In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of CDCS. Our study tool can meet your needs. Our CDCS test torrent is of high quality, mainly reflected in the pass rate. As for our CDCS Study Tool, we guarantee our learning materials have a higher passing rate than that of other agency. Our CDCS test torrent is carefully compiled by industry experts based on the examination questions and industry trends in the past few years.

In recent year, certificate for the exam has raised great popularity, since certificate may be directly related to the salary or your future development. We have CDCS Exam Dumps to help you get a certificate you want. The quality of the CDCS learning materials is reliable, and it has gotten popularity in our customer. Besides if you have any questions, please contact with our service stuff, we will give you reply as quickly as possible, and if you are very urgent, you can just contact our live chat service stuff.

Realistic CDCS Latest Exam Camp & Leader in Qualification Exams & Top CDCS Exam Preparation

To do this you just need to pass the EXIN CDCS certification exam. Are you ready to accept this challenge? Looking for the proven and easiest way to crack the EXIN CDCS certification exam? If your answer is yes then you do not need to go anywhere. Just download CDCS exam practice questions and start EXIN EPI Certified Data Centre Specialist (CDCS) exam preparation without wasting further time. The ITCertMagic EXIN CDCS Dumps will provide you with everything that you need to learn, prepare and pass the challenging CDCS exam with flying colors. You must try ITCertMagic EXIN CDCS exam questions today.

EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of Exin data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.
Topic 2	<ul style="list-style-type: none">Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.

Topic 3	<ul style="list-style-type: none"> • Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.

EXIN EPI Certified Data Centre Specialist Sample Questions (Q23-Q28):

NEW QUESTION # 23

What is the main advantage of using an End-of-Row (EoR) design?

- A. A single Top-of-Rack (ToR) switch is more expensive than an EoR switch
- B. There will be fewer switches to manage (corrected typing; original said "more")
- C. You need a separate rack to install all your EoR switches
- D. A ToR switch has only optical interfaces

Answer: B

Explanation:

EoR centralizes access/aggregation switches at the end of each row, reducing the number of access switches compared with ToR (one per rack), which simplifies management and often lowers Ops costs.

* A, D are incorrect generalizations.

References: ANSI/TIA-942-B §8 (Telecommunications infrastructure-HDA/EoR/ToR discussion); Cisco Data Center Access Layer CVD (EoR vs ToR design considerations).

NEW QUESTION # 24

When shielding material reaches its saturation point, what will be the impact?

- A. The shielding material will reach its maximum electrically charged state.
- B. The shielding material will increase its permeability factor.
- C. The shielding material will no longer be able to attenuate (reduce) additional EMF.
- D. The shielding material will reach its optimal shielding performance state.

Answer: C

Explanation:

When shielding material reaches its saturation point, it can no longer effectively attenuate additional EMF. At saturation, the material's ability to absorb or redirect magnetic fields is exhausted, meaning it cannot provide further shielding beyond this point. Additional EMF exposure would pass through the material without significant reduction.

Detailed Explanation:

Saturation occurs when the material's magnetic domains are fully aligned with the magnetic field, leaving no capacity to absorb or deflect further EMF. This can happen with high EMF levels, beyond the material's design limits, resulting in a breakdown of shielding effectiveness.

EPI Data Center Specialist References:

EPI guidelines on EMF management indicate that selecting appropriate shielding materials with sufficient capacity is essential to prevent saturation and ensure continuous protection. Saturation limits should be considered during design to avoid compromised shielding performance.

NEW QUESTION # 25

Do you need to consider bullet (ballistic) protection when designing a data center?

- A. No, there is no reason for implementing bullet protection as you cannot predict the type of weapons that might be used
- B. Yes, but only when the data center is built in an area with a high criminality rate or with a risk of terrorist attacks
- C. Yes, bullet protection is a requirement of ANSI/TIA-942 for Rated-3/4 data centers
- D. No; bullet protection is not a requirement of ANSI/TIA-942

Answer: B

Explanation:

ANSI/TIA-942 requires a risk assessment-based approach to physical security; ballistic protection is not mandated but may be justified by threat analysis.

* A is incomplete (it may still be required by risk).

References: ANSI/TIA-942-B §6.4 Physical Security (threat/risk assessment), ISO 31000 (risk management).

NEW QUESTION # 26

What is the sensible heat ratio (SHR)?

- A. Ratio of the cold-aisle temperature to the hot-aisle temperature
- **B. Ratio of the sensible heat to the total of sensible plus latent heat to be removed from a conditioned space**
- C. Ratio of cold-air supply to hot-air return temperature of a cooling system
- D. Ratio of the latent heat to the total of sensible plus latent heat to be removed from a conditioned space

Answer: B

Explanation:

SHR = Sensible Load / (Sensible + Latent Load); it describes the portion of the total cooling that is sensible (temperature change) versus latent (moisture removal).

References: ASHRAE Fundamentals Handbook (Psychrometrics/Load Calculations), ASHRAE TC 9.9.

NEW QUESTION # 27

You are changing the design of the fire suppression system for your computer room from a halocarbon fire suppression system into an inert-based fire suppression system. Could you use the same formula to calculate the gas content for the gas?

- A. Yes, as long as you use the same units of measure, i.e., kg/m³ or lbs/ft³.
- B. Yes, as long as you change the 'S' factor of the formula to reflect the gas type used.
- C. Yes, as long as you take the difference between the net and gross volume into account.
- **D. No, there is a significant difference in the formula for the different types of fire suppression gases.**

Answer: D

Explanation:

The formula used to calculate the gas content differs significantly between halocarbon and inert-based fire suppression systems. Halocarbon systems function by absorbing heat, while inert systems work by reducing oxygen levels. Due to these differences in fire suppression mechanisms, distinct formulas are applied, factoring in the specific properties of each gas type and the required concentration levels.

Detailed Explanation:

Halocarbon systems like FM200 require a formula that accounts for the concentration needed for cooling, while inert gases like nitrogen or argon need a formula that calculates the volume based on oxygen displacement. As the design concentration and characteristics of these gases differ, it's essential to use the correct formula specific to the gas type.

EPI Data Center Specialist References:

EPI recommends consulting the specific design requirements and formulas provided by each gas manufacturer when switching fire suppression systems to ensure the correct amount of gas is deployed for effective fire suppression.

NEW QUESTION # 28

.....

Our EXIN dumps torrent contains everything you need to pass CDCS actual test smoothly. We always adhere to the principle that provides our customers best quality CDCS Exam Prep with most comprehensive service. This is the reason why most people prefer to choose our CDCS vce dumps as their best preparation materials.
