We can make sure that our CCFA-200b study materials have the ability to help you solve your problem, and you will not be troubled by these questions above.

## CrowdStrike Falcon Administrator Sample Questions (Q96-Q101):

### NEW QUESTION # 96

Under the "Next-Gen Antivirus: Cloud Machine Learning" setting there are two categories, one of them is "Cloud Anti-Malware" and the other is:

- A. Execution Blocking
- B. Sensor Anti-Malware
- C. Adware & PUP
- D. Advanced Machine Learning

**Answer: C**

Explanation:

With EDR license, if you go to "Audit logs > Machine-learning prevention monitoring", three options appear: Cloud Anti-malware, Sensor Anti-malware and Adware&PUP. Therefore, answer is A.

### NEW QUESTION # 97

A Falcon Administrator is trying to use Real-Time Response to start a session with a host that has a sensor installed but they are unable to connect. What is the most likely cause?

- A. The domain controller is preventing the connection
- B. There is another analyst connected into it
- C. They do not have an RTR role assigned to them
- D. The host has a user logged into it

**Answer: C**

Explanation:

The most likely cause for not being able to use Real-Time Response to start a session with a host that has a sensor installed is that they do not have an RTR role assigned to them. An RTR (Real Time Response) role is a role that grants access and permissions to use the Real Time Response feature in Falcon, which allows you to remotely access and investigate hosts in real time. There are three types of RTR roles: Real Time Response -Read-Only Analyst, Real Time Response -Active Responder, and Real Time Response -Administrator. You need to have at least one of these roles assigned to you in order to use Real Time Response.

### NEW QUESTION # 98

Which of the following can be found in the Falcon UI Audit Trail Report?

- A. Audit records of Falcon instance billing
- B. Audit records of actions taken by both users and API clients
- C. Audit records of actions taken by only APIs
- D. Audit records of actions taken by only users

**Answer: B**

### NEW QUESTION # 99

A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after how many days?

- A. 60 Days
- B. 90 Days
- C. 30 Days
- D. 45 Days

**Answer: B**

Explanation:

A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after 90 days. A sensor that has not contacted the Falcon cloud for more than seven days is considered inactive and will be moved from the Host Management page to the Trash page. An inactive sensor will remain in the Trash page for 90 days before being permanently deleted from the Falcon platform. You can restore an inactive sensor from the Trash page if it contacts the Falcon cloud again within 90 days.

### NEW QUESTION # 100

What sensor update policy will a sensor receive if it does not have a host group assignment?

- A. Auto N-2 policy
- B. The default policy
- C. They don't get a policy
- D. Auto N-1 policy

**Answer: B**

### NEW QUESTION # 101
