You will feel very happy that you will be about to change well because of our CRT-450 study guide.

Salesforce Certified Platform Developer I Sample Questions (Q219-Q224):

NEW QUESTION # 219

Universal Containers has large number of custom applications that were built using a third-party JavaScript framework and exposed using Visualforce pages. The Company wants to update these applications to apply styling that resembles the look and feel of Lightning Experience. What should the developer do to fulfill the business request in the quickest and most effective manner?

- A. Set the attribute enableLightning to true in the definition.

- B. Rewrite all Visualforce pages as Lightning components.
- C. Enable Available for Lightning Experience, Lightning Communities, and the mobile app on Visualforce pages used by the custom application.
- **D. Incorporate the Salesforce Lightning Design System CSS stylesheet into the JavaScript applications.**

Answer: D

Explanation:

The Salesforce Lightning Design System (SLDS) is a CSS framework that provides a look and feel that is consistent with Lightning Experience. By incorporating the SLDS CSS stylesheet into the JavaScript applications, the developer can apply the same styles and components that are used in Lightning Experience, without having to rewrite the entire application or change the underlying logic. This is the quickest and most effective way to update the custom applications to match the Lightning Experience UI.

The other options are not as quick or effective as option A. Option B would require rewriting all the Visualforce pages as Lightning components, which would be time-consuming and complex, especially if the applications use a third-party JavaScript framework that is not compatible with Lightning Web Components.

Option C is not valid, as there is no such attribute as enableLightning in the Visualforce page definition.

Option D would enable the Visualforce pages to be accessed from Lightning Experience, Lightning Communities, and the mobile app, but it would not change the appearance or behavior of the pages to match the Lightning Experience UI. References:

* Using the Salesforce Lightning Design System in Apps - Salesforce Developers

NEW QUESTION # 220

The value of the account type field is not being displayed correctly on the page. Assuming the custom controller is properly referenced on the Visualforce page, what should the developer do to correct the problem?

- **A. Add a getter method for the actType attribute.**
- B. Change theAccount attribute to public.
- C. Convert theAccount.Type to a String.
- D. Add with sharing to the custom controller.

Answer: A

Explanation:

In Visualforce, data-binding requires getter and setter methods to access the attributes of a controller. Adding a getter method for actType ensures that its value is retrieved properly.

NEW QUESTION # 221

Which Lightning Web Component custom event property settings enable the event to bubble up the containment hierarchy and cross the Shadow DOM boundary?

- A. bubbles: false, composed: true
- **B. bubbles: true, composed: true**
- C. bubbles: true, composed: false
- D. bubbles: false, composed: false

Answer: B

Explanation:

Why These Settings?

bubbles: true: Enables the event to propagate up the containment hierarchy.

composed: true: Allows the event to cross the Shadow DOM boundary.

Why Not Other Options?

Other combinations (e.g., bubbles: false) prevent the event from propagating or crossing the Shadow DOM boundary.

NEW QUESTION # 222

Universal Containers wants a list button to display a Visualforce page that allows users to edit multiple records.

Which Visualforce feature supports this requirement?

- **A. recordSetVarpage attribute**
- B. <apex:listButton>tag
- C. custom controller
- D. controller extension

Answer: A

Explanation:

Explanation/Reference:

NEW QUESTION # 223

A company wants a recruiting app that models candidates and interviews; displays the total number of interviews on each candidate record; and defines security on interview records that is independent from the security on candidate records. What would a developer do to accomplish this task? Choose 2 answers

- **A. Create a lookup relationship between the Candidate and Interview objects.**
- B. Create a roll-up summary field on the Candidate object that counts Interview records.
- **C. Create a trigger on the Interview object that updates a field on the Candidate object.**
- D. Create a master-detail relationship between the Candidate and Interview objects.

Answer: A,C

NEW QUESTION # 224

.....

If someone who can pass the exam, they can earn a high salary in a short time. If you decide to beat the exam, you must try our CRT-450 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our CRT-450 prep torrent as the studying materials. So it is worthy for them to buy our CRT-450 learning prep. We provide the free demo of our CRT-450 training guide so as to let you have a good understanding of our CRT-450 exam questions before your purchase.
