierungsdienst für ein voll Jahr, um Sie die neusten und die umfassendsten Unterlagen der Palo Alto Networks NetSec-Pro wissen zu lassen. Darum werden Sie sehr sicher sein, die Zertifizierungstest der Palo Alto Networks NetSec-Pro zu bestehen. Falls Sie unglücklich die Test der Palo Alto Networks NetSec-Pro nicht bei der ersten Proben bestehen, geben wir Ihnen die vollständige Gebühren zurück, um Iheren finanziellen Verlust zu entschädigen.

## Palo Alto Networks NetSec-Pro Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>• GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>• NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>• Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li> </ul>

Thema 4	<ul style="list-style-type: none"> <li>• <b>Network Security Fundamentals:</b> This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• <b>Infrastructure Management and CDSS:</b> This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>

## NetSec-Pro PDF Testsoftware & NetSec-Pro Pruefungssimulationen

Die Freude, der Erfolg mitbringt, ist riesig. Wir hoffen, dass die anspruchsvolle Software von uns Ihnen das Freude des Bestehens der Palo Alto Networks NetSec-Pro mitbringen. Ihr Erfolg ist auch unsere Erfolg. Deshalb bemühen uns für Sie um Ihre Prüfungszertifizierung der Palo Alto Networks NetSec-Pro. Wir tun unser Bestes, die Palo Alto Networks NetSec-Pro Prüfungsunterlagen zu herstellen und den allseitigen Kundendienst zu bieten.

### Palo Alto Networks Network Security Professional NetSec-Pro Prüfungsfragen mit Lösungen (Q31-Q36):

#### 31. Frage

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. Custom
- B. SNMP
- C. PDF summary
- D. CSV export

**Antwort: A,C**

Begründung:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs. Custom Reports

Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility. They are generated within Panorama and can include data on newly categorized AI URL types.

PDF Summaries

You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review.

Together, these options provide a consistent, standardized method to push insights about AI- based URL categories to branch devices.

#### 32. Frage

In a service provider environment, what key advantage does implementing virtual systems provide for managing multiple customer environments?

- A. Shared threat prevention policies across all tenants
- B. Centralized authentication for all customer domains

- C. Logical separation of control and Security policy
- D. Unified logging across all virtual systems

**Antwort: C**

Begründung:

Virtual systems provide logical separation in a single physical firewall, allowing different customers (or tenants) to have isolated control and security policies.

"Virtual systems enable service providers to offer logically separated, independent environments on a single firewall. Each virtual system can have its own security policies, interfaces, and administrators." (Source: Virtual Systems) This ensures secure, tenant-specific segmentation within multi-tenant environments.

### 33. Frage

What occurs when a security profile group named "default" is created on an NGFW?

- A. It allows traffic to bypass all security checks by default.
- B. It is automatically applied to all new security rules.
- C. It negates all existing security profiles rules on new policy.
- D. It only applies to traffic that has been dropped due to the reset client action.

**Antwort: B**

Begründung:

A security profile group named "default" is automatically applied to all new security rules unless a specific profile group is explicitly configured.

"If a security profile group named 'default' exists, it will be automatically applied to any newly created security policy rules to ensure consistent protection." (Source: Security Profile Groups) This behavior ensures that newly created policies are always protected by default security profiles, minimizing human error.

### 34. Frage

A company has an ongoing initiative to monitor and control IT-sanctioned SaaS applications. To be successful, it will require configuration of decryption policies, along with data filtering and URL Filtering Profiles used in Security policies. Based on the need to decrypt SaaS applications, which two steps are appropriate to ensure success? (Choose two.)

- A. Configure SSL Forward Proxy.
- B. Validate which certificates will be used to establish trust.
- C. Configure SSL Inbound Inspection.
- D. Create new self-signed certificates to use for decryption.

**Antwort: A,B**

Begründung:

To inspect SaaS app traffic (often encrypted), you must configure:

SSL Forward Proxy

The SSL Forward Proxy decryption profile enables the firewall to decrypt outbound SSL traffic, essential for visibility into SaaS app usage.

Validate certificates

Validating and deploying the appropriate root and intermediate CA certificates is critical for establishing trust and preventing SSL errors during decryption.

Without these steps, SaaS decryption and policy enforcement would be incomplete.

### 35. Frage

What are two recommendations to ensure secure and efficient connectivity across multiple locations in a distributed enterprise network? (Choose two.)

- A. Employ centralized management and consistent policy enforcement across all locations.
- B. Use Prisma Access to provide secure remote access for branch users.
- C. Create broad VPN policies for contractors working at branch locations.

- D. Implement a flat network design for simplified network management and reduced overhead.

**Antwort: A,B**

Begründung:

Prisma Access for secure remote access

"Prisma Access extends consistent security and optimized connectivity to branch locations, enabling secure access for mobile and branch users." (Source: Prisma Access Overview) Centralized management for consistent policy enforcement

"Centralized management using Strata Cloud Manager or Panorama ensures security policies and updates are uniformly applied across distributed locations, preventing policy drift and security gaps." (Source: Strata Cloud Manager Best Practices) These two practices are foundational for modern, distributed enterprise networks to maintain security posture and performance.

### 36. Frage

.....

Die Produkte von DeutschPrüfung werden von den erfahrungsreichen IT-Fachleuten nach ihren Kenntnissen und Erfahrungen bearbeitet. Wenn Sie sich an der Palo Alto Networks NetSec-Pro Zertifizierungsprüfung beteiligen wollen, wählen Sie doch DeutschPrüfung. DeutschPrüfung bietet Ihnen umfassende Prüfungsmaterialien von guter Qualität, so dass Sie sich besser auf die fachliche Palo Alto Networks NetSec-Pro Prüfung vorbereiten und das NetSec-Pro Zertifikat erhalten.
