The SAFe-Agilist Certification program is intended for individuals who want to learn the skills and knowledge required to lead a SAFe enterprise successfully.

Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q58-Q63):

NEW QUESTION # 58

What is "precisely specify value by product" central to?

- A. SAFe Core Values
- B. SAFe Principles

- C. Agile Manifesto
- **D. Lean Thinking**

Answer: D

Explanation:

"Precisely specify value by product" is central to Lean thinking. Lean thinking is a philosophy and a set of principles and practices that aim to eliminate waste and optimize value delivery. Value is defined as anything that a customer is willing to pay for or that meets their needs or desires. Value is specified by product, which means that each product or service should have a clear and explicit definition of what value it provides to the customer and how it differs from other products or services. Specifying value by product helps avoid ambiguity, confusion, and inefficiency in the value delivery process. References: Thriving in the Digital Age, SAFe Principle #1

NEW QUESTION # 59

What is an example of applying cadence and synchronization in SAFe?

- A. Using a Portfolio Kanban system
- B. Creating cross-functional ARTs and Agile teams
- **C. Conducting a PI Planning event**
- D. Allocating budgets to Value Streams

Answer: C

Explanation:

Conducting a PI planning event is an example of applying cadence and synchronization in SAFe. Cadence is a regular and predictable pattern of events that provides a rhythm for development. Synchronization is the alignment of multiple perspectives and activities within a cadence. PI planning is a two-day event that occurs at the beginning of every Program Increment (PI), which is typically an 8-12 week timebox. PI planning brings together all the teams in an ART to align on a common vision, identify dependencies, plan features, establish objectives, and commit to a plan for the next PI. References: Develop on Cadence; Release on Demand, PI Planning

NEW QUESTION # 60

What is one example of differentiating business objectives?

- **A. Strategic Themes**
- B. Solution Intent
- C. Enterprise Goals
- D. Portfolio Vision

Answer: A

Explanation:

Explanation

Strategic themes are an example of differentiating business objectives. Strategic themes are specific, itemized business objectives that connect a portfolio to the enterprise strategy. Strategic themes provide guidance and direction for portfolio vision, budget allocation, value stream identification, epic prioritization, and metric definition. Strategic themes help differentiate a portfolio from its competitors and create a unique value proposition for its customers. References: SAFe Portfolio, Strategic Themes

NEW QUESTION # 61

Which SAFe Lean-Agile Principle includes the critical part of "delaying decisions to the last responsible moment"?

- A. Build incrementally with fast, integrated learning cycles
- B. Base milestones on objective evaluation of working systems
- **C. Assume variability; preserve options**
- D. Make value flow without interruptions

Answer: C

Explanation:

The SAFe Lean-Agile Principle that includes the critical part of "delaying decisions to the last responsible moment" is "Assume variability; preserve options". This principle is based on the concept of set-based design, which is a way of managing uncertainty and complexity in product development. Set-based design means exploring multiple possible solutions in parallel, eliminating inferior options over time, and converging on the best solution as more information becomes available. Delaying decisions to the last responsible moment means keeping multiple options open until enough data and feedback are gathered to make an informed decision, which reduces risk and waste. References: SAFe Lean-Agile Principles, SAFe Principle #4

NEW QUESTION # 62

Which implementation step follows Coach ART Execution on the SAFe Implementation Roadmap?

- A. Organize Around Value
- **B. Launch more ARTs and Value Streams**
- C. Train Executives, Leaders, and Managers
- D. Accelerate

Answer: B

Explanation:

Launching more ARTs and Value Streams is the implementation step that follows Coach ART Execution on the SAFe Implementation Roadmap. The SAFe Implementation Roadmap is a guide that helps enterprises implement SAFe in a structured and reliable way. The roadmap consists of 12 critical moves that span from reaching the tipping point to extending to the portfolio and beyond. Coach ART Execution is the seventh move, where the first ART is launched and coached by a SAFe Program Consultant (SPC) or other expert.

Launch more ARTs and Value Streams is the eighth move, where the enterprise expands the implementation of SAFe to other value streams and ARTs, based on the learnings and successes of the first ART. References:

SAFe Implementation Roadmap, Coach ART Execution, Launch more ARTs and Value Streams
