## CLT復習問題集 & CLT合格問題

さまざまな電子デバイスを通じてCLTガイド資料を使用できます。自宅ではコンピューターを使用でき、外では電話も使用できます。CLT学習教材を学ぶために携帯電話を使用する人が増えているので、好きなものを選択することもできます。利点の1つは、ネットワーク環境でCLT練習問題を初めて使用する場合、次回教材を使用するときにネットワーク要件がなくなることです。いつでもどこでもCLT本物の試験を開くことができます。

## MSSC CLT 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"><li>Inventory Control: This section of the exam measures skills of the Certified Logistics Technician and covers the methods used to track stock levels, perform cycle counts, and reconcile inventory discrepancies to maintain high accuracy and prevent shortages or overstock.</li></ul>
トピック 2	<ul style="list-style-type: none"><li>Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.</li></ul>
トピック 3	<ul style="list-style-type: none"><li>Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.</li></ul>

トピック 4	<ul style="list-style-type: none"> <li>• The World of Logistics and the Global Supply Chain: This section of the exam measures skills of the Certified Logistics Associate and covers the foundational knowledge of how logistics fits into the broader global economy and the movement of goods from their origin to the final consumer.</li> </ul>
トピック 5	<ul style="list-style-type: none"> <li>• Order Processing: This section of the exam measures skills of the Certified Logistics Technician and covers the steps required to accurately manage and fulfill customer requests, including picking and preparing the correct items for dispatch.</li> </ul>
トピック 6	<ul style="list-style-type: none"> <li>• Packaging and Shipping: This section of the exam measures skills of the Certified Logistics Technician and covers the necessary techniques for securing goods safely for transit, selecting the right containers, and correctly labeling them for outbound transportation.</li> </ul>
トピック 7	<ul style="list-style-type: none"> <li>• Quality Control Principles: This section of the exam measures skills of the Certified Logistics Associate and covers the fundamental concepts used to monitor and ensure that goods and processes meet required quality standards and customer expectations.</li> </ul>
トピック 8	<ul style="list-style-type: none"> <li>• Evaluation of Transportation Modes (Truck, Air, Rail, Water): This section of the exam measures skills of the Certified Logistics Technician and covers the ability to compare and select the most appropriate transportation methods based on factors like cost, speed, and the nature of the freight being moved.</li> </ul>
トピック 9	<ul style="list-style-type: none"> <li>• Dispatch and Tracking Operations: This section of the exam measures skills of the Certified Logistics Technician and covers the procedures for organizing shipments, coordinating carriers, and monitoring the progress of goods in transit until they reach their destination.</li> </ul>
トピック 10	<ul style="list-style-type: none"> <li>• Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.</li> </ul>
トピック 11	<ul style="list-style-type: none"> <li>• Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.</li> </ul>
トピック 12	<ul style="list-style-type: none"> <li>• Teamwork and Good Workplace Conduct to Solve Problems: This section of the exam measures skills of the Certified Logistics Associate and covers the professional behaviors and collaborative techniques needed to work effectively with colleagues and resolve common operational issues as a team.</li> </ul>
トピック 13	<ul style="list-style-type: none"> <li>• Safety Principles: This section of the exam measures skills of the Certified Logistics Associate and covers essential workplace safety guidelines and procedures needed to maintain a secure working environment and prevent common injuries.</li> </ul>
トピック 14	<ul style="list-style-type: none"> <li>• Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.</li> </ul>
トピック 15	<ul style="list-style-type: none"> <li>• The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.</li> </ul>

## MSSC Certified Logistics Technician (CLT) 4.0 認定 CLT 試験問題 (Q82-Q87):

### 質問 # 82

Which transportation mode is typically used for low-weight, high-value products such as electronics and jewelry?

