## Access-Management-Architect考題

我們Testpdf的IT認證考題擁有多年的培訓經驗，Testpdf Salesforce的Identity-and-Access-Management-Architect考試培訓資料是個值得信賴的產品，我們的IT精英團隊不斷為廣大考生提供最新版的Identity-and-Access-Management-Architect考試培訓資料，我們的工作人員作出了巨大努力，以確保你們在考試中總是取得好成績，可以肯定的是，Testpdf Salesforce的Identity-and-Access-Management-Architect考試材料是為你提供最實際的IT認證材料。

### 最新的 Identity and Access Management Designer Identity-and-Access-Management-Architect 免費考試真題 (Q100-Q105):

#### 問題 #100

Northern Trail Outfitters (NTO) wants its customers to use phone numbers to log in to their new digital portal, which was designed and built using Salesforce Experience Cloud. In order to access the portal, the user will need to do the following:

1. Enter a phone number and/or email address
2. Enter a verification code that is to be sent via email or text.

What is the recommended approach to fulfill this requirement?

- A. Create a custom login page with an Apex controller. The controller has logic to send and verify the identity.
- **B. Create a Login Discovery page and provide a Login Discovery Handler Apex class.**
- C. Create an authentication provider and implement a self-registration handler class.
- D. Create a custom login flow that uses an Apex controller to verify the phone numbers with the company's verification service.

答案： B

解題說明：

Explanation

To allow customers to use phone numbers to log in to their new digital portal, the identity architect should create a Login Discovery page and provide a Login Discovery Handler Apex class. A Login Discovery page is a custom page that allows users to enter their phone number or email address and receive a verification code via email or text. A Login Discovery Handler is a class that implements the Auth.LoginDiscoveryHandler interface and defines how to handle the user input and verification code. This approach can provide a passwordless login experience for the customers. References: Login Discovery, Create a Login Discovery Page

#### 問題 #101

Universal Containers is designing an identity architecture that involves integrating Salesforce with an external directory service. The external directory service will act as the central repository for user authentication and authorization across multiple systems within the organization.

Which approach should be evaluated to establish trust between Salesforce and the external directory service?

- A. Utilizing email-based verification for user authentication across the systems.
- **B. Implementing a federated identity solution based on SAML (Security Assertion Markup Language).**
- C. Enforcing IP-based access restrictions for Salesforce and the external directory service.
- D. Using a shared database table to synchronize user credentials between the two systems.

答案： B

解題說明：

When an external directory service is intended to remain the central source for authentication and authorization across systems, the right architecture to evaluate is federation rather than password synchronization or database sharing. SAML is one of the standard ways Salesforce establishes that federated trust with an enterprise identity system. Email verification and IP restrictions can complement security, but they do not create single sign-on or shared identity trust. A shared credential table is also not an acceptable identity architecture. The important design principle is that Salesforce should trust the external identity service through standards-based federation and allow that system to remain authoritative for authentication.

That is precisely the problem SAML-based federation is designed to solve. This is why option D is the best answer in Salesforce terms.

#### 問題 #102

Northern Trail Outfitters (NTO) uses the Customer 360 Platform implemented on Salesforce Experience Cloud. The development

team in charge has learned of a contactless user feature, which can reduce the overhead of managing customers and partners by creating users without contact information.

What is the potential impact to the architecture if NTO decides to implement this feature?

- A. Passwordless authentication can not be supported because the mobile phone receiving one-time password (OTP) needs to match the number on the contact record.
- B. If contactless user is upgraded to Community license, the contact record is automatically created and linked to the user record, but not associated with an Account.
- C. Custom registration handler is needed to correctly assign External Identity or Community license for the newly registered contactless user.
- **D. Contactless user feature is available only with the External Identity license, which can restrict the Experience Cloud functionality available to the user.**

**答案： D**

解題說明：

Contactless users in Experience Cloud are tied to a narrower external identity model than full community users associated with contacts. That is the important architectural tradeoff. The feature can reduce overhead for certain external identity scenarios, but it also limits what license model and functionality are available. In practice, architects need to recognize that contactless users are associated with External Identity use cases rather than the richer Experience Cloud collaboration capabilities that depend on account-contact relationships. That is why the decision affects portal design, entitlement options, and downstream business processes. The right answer focuses on the license and capability limitation, not on speculative behavior about passwordless login or automatic contact creation during a later license change. This is why option C is the best answer in Salesforce terms.

#### 問題 #103

An administrator created a connected app for a custom web application in Salesforce which needs to be visible as a tile in App Launcher. The tile for the custom web application is missing in the app launcher for all users in Salesforce. The administrator requested assistance from an identity architect to resolve the issue.

Which two reasons are the source of the issue?

Choose 2 answers

- **A. The connected app is not set in the App menu as 'Visible in App Launcher'.**
- B. OAuth scope does not include "openid".
- **C. StartURL for the connected app is not set in Connected App settings.**
- D. Session Policy is set as 'High Assurance Session required' for this connected app.

