

# 100% Pass 2026 CompTIA Perfect Dumps N10-009 Torrent

P.S. Free & New N10-009 dumps are available on Google Drive shared by LatestCram: [https://drive.google.com/open?id=1EsiG33uwiNAP7ZfVy\\_mHMtd1TIE3qws0](https://drive.google.com/open?id=1EsiG33uwiNAP7ZfVy_mHMtd1TIE3qws0)

The N10-009 training vce offered by LatestCram will be the best tool for you to pass your actual test. The N10-009 questions & answers are especially suitable for the candidates like you for the coming exam test. The contents of CompTIA study dumps are edited by our experts who have rich experience, and easy for all of you to understand. So, with the skills and knowledge you get from N10-009 practice pdf, you can 100% pass and get the certification you want.

## CompTIA N10-009 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Networking Concepts: For network administrators and IT support professionals, this domain covers</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Selection and configuration of wireless devices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Cloud concepts and connectivity options, and Common networking ports.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Network Implementation: For network technicians and junior network engineers, this section covers Characteristics of routing technologies, Configuration of switching technologies and features, and</li></ul>
Topic 5	<ul style="list-style-type: none"><li>OSI reference model concepts, Comparison of networking appliances, applications, and functions</li></ul>

## CompTIA N10-009 Exam Questions - Quick Tips To Pass [2026]

LatestCram customizable & advanced N10-009 online test engine can create a real exam simulation environment to help to prepare for your CompTIA N10-009 exam test. The intelligence and humanization can inspire your desire for N10-009 exam test study. Besides, the N10-009 online test engine is suitable for all the electronic devices without any installation restriction. We know that time is very precious for everyone in the society. While LatestCram N10-009 Online Test engine can help you study efficiently.

Now, you see, with the N10-009 online test engine, you can get a score after each test, thus you will know your error and enhance your weakness. Besides, you can set the frequency of occurrence of the questions you made mistake. With the high study efficiency and valid N10-009 exam torrent, passing the N10-009 actual test is no longer a problem.

## CompTIA Network+ Certification Exam Sample Questions (Q218-Q223):

### NEW QUESTION # 218

A network analyst is installing a wireless network in a corporate environment. Employees are required to use their domain identities and credentials to authenticate and connect to the WLAN. Which of the following actions should the analyst perform on the AP to fulfill the requirements?

- A. Generate a PSK for each user.
- **B. Set up WPA3 protocol.**
- C. Implement WPS.
- D. Enable MAC security.

**Answer: B**

Explanation:

WPA3-Enterprise provides strong security and supports authentication using domain identities through a RADIUS server and 802.1X authentication. This is the best choice for a corporate environment requiring user- based authentication.

WPA3-Enterprise Benefits:

Uses 802.1X with EAP (Extensible Authentication Protocol) to authenticate users via a directory service (e.g., Active Directory).

Eliminates shared passwords (PSK) for authentication.

Provides strong encryption and resistance to brute-force attacks.

Incorrect Options:

A:Enable MAC Security:

MAC filtering is not secure because MAC addresses can be spoofed.

B:Generate a PSK for Each User:

Pre-shared keys (PSK) are used in WPA-Personal, not in an enterprise setting.

Does not scale well in corporate environments.

C:Implement WPS:

Wi-Fi Protected Setup (WPS) is a vulnerable security method meant for home users.

Not suitable for enterprise authentication.

### NEW QUESTION # 219

A network architect needs to create a wireless field network to provide reliable service to public safety vehicles. Which of the following types of networks is the best solution?

- A. Infrastructure
- **B. Mesh**
- C. Point-to-point
- D. Ad hoc

**Answer: B**

Explanation:

A mesh network is the best solution for providing reliable wireless service to public safety vehicles. In a mesh network, each node (vehicle) can connect to multiple other nodes, providing multiple paths for data to travel. This enhances reliability and redundancy, ensuring continuous connectivity even if one or more nodes fail. Mesh networks are highly resilient and are well-suited for dynamic and mobile environments such as public safety operations.

Reference: CompTIA Network+ study materials.

### NEW QUESTION # 220

An ISP provided a company with a pre-configured modem and five public static IP addresses. Which of the following does the company's firewall require to access the internet? (Select TWO).

- A. The modem's IP address
- B. DHCP server

- C. DNS servers
- D. NTP server
- E. One static IP address
- F. Default gateway

**Answer: E,F**

Explanation:

To access the internet using static IPs, the firewall (or router) must be configured correctly:

\* B. Default gateway: This is essential because it tells the firewall where to send outbound traffic destined for outside the local network.

\* D. One static IP address: The firewall must be assigned one of the static IPs to communicate over the public internet.

The other options are not essential for basic internet connectivity in this context:

\* A. NTP server: Useful for time synchronization but not required for internet access.

\* C. The modem's IP address: Irrelevant unless doing modem-level configuration.

\* E. DNS servers: Important for name resolution but not for basic layer 3 connectivity.

\* F. DHCP server: Not used when static IPs are assigned.

CompTIA Network+ N10-009 Official Objectives: 2.2 - Compare and contrast addressing technologies.

### NEW QUESTION # 221

A technician is troubleshooting a computer issue for a user who works in a new annex of an office building. The user is reporting slow speeds and intermittent connectivity. The computer is connected via a Cat 6 cable to a distribution switch that is 492ft (150m) away. Which of the following should the technician implement to correct the issue?

- A. Run a Cat 7 cable from the computer to the distribution switch.
- B. Increase the bandwidth allocation to the computer.
- C. Install an access switch in the annex and run fiber to the distribution switch.
- D. Enable the computer to support jumbo frames.

**Answer: C**

Explanation:

The maximum recommended length for Ethernet cable runs is 100 meters (328 feet). At 150 meters, the Cat 6 cable is too long, causing signal degradation and connectivity issues. Running fiber from the distribution switch to an access switch in the annex will allow for reliable connectivity over longer distances, as fiber can cover greater distances without signal loss. (Reference: CompTIA Network+ Study Guide, Chapter on Network Cable Standards)

### NEW QUESTION # 222

Which of the following is a company most likely enacting if an accountant for the company can only see the financial department's shared folders?

- A. Acceptable use policy
- B. General Data Protection Regulation
- C. End user license agreement
- D. Least privilege network access

**Answer: D**

Explanation:

Least privilege network access is a principle that restricts users' access rights to only what is necessary for them to perform their job functions. In this case, the accountant's access is limited to only the financial department's shared folders, ensuring that they cannot access other parts of the network unnecessarily. This reduces the risk of unauthorized access and potential data breaches.

### NEW QUESTION # 223

.....

The CompTIA N10-009 certification brings multiple career benefits. Reputed firms happily hire you for well-paid jobs when you
