

Exam Oracle 1Z0-931-25 Preparation & Standard 1Z0-931-25 Answers

P.S. Free & New 1Z0-931-25 dumps are available on Google Drive shared by FreePdfDump: https://drive.google.com/open?id=1ffBcZmrAKyF1CcNwLpzXCgJo4E8V_4o3

By using our 1Z0-931-25 exam braindumps, it will be your habitual act to learn something with efficiency. With the cumulative effort over the past years, our 1Z0-931-25 study guide has made great progress with passing rate up to 98 to 100 percent among the market. A lot of professional experts concentrate to making our 1Z0-931-25 Preparation materials by compiling the content so they have gained reputation in the market for their proficiency and dedication.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Data Lake Analytics with Autonomous Database: This section of the exam measures the skills of Big Data Engineers and explores how Autonomous Database can be used for analytics in data lake environments. It includes data ingestion, query optimization, and leveraging cloud-native analytics services, ensuring engineers can efficiently process and analyze large volumes of structured and unstructured data.
Topic 2	<ul style="list-style-type: none"> • Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.
Topic 3	<ul style="list-style-type: none"> • Managing and Maintaining Autonomous Database: This section of the exam measures the skills of Database Administrators and focuses on the ongoing management and maintenance of Autonomous Database instances. It includes using REST APIs and OCI CLI for automation, configuring access control lists and private endpoints, monitoring performance, setting up notifications, utilizing features like auto-indexing and data safe, handling connectivity through wallets and service handles, and configuring disaster recovery using Data Guard to ensure business continuity.
Topic 4	<ul style="list-style-type: none"> • Autonomous Database Dedicated: This section of the exam measures the skills of IT Architects and explores the workflows and functionality of Autonomous Database Dedicated and Autonomous Database Cloud@Customer. It includes provisioning dedicated resources, setting up OCI policies, monitoring infrastructure, scheduling maintenance tasks such as patching, and managing encryption keys for enhanced security. IT Architects will learn how to integrate dedicated database environments within their cloud strategy.

Standard 1Z0-931-25 Answers, Certification 1Z0-931-25 Dumps

FreePdfDump's 1Z0-931-25 exam training materials is more accurate and easier to understand, more authoritative than other 1Z0-931-25 exam dumps provided by any other website. After choose FreePdfDump, you won't regret. If you are still worried, you can first try 1Z0-931-25 Dumps Free demo and answers on probation. After you buy FreePdfDump's 1Z0-931-25 exam training materials, we guarantee you will pass 1Z0-931-25 test with 100%.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q108-Q113):

NEW QUESTION # 108

Which three security features are available in Oracle Autonomous Database Shared Infrastructure? (Choose three.)

- A. Data Redaction
- B. Database Vault
- C. Customer Managed Keys
- D. Transparent Data Encryption
- E. Audit Vault

Answer: B,C,D

Explanation:

Oracle Autonomous Database Shared Infrastructure offers built-in security features to protect data and ensure compliance. The three correct features are:

Customer Managed Keys (A): This feature allows customers to use their own encryption keys for Transparent Data Encryption (TDE), stored in Oracle Key Vault or OCI Vault. It gives control over key management, enhancing security by ensuring only the customer can decrypt data. For example, a company might generate a key in OCI Vault, link it to their ADB, and rotate it periodically, all managed outside Oracle's default keys.

Database Vault (D): Oracle Database Vault enforces fine-grained access controls, preventing unauthorized access to sensitive data even by privileged users (e.g., DBAs). In ADB shared infrastructure, it's available to restrict operations like SELECT on specific schemas, adding a layer of protection against internal threats. For instance, it could block an admin from viewing customer PII unless explicitly permitted.

Transparent Data Encryption (E): TDE is enabled by default in Autonomous Database, encrypting data at rest (e.g., in tablespaces, backups, and logs) using AES-256. This ensures that if physical storage is compromised, the data remains unreadable without the encryption key. Customers can opt for customer-managed keys (A) or use Oracle-managed keys, but TDE itself is always active.

The incorrect options are:

Audit Vault (B): Oracle Audit Vault is a separate product for centralized audit log management, not a built-in feature of ADB shared infrastructure. While ADB performs auditing, it doesn't include Audit Vault's advanced capabilities natively.

Data Redaction (C): Data Redaction (masking sensitive data in query results) is available in on-premises Oracle Database Enterprise Edition but is not supported in Autonomous Database shared infrastructure. ADB's managed nature limits such custom configurations, relying instead on TDE and Database Vault for security.

These features collectively ensure robust security with minimal customer effort in a shared environment.

NEW QUESTION # 109

Which two statements are correct about Autonomous Data Warehouse on Shared Exadata Infrastructure?

- A. Compression is enabled by default. Autonomous Data Warehouse uses Hybrid Columnar Compression for all tables by default.
- B. You have direct access to the database node.
- C. Oracle Database Result Cache is enabled by default for all SQL statements.
- D. Parallelism is not enabled by default.

