Test SC-401 Questions | SC-401 Exam Topic

In order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our SC-401 learning questions in this website. And we can assure you that you will get the latest version of our SC-401 Training Materials for free from our company in the whole year after payment on SC-401 practice quiz. Last but not least, we will provide the most considerate after sale service for our customers on our SC-401 exam dumps.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q186-Q191):

NEW QUESTION # 186
You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1.
Site1 contains the files shown in the following table.
In the Microsoft Purview portal, you create a content search named Conlent1 and configure the search conditions as shown in the following exhibit.
Which files will be returned by Content1?

- A. File1 .docx, File2.docx, and File3.docx
- B. File2.docx only
- C. File1.docx and File2.docx only
- D. File3.docx only
- E. File1 .docx and File3.docx only

Answer: B

Explanation:
The content search uses the KQL editor with the query -Author:USER1. In eDiscovery/Content search, the minus sign denotes NOT and KQL is case-insensitive for property values. Therefore, this query returns items whose Author is not 'User1'.
File1.docx # Author = User1 # excluded
File2.docx # Author = User2 # included
File3.docx # Author = USER1 (same as User1, case-insensitive) # excluded Result: File2.docx only.
Reference: Microsoft Search (KQL) property restrictions and case-insensitive behavior for queries in content search.

NEW QUESTION # 187
You have a Microsoft 365 E5 subscriptions.
You deploy Microsoft Purview Data Security Posture Management for Al (DSPM for Al).
You need to edit the default policies created as part of the deployment.
Which two Microsoft Purview solutions should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Insider Risk Management
- B. DSPMforAI
- C. Information Protection
- D. Data Loss Prevention
- E. Compliance Manager
- F. Data Lifecycle Management
- G. Information Barriers

Answer: C,D

NEW QUESTION # 188
You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site! and the data loss prevention (DLP) policies shown in the following table.
The DLP rules are configured as shown In the following table.
All the policies are assigned to Site1.
You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip.
What should you do?

- A. Prevent additional processing of the policies if there is a match for Rule2
- B. Change the priority of DLP2 to 3.
- C. Change the priority of DLP2 to 0.
- D. Enable additional processing of the policies if there is a match for Rule1.

Answer: C

Explanation:
Current setup:
DLP1 (priority 0, Rule1) # Stop processing additional rules enabled # means if Rule1 matches, later rules (including Rule2 with Tip2) will never be evaluated.
Requirement: Ensure that if all rules match, the user sees Tip2 (Rule2's policy tip).
To fix this: Move DLP2 above DLP1 in priority (i.e., set DLP2 = priority 0). Then Rule2 will be evaluated first, and its policy tip (Tip2) will be displayed.
Why not others?
B). Prevent additional processing of the policies if there is a match for Rule2: That would stop processing later, but DLP1 would still block earlier due to its higher priority.
C). Change the priority of DLP2 to 3: That pushes it even lower, making it worse.
D). Enable additional processing for Rule1: Rule1 already has stop processing enabled. Changing that does not ensure Rule2 runs before Rule1, because priority is evaluated first.
Reference:
Microsoft Learn: Order of rule processing in DLP
Policies with lower priority numbers run first, and "Stop processing" ends evaluation.

NEW QUESTION # 189

You have Microsoft 365 E5 subscription that uses data loss prevention (DLP) to protect sensitive information.

You have a document named Form.docx.

You plan to use PowerShell to create a document fingerprint based on Form.docx.

You need to first connect to the subscription.

Which cmdlet should you run?

- A. Connect-MgGraph
- B. Connect-ExchangeOnline
- C. Connect-IPPSSession
- D. Connect-SPOService

Answer: C

Explanation:

Currently, you can create a document fingerprint only in Security & Compliance PowerShell, and Connect-IPPSSession is how you connect to it.

https://learn.microsoft.com/en-us/purview/document-fingerprinting#create-a-custom-sensitive- information-type-based-on-document-fingerprinting-using-powershell

https://learn.microsoft.com/en-us/powershell/module/exchange/connect-ippssession?view=exchange-ps

NEW QUESTION # 190

You have a Microsoft 365 E5 subscription.

You are implementing insider risk management.

You need to maximize the amount of historical data that is collected when an event is triggered.

What is the maximum number of days that historical data can be collected?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 191

......

Free demo for SC-401 exam bootcamp is available, and you can have a try before buying, so that you can have a deeper understanding of what you are going to buy. In addition, SC-401 exam materials are high-quality and accuracy, and therefore you can use the exam materials with ease.