**答案： A,C**

解題說明：

Explanation

The StartURL for the connected app is required to specify the landing page for the app. The connected app must also be set as visible in the App Launcher to appear as a tile for users. References: Connected App Basics, Manage Connected Apps

#### 問題 #104

Northern Trail Outfitters (NTO) believes a specific user account may have been compromised. NTO inactivated the user account and needs to perform a forensic analysis and identify signals that could indicate a breach has occurred.

What should NTO's first step be in gathering signals that could indicate account compromise?

- A. download the Setup Audit Trail and review all recent activities performed by the user.
- **B. download the Login history and evaluate the details of topics performed by the user.**
- C. download the identity provider Event log and contact the details of activities performed by the user.
- D. Review the User record and evaluate the login and transaction history.

**答案： B**

解題說明：

When an account may be compromised, the first Salesforce-native source to review is Login History. It shows authentication attempts, source IP addresses, login status, browser and platform information, and the methods used to access the org. That makes it the most direct starting point for identifying suspicious access patterns or confirming when and how a user session was established.

Setup Audit Trail tracks administrative configuration changes, not end-user sign-in behavior, and the user record itself doesn't provide the same detailed authentication trail. In a forensic workflow, the early question is usually "did someone log in, from where, and by what method?" Login History is the fastest place to answer that inside Salesforce. This is why option B is the best answer in Salesforce terms.

## 問題 #105

.....

Testpdf考題網覆蓋了真實的 Identity-and-Access-Management-Architect 考試指南，並根據其編定適合全球考生都能通用的 Identity-and-Access-Management-Architect 題庫，讓每一位考生都能順利通過 Salesforce Identity-and-Access-Management-Architect 考試。我們承諾使用 Identity-and-Access-Management-Architect 考題的考生可以一次通過相關認證考試，對於一次不過的全額退款，避免您的後顧之憂。你現在就可以去網上可以免費下載我們提供的部分關於 Salesforce Identity-and-Access-Management-Architect 題庫的模擬測試題和答案作為嘗試。

**Identity-and-Access-Management-Architect考題:** <https://www.testpdf.net/Identity-and-Access-Management-Architect.html>

Salesforce相信同樣會很精彩，如果你之前對Identity-and-Access-Management-Architect的瞭解不多，那麼這些基礎知識會對你很有幫助，Salesforce Identity-and-Access-Management-Architect試題 在真實的生命裏，每樁偉業都有信心開始，並由信心跨出第一步，Identity-and-Access-Management-Architect全稱Salesforce Certified Identity and Access Management Architect Exam，Salesforce Identity-and-Access-Management-Architect試題 由於你的夢想很高，你可以找到很多幫助你準備的材料，Salesforce Identity-and-Access-Management-Architect考題專業認證Identity-and-Access-Management-Architect考題專業認證要求通過4門具有壹定難度的考試，以證實在Oracle數據庫管理領域內的熟練程度：專家級技能和技術知識考試，通過這種考試之後，說明此人可以管理大型數據庫，或者能夠開發可以部署到整個企業的強大應用，Testpdf Salesforce的Identity-and-Access-Management-Architect考試培訓資料你可以得到最新的Salesforce的Identity-and-Access-Management-Architect考試的試題及答案，它可以使你順利通過Salesforce的Identity-and-Access-Management-Architect考試認證，Salesforce的Identity-and-Access-Management-Architect考試認證有助於你的職業生涯，在以後不同的環境，給出一個可能，Salesforce的Identity-and-Access-Management-Architect考試合格的使用，我們Testpdf Salesforce的Identity-and-Access-Management-Architect考試培訓資料確保你完全理解問題及問題背後的概念，它可以幫助你很輕鬆的完成考試，並且一次通過。

嗯...倒是好像有壹個，說完之後他整個人的氣勢就變了，壹股甚至還要凌駕於他山劍氣之上的威壓陡然降臨，Salesforce相信同樣會很精彩，如果你之前對Identity-and-Access-Management-Architect的瞭解不多，那麼這些基礎知識會對你很有幫助，在真實的生命裏，每樁偉業都有信心開始，並由信心跨出第一步。

## 更新的Salesforce Identity-and-Access-Management-Architect試題是行業領先材料&有效的Identity-and-Access-Management-Architect: Salesforce Certified Identity and Access Management Architect

Identity-and-Access-Management-Architect全稱Salesforce Certified Identity and Access Management Architect Exam，由於你的夢想很高，你可以找到很多幫助你準備的材料，Salesforce專業認證Identity and Access Management Designer專業認證要求通過4門具有壹定難度的考試，以證實在Oracle數據庫管理領域內的熟練Identity-and-Access-Management-Architect程度：專家級技能和技術知識考試，通過這種考試之後，說明此人可以管理大型數據庫，或者能夠開發可以部署到整個企業的強大應用。