Answer: A,C

Explanation:

Let's evaluate each statement about Autonomous Data Warehouse (ADW) on Shared Exadata Infrastructure:

- A . Oracle Database Result Cache is enabled by default for all SQL statements: True. ADW enables the Result Cache by default to improve query performance by storing frequently accessed results in memory.
 - B . You have direct access to the database node: False. ADW is a fully managed service; users do not have direct access to underlying nodes, which Oracle manages for patching, scaling, and security.
 - C . Parallelism is not enabled by default: False. Parallelism is enabled by default in ADW to optimize large analytical queries across multiple CPUs.
 - D . Compression is enabled by default. Autonomous Data Warehouse uses Hybrid Columnar Compression for all tables by default: True. Hybrid Columnar Compression (HCC) is applied automatically to reduce storage and enhance query performance.
- Thus, A and D are correct, reflecting ADW's default performance optimizations.

NEW QUESTION # 110

Oracle Autonomous Database on Dedicated Infrastructure is composed of which Oracle Cloud resources?

- A. Oracle Machine Learning Zeppelin Notebook, Autonomous Exadata Infrastructure, Fleet Administrator, Database Administrator
- B. Virtual Cloud Network, Compartments, Policies, Autonomous Exadata Infrastructure
- C. Fleet Administrator, Database Administrator, Database User, Autonomous Exadata Infrastructure
- **D. Autonomous Exadata Infrastructure, Autonomous Backup, Autonomous Container Database, Autonomous Database**

Answer: D

Explanation:

Full Detailed In-Depth Explanation:

Autonomous Database on Dedicated Infrastructure comprises:

Autonomous Exadata Infrastructure: The hardware and software foundation.

Autonomous Container Database: Hosts multiple ADB instances.

Autonomous Database: The managed database instance.

Autonomous Backup: Automatic backups to OCI Object Storage.

Other options include roles (B, C) or general OCI resources (D), not core components of the service. A is the correct composition.

NEW QUESTION # 111

Which predefined role that exists in Autonomous Database includes common privileges that are used by a Data Warehouse developer? (Choose the best answer.)

- **A. DWROLE**
- B. ADBDEV
- C. ADMIN
- D. ADWC

Answer: A

Explanation:

Autonomous Database provides predefined roles tailored to specific use cases. The correct answer is:

DWROLE (B): The DWROLE predefined role is designed for Data Warehouse developers. It includes privileges commonly needed for data warehousing tasks, such as creating tables, views, and materialized views, as well as executing analytical queries. This role is optimized for Autonomous Data Warehouse (ADW) workloads.

The incorrect options are:

ADBDEV (A): There is no predefined ADBDEV role in Autonomous Database; this appears to be a fictional or misinterpreted role.

ADMIN (C): The ADMIN role is a superuser role with full database privileges, far exceeding the needs of a typical Data Warehouse developer and not tailored to that specific use case.

ADWC (D): This is not a predefined role; it might be a typo or confusion with ADW (Autonomous Data Warehouse), but no such role exists.

DWROLE is the best fit for a Data Warehouse developer's needs.

NEW QUESTION # 112

Oracle Data Safe is a unified control center for your Oracle databases that helps you understand the sensitivity of your data, evaluate risks to data, mask sensitive data, implement and monitor security controls, assess user security, monitor user activity, and address data security compliance requirements. Which statement is FALSE?

- A. Oracle Data Safe only supports Autonomous Databases.
- B. Oracle Data Safe evaluates user types, how users are authenticated, and the password policies assigned to each user.
- C. Oracle Data Safe helps you assess the security of your cloud database configurations by analyzing database configurations.
- D. Oracle Data Safe helps you find sensitive data in your database by inspecting the actual data in your database and its data dictionary.

Answer: A

Explanation:

Full Detailed In-Depth Explanation:

Oracle Data Safe enhances database security across various deployments. Let's evaluate:

A: True. Data Safe assesses cloud database configurations for vulnerabilities.

B: True. It evaluates user authentication, types, and password policies.

C: False. Data Safe supports Autonomous Databases, Exadata Cloud Service, OCI VMs, and on-premises Oracle databases, not just Autonomous Databases.

D: True. It scans data and metadata to identify sensitive information.

Option C is the false statement, as Data Safe's scope extends beyond Autonomous Databases.

NEW QUESTION # 113

.....

Firmly believe in an idea, the 1Z0-931-25 exam questions are as long as the user to follow our steps, follow our curriculum requirements, users can be good to achieve their goals, to obtain the 1Z0-931-25 qualification certificate of the target. Before you make your decision to buy our 1Z0-931-25 learning guide, you can free download the demos to check the quality and validity. Then you can know the 1Z0-931-25 training materials more deeply.
