# PL-400 Exam Study Guide & PL-400 New Dumps Files

P.S. Free & New PL-400 dumps are available on Google Drive shared by SureTorrent: https://drive.google.com/open?id=1CFb4J9TgI0vWaBAVIbdDc1b8z1uq0ZI8

In order to serve you better, we have a complete system for you. We offer you free demo for PL-400 exam braindumps, and we recommend you have a try before buying. If you are quite satisfied with the free demo and want the complete version, you just need to add to cart and pay for it. You will receive the downloading link and password for PL-400 Exam Dumps within ten minutes, if you don't receive, you can contact with us, and we will solve this problem for you. We offer you free update for one year for PL-400 exam dumps after payment, so that you can obtain the latest information for the exam, and the latest information will be sent to you automatically.

Concluding Words

Now you understand that PL-400 Exam is what any Microsoft Power Platform developer should pass to improve industry presence. One way or another, it will help you get Microsoft Certified: Power Platform Developer Associate certified and proves that you are worthy of your desired position and pay raise. However, it requires in-depth knowledge and broad experience to write the test on the first try.

Know that there are many tools available to you for quality preparation. Use them and move toward your goal!

Free PDF Quiz 2026 Authoritative Microsoft PL-400 Exam Study Guide

Our PL-400 qualification test closely follow changes in the exam outline and practice. In order to provide effective help to customers, on the one hand, the problems of our PL-400 test guides are designed fitting to the latest and basic knowledge. For difficult knowledge, we will use examples and chart to help you learn better. On the other hand, our PL-400 test guides also focus on key knowledge and points that are difficult to understand to help customers better absorb knowledge. Only when you personally experience our PL-400 qualification test can you better feel the benefits of our products. Join us soon.

Microsoft Power Platform Developer Sample Questions (Q268-Q273):

NEW QUESTION # 268
You are designing an integration between Dataverse and an external application. The external application processes thousands of records per day.
Record processing volumes vary throughout the day. Extremely high processing volumes may occur and may exceed the Dataverse service protection API limits.
You need to implement each service protection limit that is enforced.
Which implementations should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Service Protection Limit	Implementation
Number of requests	Number per user over a sliding window of time
	Number per environment over a sliding window of time
	Number per user per 24-hour period
	Number per environment per 24-hour period
Combined execution time	Combined time per user over a sliding window of time
	Combined time per user over a fixed window of time
	Combined time per environment over a sliding window of time
	Combined time per environment over a fixed window of time
Concurrent requests	Fixed number per user
	Fixed number per tenant
	Fixed number per application
	Fixed number per environment

Answer:

Explanation:

Service Protection Limit	Implementation
Number of requests	▼
	Number per user over a sliding window of time
	Number per environment over a sliding window of time
	Number per user per 24-hour period
	Number per environment per 24-hour period
Combined execution time	▼
	Combined time per user over a sliding window of time
	Combined time per user over a fixed window of time
	Combined time per environment over a sliding window of time
	Combined time per environment over a fixed window of time
Concurrent requests	▼
	Fixed number per user
	Fixed number per tenant
	Fixed number per application
	Fixed number per environment

Explanation

Box 1: Number per user over a sliding window of time

Service protection API limits are enforced based on three facets:

The number of requests sent by a user.

The combined execution time required to process requests sent by a user.

The number of concurrent requests sent by a user.

The following table describes the default service protection API limits enforced per web server:

Measure	Description	Limit per web server
Number of requests	The cumulative number of requests made by the user.	6000 within the 5 minute sliding window
Execution time	The combined execution time of all requests made by the user.	20 minutes (1200 seconds) within the 5 minute sliding window
Number of concurrent requests	The number of concurrent requests made by the user	52

Box 2: Combined time per user over a sliding window of time

Box 3: Fixed number per user

NEW QUESTION # 269

An online store has a custom web page that allows customers to place their orders against a Microsoft Dataverse database that uses custom products. The custom web page uses Web API patterns to create and update records.

Customers report that orders can be placed for out-of-stock items.

You need to update the page code to ensure that inventory is available before confirming an order.

Which pattern should you use for each step? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Box 1: IsOptimisticConcurrencyEnabled
On a multi-threaded and multi-user system like Power Apps, operations and data changes often happen in parallel. A problem arises when two or more update or delete operations on the same piece of data happen at the same time. This situation could potentially result in data loss. The optimistic concurrency feature provides the ability for your applications to detect whether a table record has changed on the server in the time between when your application retrieved the record and when it tries to update or delete that record.
Box 2: If-Match: Etag
Use If-Match and If-None-Match headers with ETag values to check whether the current version of a resource matches the one last retrieved, matches any previous version or matches no version. These comparisons form the basis of conditional operation support. Dataverse provides ETags to support conditional retrievals, optimistic concurrency, and limited upsert operations.

NEW QUESTION # 270
You need to assign the minimum environment security role to the appropriate users.
Which security roles should you use? To answer, drag the appropriate security roles to the correct users. Each security role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 271
You need to configure the address verification API.
Which values should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Property	Value
Address validation message	▼
	Update
	Execute
	northwind_ValidateAddress
Execution mode	▼
	Synchronous
	Asynchronous
	Post-Operation

NEW QUESTION # 272

You create a custom API. You define the API as a function.

The custom API does not appear in the response received from https:/ [yourorg]. api.crm.dynamics.com/api /data/v9.2/$metadata and returns an error when called.

You need to identify why the custom API is not working.

What should you do?

- **A. Add a request property to the custom API.**
- B. Set the Enabled for Workflow option of the customer API to True.
- C. Set the Is Private property of the custom API to False.
- D. Add a response property to the custom API.

Answer: A

NEW QUESTION # 273

......

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. We provide timely and free update for you to get more PL-400 Questions torrent and follow the latest trend. The PL-400 exam torrent is compiled by the experienced professionals and of great value.
