Updated CCFH-202b Reliable Exam Pdf | Amazing Pass Rate For CCFH-202b Exam | Marvelous CCFH-202b: CrowdStrike Certified Falcon Hunter

Young people are facing greater employment pressure. It is imperative to increase your competitiveness. Selecting our CCFH-202b learning quiz, you can get more practical skills when you are solving your problems in your daily work. Because our CCFH-202b

Exam Questions contain the most updated knowledge and information. What is more, you can get the most authoritative CCFH-202b certification, which will make you stand out a crowd of normal people.

CrowdStrike CCFH-202b Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Search and Investigation Tools: This domain covers analyzing file and process metadata, using Investigate Module tools, performing various searches, and interpreting dashboard results.
Topic 2	<ul style="list-style-type: none">• Hunting Analytics: This domain focuses on recognizing malicious behaviors, evaluating information reliability, decoding command line activity, identifying infection patterns, distinguishing legitimate from adversary activity, and identifying exploited vulnerabilities.
Topic 3	<ul style="list-style-type: none">• Hunting Methodology: This domain covers conducting active hunts, performing outlier analysis, testing hunting hypotheses, constructing queries, and investigating process trees.

CrowdStrike Certified Falcon Hunter Sample Questions (Q36-Q41):

NEW QUESTION # 36

An analyst has sorted all recent detections in the Falcon platform to identify the oldest in an effort to determine the possible first victim host. What is this type of analysis called?

- A. Visualization of hosts
- **B. Temporal analysis**
- C. Statistical analysis
- D. Machine Learning

Answer: B

Explanation:

Temporal analysis is a type of analysis that focuses on the timing and sequence of events in order to identify patterns, trends, or anomalies. By sorting all recent detections in the Falcon platform to identify the oldest, an analyst can perform temporal analysis to determine the possible first victim host and trace back the origin of an attack.

NEW QUESTION # 37

Refer to Exhibit.

What type of attack would this process tree indicate?

- A. Brute Forcing Attack
- B. Man-in-the-middle Attack
- **C. Phishing Attack**
- D. Web Application Attack

Answer: C

Explanation:

This process tree indicates a phishing attack, as it shows a user opening an email attachment (outlook.exe) that launches a malicious macro (cmd.exe) that downloads and executes a payload (powershell.exe) that connects to a remote server (svchost.exe). A phishing attack is a type of social engineering attack that uses deceptive emails or messages to trick users into opening malicious attachments or links that can compromise their systems or credentials.

NEW QUESTION # 38

Which of the following best describes the purpose of the Mac Sensor report?

- **A. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads**

- B. The Mac Sensor report displays a listing of all Mac hosts with a Falcon sensor installed
- C. The Mac Sensor report displays a listing of all Mac hosts without a Falcon sensor installed
- D. The Mac Sensor report provides a detection focused view of known malicious activities occurring on Mac hosts, including machine-learning and indicator-based detections

Answer: A

Explanation:

This is the correct answer for the same reason as above. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads. It does not display a listing of all Mac hosts with or without a Falcon sensor installed, nor does it provide a detection focused view of known malicious activities occurring on Mac hosts.

NEW QUESTION # 39

What information is shown in Host Search?

- A. Quarantined Files
- **B. Processes and Services**
- C. Prevention Policies
- D. Intel Reports

Answer: B

Explanation:

Processes and Services is one of the information that is shown in Host Search. Host Search is an Investigate tool that allows you to view events by category, such as process executions, network connections, file writes, etc. Processes and Services is one of the categories that shows information such as process name, command line, parent process name, parent command line, etc. for each process execution event on a host. Quarantined Files, Prevention Policies, and Intel Reports are not shown in Host Search.

NEW QUESTION # 40

Which structured analytic technique contrasts different hypotheses to determine which is the best leading (prioritized) hypothesis?

- **A. Analysis of competing hypotheses**
- B. Model hunting framework
- C. Key assumptions check
- D. Competitive analysis

Answer: A

Explanation:

Analysis of competing hypotheses is a structured analytic technique that contrasts different hypotheses to determine which is the best leading (prioritized) hypothesis. It involves listing all the possible hypotheses, identifying the evidence and assumptions for each hypothesis, evaluating the consistency and reliability of the evidence and assumptions, and rating the likelihood of each hypothesis based on the evidence and assumptions.

NEW QUESTION # 41

.....

The Exam4Free CrowdStrike Certified Falcon Hunter (CCFH-202b) exam dumps are being offered in three different formats. All these three CCFH-202b exam dumps formats contain the real CrowdStrike CCFH-202b exam questions that will help you to streamline the CCFH-202b Exam Preparation process. The Exam4Free CrowdStrike CCFH-202b PDF dumps file is a collection of real, valid, and updated CCFH-202b practice questions that are also easy to install and use.
