You know, we arrange our experts to check the latest and newest information about C-SEC-2405 Actual Test every day, so as to ensure the C-SEC-2405 test torrent you get is the latest and valid. I think you will clear all your problems in the C-SEC-2405 actual test.

### SAP Certified Associate - Security Administrator Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

In SAP S/4HANA Cloud Public Edition, what can you do with the Display Authorization Trace? Note: There are 3 correct answers to this question.

- A. Adjust role restrictions to further limit access when performing forensic analysis
- B. Analyze authorization check results for already assigned authorizations
- C. Display business roles granting specific access
- D. Analyze authorization check results for missing authorizations
- E. Adjust role restrictions to account for missing authorizations

**Answer: B,C,D**

#### NEW QUESTION # 28

What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Role maintenance reads applications from role menus.
- B. Catalogs are assigned to role menus.
- C. Role maintenance reads applications from a catalog.
- D. Manual role authorizations are supported in custom catalogs.
- E. Authorization defaults define role authorizations.

**Answer: B,C,E**

#### NEW QUESTION # 29

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Pages
- B. Business Role Template
- C. Business Catalogs
- D. Restrictions

**Answer: C**

### NEW QUESTION # 30

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to this question.

- A. Employee
- B. User
- C. Administrator
- D. Employer

**Answer: A,B**

Explanation:

In the SAP S/4HANA Business User Concept, the entities that share data with Business Partners are User and Employee. The User entity represents the technical user account in the system, defined in user master records, and is linked to Business Partners to associate system access with business roles and authorizations. The Employee entity represents the human resource data of an individual, such as their organizational assignment or job role, and is synchronized with Business Partners to ensure that user access aligns with their employment details. This integration ensures that Business Partners, which serve as a central entity for managing business relationships, have consistent data for access control and business processes. The Employer entity is not directly linked to Business Partners, as it represents the organization, not an individual.

Similarly, Administrator is a role or user type, not an entity sharing data with Business Partners. This data-sharing mechanism supports seamless identity and access management, enhancing security and operational alignment in SAP S/4HANA systems.

### NEW QUESTION # 31

Where do you configure the Social Media identity providers?

- A. In the code editor of the SAP Business Application Studio
- B. In the SAP BTP Cockpit Account Explorer
- C. In the administration console for SAP Cloud Identity Services

**Answer: C**

Explanation:

Social Media identity providers, such as Google or Facebook, are configured in the administration console for SAP Cloud Identity Services. This console provides a centralized interface for managing identity providers, allowing administrators to set up and configure external authentication sources for single sign-on (SSO). By integrating social media identity providers, organizations can enable users to authenticate using their social media credentials, streamlining access to SAP applications while maintaining security. The administration console supports configuring trust relationships, mapping attributes, and defining authentication policies for these providers. In contrast, the SAP Business Application Studio is used for application development, not identity provider configuration, and the SAP BTP Cockpit Account Explorer is focused on account and subaccount management, not specific identity provider settings. The administration console's role in SAP Cloud Identity Services ensures a secure and user-friendly authentication experience, aligning with SAP's identity management strategy for cloud-based solutions.

### NEW QUESTION # 32

.....

You can easily download these formats of SAP C-SEC-2405 actual dumps and use them to prepare for the SAP C-SEC-2405 certification test.
