あなたのIT領域での能力を証明したいのですか。もっと多くの認可と就職機会を貰いたいのですか。CIPSのL5M10試験はあなたの必要のある証明です。IT業界でのほとんどの人はCIPSのL5M10試験の重要性を知っています。だれでもエネルギーは限られていますから、短い時間でCIPSのL5M10試験に合格したいなら、我々Pass4Testの提供するソフトはあなたを助けることができます。豊富な問題と分析で作るソフトであなたはCIPSのL5M10試験に合格することができます。

CIPS L5M10 認定試験の出題範囲：

トピック	出題範囲

トピック 1	<ul style="list-style-type: none"> • Analyse the Role and Activities of Logistics Management: This section of the exam measures the skills of Logistics Managers and covers the essential concepts, functions, and strategic importance of logistics within modern supply chains. It explains what logistics is, how its key elements work together—such as transportation, warehousing, inventory, packaging, information flow, and security—and how these components support procurement, production, distribution, after-sales processes, and product disposal. The section explores how logistics integrates with broader supply chain management and introduces the idea of total logistics and total cost thinking, showing how multimodal transport and pipeline inventory contribute to efficiency. Candidates must understand how logistics creates competitive advantage by aligning operations with business strategy, managing customer service levels, measuring service quality, and recognizing its financial impact. This heading also evaluates the increasing role of technology in logistics, including barcoding, RFID, e-fulfilment systems, warehouse management systems, automated data capture, and the integration of digital tools across the logistics network.
トピック 2	<ul style="list-style-type: none"> • Understand Capacity Planning and Control in Logistics Management: This section of the exam measures the skills of Operations Planners and focuses on the techniques and systems used to manage capacity, demand, and resource planning across logistics activities. It explains how organizations balance planning with real-time control, adjust to fluctuating demand, and schedule workloads effectively. Candidates are expected to understand capacity concepts, constraints, demand forecasting, capacity measurement, and different planning approaches such as level planning, chase demand strategies, and demand management methods. The section also examines the use of technology in capacity planning, particularly Materials Requirements Planning (MRP), MRP II, ERP systems, master production scheduling, inventory data, and bills of materials, while recognizing the limitations of these tools. Finally, it covers the role of reverse logistics, emphasizing the handling of customer returns, the development of return policies, and how returned items are reintegrated into the supply chain.

CIPS Logistics Management 認定 L5M10 試験問題 (Q40-Q45):

質問 # 40

Strategic planning is long-term planning, usually over 5-10 years in the future. Is this sentence correct?

- A. Yes - the longer the strategic plan, the less detail it will include
- B. No - long-term plans are tactical rather than strategic
- C. Yes - strategic plans have more detail than short-term plans
- D. No - strategic plans detail the objectives of the organisation over the upcoming year

正解: A

解説:

Comprehensive and Detailed Explanation From Exact Extract:

Strategy deals with long-term direction and typically contains broad objectives with lower detail; tactical (mid-term) and operational (short-term) plans add specificity and detail. Therefore, longer-horizon strategic plans contain less operational detail than short-term plans. (Reference: CIPS L5M10 Study Guide, Planning horizons-strategic/tactical/operational, pp. 99-100)

質問 # 41

Dasap Group Ltd has hired a third-party logistics organisation (3PL) to manage some aspects of their business. Which of the following business functions would you expect a 3PL company to manage on behalf of Dasap Group Ltd? Select THREE.

- A. Manage the delivery of items through a transport fleet
- B. Management of the receipt of customer orders

- C. Operation of the distribution centre
- D. Management of customer complaints
- E. Production of sales reports

正解: A、B、C

解説:

Comprehensive and Detailed Explanation From Exact Extract:

A3PL (Third-Party Logistics) provider can manage operational logistics functions such as order receipt and processing, distribution centre operations, and transport management (fleet, routing, delivery). Customer complaints and sales reports remain the client's responsibility.

(Reference: CIPS L5M10 Study Guide, Outsourced logistics and 3PL services, p. 33)

質問 # 42

A Transport Management System (TMS) comprises several functions. Which of the following is NOT one of these?

- A. Transport execution
- B. Measurement and reporting
- C. Planning and decision-making
- D. Fleet maintenance

正解: D

解説:

Comprehensive and Detailed Explanation From Exact Extract:

Core TMS functions typically include: planning & decision-making (e.g., carrier/route selection), transport execution (e.g., tendering, dispatch), transport follow-up/visibility, and measurement & reporting (KPIs).

Fleet maintenance is generally a separate fleet/asset management function, not a standard TMS core function.

(Reference: CIPS L5M10 Study Guide, TMS functions, p. 91)

質問 # 43

Which of the following are types of Auto-Identification and Data Capture (AIDC) technology used in logistics? Select THREE

- A. Smartphones
- B. Voice recognition
- C. Electronic data interchange
- D. Biometrics
- E. Barcodes

正解: B、D、E

解説:

Comprehensive and Detailed Explanation From Exact Extract:

AIDC encompasses technologies that automatically identify items and capture data with minimal human intervention. Examples include barcodes/QR, RFID, biometrics, magnetic stripes, and voice recognition.

Smartphones are devices that may host AIDC apps but are not a technology class themselves; EDI is a system-to-system messaging standard, not AIDC. (Reference: CIPS L5M10 Study Guide, AIDC overview and examples, p. 83)

質問 # 44

Which of the following is a type of 2D barcode that can hold large amounts of data and is commonly used by airlines for boarding passes?

- A. PDF417
- B. UPC
- C. QR Code
- D. Codabar

正解: A