- A. Air
- B. Rail
- C. Water
- D. Truck

正解: A

解説:

Air transportation provides the fastest transit times and highest security, making it the preferred mode for low-weight, high-value, and time-sensitive products like electronics, pharmaceuticals, or jewelry. According to CLT 4.0, air freight is ideal when delivery speed outweighs cost concerns, as it minimizes exposure to loss or damage through reduced handling and transit duration. However, air is also the most expensive per-unit cost mode, limited by size and weight constraints. Air shipments typically integrate with just-in-time (JIT) and lean supply chains where quick replenishment is vital. Trucking often handles short-haul distribution; water offers low cost but slow speed; and rail suits heavy, bulk freight. Hence, CLT stresses selecting modes based on balancing cost, time, value density, and customer service needs.

質問 # 83

One of the functions during the receiving process is to

- A. determine the inbound shipping carrier
- B. match the packing list to the invoice
- C. match the packing list quantity to the purchase order
- D. determine the amount of material to be purchased

正解: C

解説:

The CLT "Receive products" activities require verifying shipments against ordering documents. The packing list (or ASN detail) is checked against the purchase order to confirm that the items, quantities, and units of measure received match what was ordered and authorized. This verification step underpins inventory and financial accuracy and precedes acceptance, staging, and putaway. Matching a packing list to an invoice is an accounting three-way match task, not a receiving floor responsibility. Selecting carriers or determining how much to purchase are procurement/transport decisions made before arrival. By aligning received quantities with the PO, the warehouse ensures correct receipts, initiates discrepancy handling for shortages/overages, and updates inventory records accordingly.

質問 # 84

Which inventory control method supports the production or manufacturing principle that calls for producing the necessary units in the necessary quantities at the necessary time?

- A. ABC inventory control
- B. Just-In-Time inventory control
- C. FIFO inventory control
- D. LIFO inventory control

正解: B

解説:

Just-In-Time (JIT) is a lean manufacturing and inventory control principle emphasizing that materials should arrive or be produced exactly when needed, in the required quantities, without maintaining excessive inventory. The CLT "Inventory Control" module identifies JIT as a critical concept for efficiency and waste reduction in both manufacturing and logistics. JIT minimizes storage costs, reduces obsolescence, and ensures cash flow efficiency. It requires highly reliable suppliers, accurate demand forecasting, and synchronized production and delivery schedules. Unlike FIFO or LIFO, which determine material flow order, JIT focuses on timing and responsiveness. CLT stresses that logistics professionals must ensure tight coordination between production planning, suppliers, and transportation systems to maintain smooth flow while minimizing inventory levels. Proper JIT implementation enhances quality, reduces lead times, and supports continuous improvement within the supply chain.

質問 # 85

Which of the following containers is typically used to transport and store liquids and powdered or granulated goods in bulk?

- A. drums and barrels
- B. corrugated paper containers
- C. wire mesh containers
- D. military crates

正解: A

解説:

The Packaging and Shipment competency in CLT highlights that certain materials-particularly liquids, chemicals, and powdered or granulated bulk goods-require sealed containment to prevent leakage, contamination, or evaporation. Drums and barrels (metal, plastic, or fiber) meet these requirements because they provide durable, sealed storage and easy handling via pallet jacks or drum clamps. Corrugated containers lack liquid containment strength, and wire mesh containers are ventilated for solid goods. Using proper packaging ensures regulatory compliance for hazardous or sensitive materials and preserves product quality during transport and storage.

質問 # 86

During the receiving process, after the materials are staged, all of the following are completed by the material handler EXCEPT

- A. check the materials against the order and Bill of Lading
- B. perform housekeeping in the staging area
- C. inspect material for damage
- D. check quantities

正解: B

解説:

The CLT "Product Receiving" activities outline that after materials are staged, handlers verify shipment accuracy, quantity, and condition against the purchase order and Bill of Lading. Inspection ensures quality control and discrepancy identification. While housekeeping is important for safety, it is not a functional step in the receiving verification process. The purpose of staging is to separate materials by order or destination, allowing organized inspection and documentation. CLT emphasizes accuracy and documentation at this stage, as errors during receiving propagate through the inventory system. Housekeeping tasks occur after receiving completion to maintain workplace order but are not part of the inspection checklist.

質問 # 87
