- D. Create a custom text field on the Recurring Donation object and use NPSP Recurring Donation Custom Field Mappings

答案: C

Create a Custom Text Field on the Opportunity Object:

Navigate to Setup.

In the Object Manager, select Opportunity.

Create a new Text field (e.g., "Recurring Donation Reference Number").

Use NPSP Recurring Donation Custom Field Mappings:

Map the custom text field on the Recurring Donation object to the custom text field on the Opportunity object.

### 問題 #253

A consultant is helping a nonprofit diagnose and address some issues they have with NPSP. The consultant sees the customer is hitting governor limit errors on a particular job.

Which action should the consultant take to resolve the issue?

- A. Increase the batch size for that job.
- **B. Decrease the batch size for that job.**
- C. Reschedule that nightly job.
- D. Schedule that job to run more frequently.

答案： B

解題說明：

When encountering governor limit errors on a particular job in NPSP, the consultant should decrease the batch size for that job.

Here's why:

Batch Size:

Salesforce has strict governor limits to ensure efficient resource usage. When a batch job hits these limits, it often indicates that the batch size is too large.

Decreasing the batch size reduces the number of records processed in each batch execution, thereby minimizing the chances of hitting governor limits.

This approach helps in completing the job successfully without exceeding platform limits.
