最有效的最新C_TS470_2412題庫資訊 & SAP C_TS470_2412考試證照： SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service確保通過

NewDumps的專業及高品質的產品是提供IT認證資料的行業佼佼者，選擇了NewDumps就是選擇了成功，NewDumps SAP的C_TS470_2412考試培訓資料是保證你通向成功的法寶，有了它你將取得優異的成績，並獲得認證，走向你的理想之地。

SAP C_TS470_2412 考試大綱：

主題	簡介
主題 1	Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.
主題 2	Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
主題 3	Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
主題 4	Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.

最新的 SAP Certified Associate C_TS470_2412 免費考試真題 (Q79-Q84):

問題 #79

What are examples of information contained in a maintenance item of a maintenance plan? Note: There are 3 correct answers to this question.

- A. Service contract item
- B. Object list
- C. Service interval
- D. Service order type
- E. Call horizon

答案： B,C,E

解題說明：

A maintenance item in a maintenance plan specifies details about the maintenance activity. The correct answers are:

- * Call horizon (A): Defines the lead time (as a percentage or days) before the planned date when the call object is generated.
- * Object list (B): Lists the technical objects (e.g., equipment, functional locations) subject to maintenance.
- * Service interval (E): Specifies the frequency or cycle (e.g., every 6 months) for the maintenance activity.
- * Service order type (C): This is defined at the maintenance plan level or call object, not the maintenance item.
- * Service contract item (D): This relates to contracts, not maintenance items directly.

"A maintenance item includes information such as the call horizon, object list, and service interval to define the scope and timing of maintenance activities."

問題 #80

Which of the following can be assigned to a serial number profile?

- A. Equipment category
- B. Stock determination strategy
- C. Equipment class

- D. Configuration profile

答案： A

解題說明：

A serial number profile in SAP S/4HANA defines how serial numbers are managed for materials or equipment. The correct answer is equipment category (C). Let's explore this deeply.

Serial Number Profile Purpose:

It controls serialization (e.g., mandatory entry, stock check) and links to objects like equipment or materials.

Why Equipment Category?

The equipment category (e.g., "M" for machines) determines the type of equipment created when a serialized material is installed or tracked. In customizing (SPRO # Plant Maintenance # Master Data # Technical Objects # Serial Number), the serial number profile is assigned to an equipment category to define how serial numbers generate equipment records (e.g., automatically upon goods receipt).

Why Not the Others?

- * Equipment class (A): Classes group equipment by characteristics, not assigned to serial profiles.
- * Configuration profile (B): This is for configurable products, unrelated to serial numbers.
- * Stock determination strategy (D): This controls stock selection, not serialization.

Example:

Serial profile "S001" is assigned to equipment category "M," ensuring that serialized pumps create equipment records of type "M."
"A serial number profile can be assigned to an equipment category to define the equipment type created for serialized objects."

問題 #81

Which cancellation information can you maintain on service contract item level? Note: There are 2 correct answers to this question.

- A. Cancelling party
- B. Reason
- C. Latest end date
- D. Billing block

答案： A,B

解題說明：

In SAP S/4HANA Service contracts (scope item 3MO), cancellation details at the item level include:

- * Cancelling party: Specifies who initiated the cancellation (e.g., customer or provider), maintained in the contract item data.
- * Reason: A cancellation reason (e.g., customer request) can be recorded for audit and reporting purposes.
- * Latest end date: Defined at the contract header or item validity level, not a cancellation-specific field.
- * Billing block: Applied to block billing but not a cancellation attribute. This is configured in the contract item settings. "Maintain cancelling party and reason at the service contract item level for cancellation tracking." (SAP Help Portal, Service Contract Management).

問題 #82

In the advanced execution scenario, what is the dynamic item processor profile used for? Note: There are 3 correct answers to this question.

- A. To combine billing documents into one customer invoice
- B. To bill a service as a list of subitems
- C. To summarize dynamic items into a single debit memo item
- D. To enable resource-related billing
- E. To determine the service confirmation items

答案： B,C,D

解題說明：

In the Service with Advanced Execution scenario (scope item 63Q), the dynamic item processor (DIP) profile is used for resource-related billing:

- * To summarize dynamic items into a single debit memo item: The DIP profile can aggregate confirmed resources (e.g., time, materials) into a single billing item.
- * To bill a service as a list of subitems: Alternatively, it can itemize resources as separate subitems for detailed billing.

- * To enable resource-related billing: The DIP profile processes dynamic data from confirmations (e.g., time, parts) to generate billing documents.
- * To determine the service confirmation items: This is part of confirmation, not the DIP profile's role.
- * To combine billing documents into one customer invoice: This is a billing process step, not a DIP function. The DIP profile is configured in Customizing under Sales and Distribution # Billing. "The dynamic item processor profile supports summarizing items, listing subitems, and enabling resource-related billing in advanced execution." (SAP Help Portal, Resource-Related Billing).

問題 #83

Which capability can proactively inform users about specific issues such as expiring contracts?

- A. Situation monitoring
- B. Issue handling
- C. Situation handling
- D. Issue monitoring

答案：A

解題說明：

SAP S/4HANA Cloud Private Edition, Service provides capabilities to proactively manage and notify users about critical events, such as expiring contracts. The correct feature is:

* Situation monitoring: This capability uses predefined rules and thresholds to detect situations (e.g., a contract nearing its expiration date) and proactively notifies relevant users via alerts or messages in SAP Fiori apps. It's part of the embedded analytics and service management overview, enabling real-time awareness of issues.

* Issue monitoring: This is a more general term and not a specific SAP capability for proactive notifications about contract expirations.

* Issue handling and Situation handling: These refer to reactive processes for addressing identified problems, not proactive notifications. Situation monitoring is a key feature in service contract management (scope item 3MO) and analytics, ensuring timely action on critical events. "Situation monitoring proactively informs users about critical situations, such as expiring service contracts, through real-time alerts." (SAP S/4HANA Service, Analytical Applications).

問題 #84

.....

想通過學習SAP的C_TS470_2412認證考試的相關知識來提高自己的技能，讓別人更加認可你嗎？SAP的考試可以讓你更好地提升你自己。如果你取得了C_TS470_2412認證考試的資格，那麼你就可以更好地完成你的工作。雖然這個考試很難，但是你準備考試時不用那麼辛苦。使用NewDumps的C_TS470_2412考古題以後你不僅可以一次輕鬆通過考試，還可以掌握考試要求的技能。
