Cisco 400-007 Dumps Get Success Cisco 400-007 Minimal Effort

The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the 400-007 exam can help you find the job you dream about, and we will provide the best 400-007 question torrent to the client. We are aimed that candidates can pass the 400-007 exam easily. The 400-007 Study Materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the 400-007 exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.

Cisco 400-007 Exam is a challenging and rigorous certification exam that requires a significant investment of time and effort. Candidates must prepare thoroughly by studying the exam objectives, reviewing industry best practices, and gaining hands-on experience in network design. Preparing for the exam may involve taking courses, attending workshops, and participating in online forums and study groups.

>> Valid 400-007 Practice Materials <<

Pass 400-007 Exam with High Hit Rate Valid 400-007 Practice Materials by SureTorrent

We provide varied functions to help the learners learn our 400-007 study materials and prepare for the exam. The self-learning and self-evaluation functions of our 400-007 exam questions help the learners check their learning results and the statistics and report functions help the learners find their weak links and improve them promptly. And you will be more confident as you know the inform of the 400-007 Exam and the questions and answers.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q255-Q260):

NEW QUESTION # 255
A multicast network is sing Bidirectional PIM.
Which two combined actions achieve high availability so that two RPs within the same network can act in a redundant manner? (Choose two)

- A. Control routing to the two RPs through a longest match prefix
- B. Advertise the two RP addresses in the routing protocol
- C. Use two phantom RP addresses
- D. Use anycast RP based on MSDP peering between the two RPs
- E. Manipulate the administration distance of the unicast routes to the two RPs
- F. Manipulate the multicast routing table by creating static mroutes to the two RPs

Answer: A,C

NEW QUESTION # 256
Which design consideration is valid when you contrast fabricPath and trill?

- A. FabricPath permits active-active FHRP and TRILL support anycast gateway.
- B. FabricPath Permits ECMP, but TRILL does not
- C. FabricPath permits active-active mode, but TRILL supports only active-standby mode.
- D. FabricPath uses IS-IS, but TRILL uses VxLAN

Answer: A

NEW QUESTION # 257
Cost is often one of the motivators for a business to migrate from a traditional network to a software-defined network. Which design decision is directly influenced by CAPEX drivers?

- A. Complexity
- B. Stability
- C. Manageability
- D. Scalability

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
CAPEX (Capital Expenditures) focuses on up-front hardware investments, like routers, switches, and appliances.
* A: Scalability directly impacts CAPEX-network designs that require fewer or more scalable hardware components reduce capital investment costs.
* B and D are more influenced by OPEX (operational expenditures).
* C (complexity) is a broader design challenge, not directly tied to CAPEX.

NEW QUESTION # 258
What are two examples of components that are part of an SDN architecture? (Choose two.)

- A. Control plane
- B. Application plane
- C. Management plane
- D. Network plane
- E. Software plane

Answer: A,B

Explanation:
Software-Defined Networking (SDN) architecture is based on the logical decoupling of the control and data planes. According to the SDN reference model, the architecture typically includes the following planes:
* Control Plane: This resides in the SDN controller and is responsible for decision-making, including route and policy calculations.
* Application Plane: This layer contains business and network applications (e.g., firewalls, QoS policies) that communicate with the controller to request services and enforce policy.
These planes are essential in SDN architecture:
* The control plane programs the forwarding behavior of network elements.
* The application plane interacts via northbound APIs to define intent and service logic.
Options such as "Software plane" and "Network plane" are vague or not used in the SDN context. The
"Management plane" is a separate functional layer and is not part of the architectural definition core to SDN as per CCDE v3.1.

NEW QUESTION # 259
A Tier-3 Service Provider is evolving into a Tier-2 Service Provider due to the amount of Enterprise business it is receiving The network engineers are re-evaluating their IP/MPLS design considerations in order to support duplicate/overlapping IP addressing from their Enterprise customers within each Layer3 VPN. Which concept would need to be reviewed to ensure stability in their

network?

- A. Assigning unique VRF ID's to each L3VPN
- B. Assigning unique Route Target ID'S
- C. Assigning unique IP address space for the Enterprise NAT/Firewalls
- D. Assigning unique Route Distinguishers

Answer: D

NEW QUESTION # 260

......

Do you want to enhance your professional skills? How about to get the 400-007 test certification for your next career plan? Be qualified by Cisco 400-007 certification, you will enjoy a boost up in your career path and achieve more respect from others. Here, we offer one year free update after complete payment for 400-007 Pdf Torrent, so you will get the latest 400-007 study practice for preparation. 100% is our guarantee. Take your 400-007 real test with ease.
