Salesforce Certified Marketing Cloud Developer Exam certification is valid for two years, and candidates need to maintain their certification by completing a maintenance exam or earning Trailhead badges.

Salesforce Certified Marketing Cloud Developer Exam Sample Questions (Q168-Q173):

NEW QUESTION # 168

Which AMPscript function group could most negatively Impact send processing?

- A. Math functions
- B. String functions
- C. Data extension functions
- D. Date Time

Answer: C

Explanation:

Data extension functions in AMPscript, such as LookupRows, LookupOrderedRows, and UpdateDE, can most negatively impact send processing because they involve querying and manipulating data extensions. These operations can be resource-intensive and time-consuming, especially when dealing with large data sets.

NEW QUESTION # 169

A developer created an email with AMPscript variable as the subject line. The subject line variable was recently updated, but when testing the email, the wrong subject line continues to appear in the inbox. The developer thinks another, outdated, subject line variable is declared within the email. Where could the outdated variable be located?

- A. In the Text body which is processed after the subject line
- B. In the HTML body which is processed after the Text body
- C. In the Text body which is processed after the HTML body
- D. In the HTML body which is processed after the subject line

Answer: D

Explanation:

The outdated subject line variable could be located in the HTML body which is processed after the subject line (D). This is because AMPscript variables declared in the HTML body can affect the overall email content, including the subject line, and if not updated, they can cause discrepancies in the displayed subject line.

NEW QUESTION # 170

A developer needs to identify all subscribers who were sent Job ID 420 but did not click any links. Which SQL statement would produce the desired results?

- A.
- B.
- C.
- D.

Answer: C

NEW QUESTION # 171

A marketer is troubleshooting why an email send's tracking information is not available in Sales Cloud. The marketer confirms Marketing Cloud Connect is installed properly. What should be confirmed next to continue troubleshooting the send's tracking information?

- A. The audience was built using a Triggered Send Data Extension template
- B. The audience was a Salesforce Data Extension containing the appropriate SFID
- C. The tracking destination folder was set to My Tracking
- D. The email was sent to the All Subscribers list

Answer: B

NEW QUESTION # 172

A developer uses the messageDefinitionSends REST API endpoint to send a triggered send email. This method returns a 202 (success) response code. How could the developer validate if the email was successfully sent?

- A. Use the messageDefinitionSend/key:(key)/deliveryRecords REST endpoint with GET method
- B. Confirm the record was successfully inserted into the associated Triggered Send Data Extension.
- C. Use the validateEmail REST resource with POST method to obtain the email delivery details from the request.
- D. The 202 response code indicates the message was sent successfully; no further action is required.

Answer: A

Explanation:

After using the messageDefinitionSends REST API endpoint to send a triggered send email, and receiving a 202 (success) response code, the developer can validate if the email was successfully sent by using the messageDefinitionSend/key:(key)/deliveryRecords REST endpoint with the GET method. This endpoint provides delivery records and allows verification of the email's delivery status.
