FCP_FAZ_AN-7.4 Online Lab Simulation - Valuable FCP_FAZ_AN-7.4 Feedback

We provide the Fortinet FCP_FAZ_AN-7.4 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. TestsDumps provides proprietary preparation guides for the certification exam offered by the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam dumps. In addition to containing numerous questions similar to the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam, the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam questions are a great way to prepare for the Fortinet FCP_FAZ_AN-7.4 exam dumps.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which two elements are contained in a system backup created on FortiAnalyzer? (Choose two.)

- A. Logs from registered devices
- B. Database snapshot
- C. Report information
- D. System information

Answer: C,D

NEW QUESTION # 40

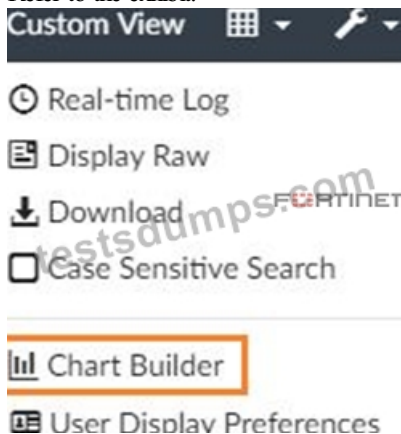

You've moved a registered logging device out of one ADOM and into a new ADOM. What happens when you rebuild the new ADOM database?

- A. FortiAnalyzer removes logs from the old ADOM.
- B. FortiAnalyzer resets the disk quota of the new ADOM to default.
- C. FortiAnalyzer migrates archive logs to the new ADOM.
- D. FortiAnalyzer migrates analytics logs to the new ADOM.

Answer: D

NEW QUESTION # 41

Refer to the exhibit.

What is the purpose of using the Chart Builder feature on FortiAnalyzer?

- A. This feature allows you to build a chart under FortiView.
- B. You can add charts to generated reports using this feature.
- C. In Log View, this feature allows you to build a chart and chart automatically, on the top 100 log entries.
- **D. In Log View, this feature allows you to build a dataset and chart automatically, based on the filtered search results.**

Answer: D

NEW QUESTION # 42

Which statement about sending notifications with incident update is true?

- A. If you use multiple fabric connectors, all connectors must have the same settings.
- B. Notifications can be sent only when an incident is updated or deleted.
- C. Notifications can be sent only by email.
- **D. You can send notifications to multiple external platforms.**

Answer: D

Explanation:

In FortiOS and FortiAnalyzer, incident notifications can be sent to multiple external platforms, not limited to a single method such as email. Fortinet's security fabric and integration capabilities allow notifications to be sent through various fabric connectors and third-party integrations. This flexibility is designed to ensure that incident updates reach relevant personnel or systems using preferred communication channels, such as email, Syslog, SNMP, or integration with SIEM platforms.

Let's review each answer option for clarity:

* Option A: You can send notifications to multiple external platforms

* This is correct. Fortinet's notification system is capable of sending updates to multiple platforms, thanks to its support for fabric connectors and external integrations. This includes options such as email, Syslog, SNMP, and others based on configured connectors.

* Option B: Notifications can be sent only by email

* This is incorrect. Although email is a common method, FortiOS and FortiAnalyzer support multiple notification methods through various connectors, allowing notifications to be directed to different platforms as per the organization's setup.

* Option C: If you use multiple fabric connectors, all connectors must have the same settings

* This is incorrect. Each fabric connector can have its unique configuration, allowing different connectors to be tailored for specific notification and integration requirements.

* Option D: Notifications can be sent only when an incident is updated or deleted

* This is incorrect. Notifications can be sent upon the creation of incidents, as well as upon updates or deletion, depending on the configuration.

* According to FortiOS and FortiAnalyzer 7.4.1 documentation, notifications for incidents can be configured across various platforms by using multiple connectors, and they are not limited to email alone. This capability is part of the Fortinet Security Fabric, allowing for a broad range of integrations with external systems and platforms for effective incident response.

NEW QUESTION # 43

Which statement regarding macros on FortiAnalyzer is true?

- A. Macros are ADOM-specific and each ADOM type have unique macros relevant to that ADOM.
- B. Macros are predefined templates for reports and cannot be customized.
- **C. Macros are useful in generating excel log files automatically based on the report settings.**
- D. Macros are supported only on the FortiGate ADOMs.

Answer: C

Explanation:

Macros in FortiAnalyzer are used to streamline reporting tasks by automating data extraction and report generation. Here's a breakdown of each option to determine the correct answer:

* Option A - Macros are Predefined Templates for Reports and Cannot be Customized:

* This statement is incorrect. Macros in FortiAnalyzer are not simply fixed templates; they allow for customization to tailor data extraction and reporting based on specific needs and configurations.

* Conclusion: Incorrect.

* Option B - Macros are Useful in Generating Excel Log Files Automatically Based on the Report Settings:

* This statement is accurate. Macros in FortiAnalyzer can be configured to automate the generation of reports, including outputting

log data to Excel format based on predefined report settings. This makes them especially useful for scheduled reporting and data analysis.

* Conclusion:Correct.

* Option C - Macros are ADOM-Specific and Each ADOM Type Has Unique Macros Relevant to that ADOM:

* Macros are not limited to specific ADOMs, nor are they ADOM-specific. Macros can be applied across various ADOMs based on report configurations but are not inherently tied to or unique for each ADOM type.

* Conclusion:Incorrect.

* Option D - Macros are Supported Only on the FortiGate ADOMs:

* This is not true. Macros in FortiAnalyzer are not restricted to FortiGate ADOMs; they can be utilized across different ADOMs that FortiAnalyzer manages.

* Conclusion:Incorrect.

Conclusion:

* Correct Answer:B. Macros are useful in generating excel log files automatically based on the report settings.

* This answer correctly describes the functionality of macros in FortiAnalyzer, emphasizing their role in automating report generation, especially for Excel log files.

References:

* FortiAnalyzer 7.4.1 documentation on macros and report generation functionalities.

NEW QUESTION # 44
