

Dumps JN0-253 Cost & JN0-253 Braindumps Pdf

BONUS!!! Download part of Exams4Collection JN0-253 dumps for free: https://drive.google.com/open?id=1Et_5Z6zaKcSUmYJ_UTjMQ-hXG5HtVNw

You can get 365 days of free JN0-253 real dumps updates and free demos. Save your time and money. Start Juniper JN0-253 exam preparation with JN0-253 actual dumps. Our firm provides real, up-to-date, and expert-verified Mist AI, Associate (JNCIA-MistAI) JN0-253 Exam Questions. We make certain that consumers pass the Mist AI, Associate (JNCIA-MistAI) JN0-253 certification exam on their first attempt. Furthermore, we want you to trust the Mist AI, Associate (JNCIA-MistAI) JN0-253 practice questions that we created.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
Topic 2	Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

Topic 3	• Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.
Topic 4	• Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 5	• Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.

Unmatched JN0-253 Learning Prep shows high-efficient Exam Brain Dumps - Exams4Collection

After you enter the examination room and get the exam paper, you must be sighed that the gold content of our JN0-253 learning guide is too high. Our JN0-253 study materials are really magic weapon for you to quickly pass the exam. Just come and buy our JN0-253 Exam Questions, then you can pass the exam by 100% success guarantee after you prapare with them for 20 to 30 hours. This data is created by our loyal customers who had bought our JN0-253 training engine and passed the exam.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which two statements correctly describe Mist claim codes and activation codes? (Choose two.)

- A. Claim codes may be used to claim only one AP.
- B. Activation codes may be used to claim multiple APs at once.
- C. Claim codes may be used to claim multiple APs at once.
- D. An activation code is printed on a sticker on the AP.

Answer: A,B

Explanation:

Claim Codes: Claim codes are unique to each AP and can be used to claim only one AP at a time. This ensures each device is correctly registered and managed individually within the Mist system.

Activation Codes: Activation codes can be used to claim multiple APs at once, facilitating bulk onboarding and simplifying the setup process for large deployments.

NEW QUESTION # 59

Which language is used to execute Marvis queries in the Mist UI?

- A. Python
- B. Structured Query Language (SQL)
- C. C++
- D. Natural Language

Answer: D

Explanation:

Understanding Marvis Queries:

Marvis is the AI-driven virtual network assistant in Mist that helps with queries and troubleshooting.

Language Used for Queries:

Natural Language: Marvis is designed to understand and respond to natural language queries, making it user-friendly.

Python, C++, SQL: These are programming and query languages not used directly for Marvis queries.

NEW QUESTION # 60

In Juniper Mist, which three devices send data to the Juniper Mist Cloud? (Choose three.)

- A. Syslog Server
- B. RADIUS Server
- C. Session Smart Router
- D. Access Point
- E. Juniper Mist Edge

Answer: C,D,E

Explanation:

In the Juniper Mist Cloud architecture, data is collected and streamed from various edge devices to the Mist Cloud platform, where AI-driven analytics, automation, and telemetry correlation occur. Only Mist-managed devices that are cloud-connected contribute operational telemetry data to Mist AI for analysis.

According to the Juniper Mist Cloud Architecture and Operations Guide:

"Access Points, Juniper Mist Edge devices, and Session Smart Routers (SSR) communicate directly with the Mist Cloud, sending telemetry, configuration, and analytics data in real time."

* Access Points (B): Provide wireless client telemetry, RF statistics, and user SLE (Service Level Expectation) data.

* Session Smart Routers (C): Supply WAN Assurance and routing analytics, including path and session health data.

* Juniper Mist Edge (D): Acts as an on-premises gateway that forwards data and enables local breakout for Mist Cloud services.

Syslog Servers and RADIUS Servers are external systems and do not send native telemetry to the Mist Cloud—they only interact through authentication or logging integrations.

NEW QUESTION # 61

You want to determine where you have coverage issues in your network using Marvis Actions.

Which Marvis Action category should you use in this situation?

- A. AP
- B. Application
- C. Connectivity
- D. Clients

Answer: A

NEW QUESTION # 62

What are two solutions that Juniper Mist Location Services provide? (Choose two.)

- A. wayfinding
- B. asset location
- C. geofencing
- D. GPS location

Answer: A,B

Explanation:

Juniper Mist Location Services provide asset location and wayfinding. According to official Juniper documentation: "Juniper Mist provides location accuracy for wayfinding, asset visibility, and user engagement," leveraging cloud-native vBLE and Wi-Fi technologies.

* Asset location enables organizations to locate high-value resources, personnel, or IoT devices in real time with rich analytics, making it easy to find assets and people using the Mist dashboard and APIs.

* Wayfinding gives users turn-by-turn indoor navigation and mapping via mobile SDKs and the Mist cloud. While geofencing can be achieved as part of location-based engagement features, it is not listed as a primary Mist Location Service solution. GPS location is not directly supported; Mist Location Services operate indoors using Wi-Fi and BLE signals, not satellite GPS.
