最新的 Oracle Cloud Infrastructure 1Z0-1114-25 免費考試真題 (Q14-Q19):

問題 #14

Which is the correct sequence of steps in the Design process?

- A. Understand the statement, articulate the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- **B. Understand the problem, articulate the vision, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world**
- C. Articulate the vision, identify the Redwood Page templates, understand the problem, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- D. Articulate the vision, understand the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world

答案: B

解題說明:

Full Detailed in Depth Explanation:

The Redwood design process, as outlined in Oracle's Redwood documentation, follows a structured approach to ensure a user-centered and iterative design. The correct sequence starts with "Understand the problem" (to define the challenge), followed by "Articulate the vision" (to set goals), "Identify the Redwood Page templates to use" (to select appropriate patterns), "Add the detail and refine the design" (to iterate), "Specify the design for development" (to hand off to developers), and "Monitor engagement in the real world" (to evaluate post-launch). Option D reflects this logical flow. Option A reverses the initial steps, Option B uses incorrect terminology ("Understand the statement"), and Option C misorders understanding the problem after template selection, which disrupts the process.

問題 #15

What happens when you create a new AppUI Oracle Application Extension in VB Studio?

- A. The extension overwrites an existing page in Fusion Applications
- B. The extension is deployed to the Fusion Apps database
- C. The extension is deployed on a stand-alone Visual Builder instance
- D. The extension is deployed on the Fusion Application instance
- **E. None (Explanation below)**

答案: E

解題說明:

Full Detailed in Depth Explanation:

Creating an AppUI extension in VBS doesn't immediately deploy it (A, B, C) or overwrite pages (D)-it sets up a workspace for development. Deployment occurs later via pipelines. None of the options accurately reflect this initial step.

問題 #16

You are planning to use the Dashboard Landing Page template for Key Performance Indicators (KPIs), and a dashboard grid with information visualizations that highlight and explain business performance. Which is a required property of oj-sp-dashboard-landing-page?

- A. Primary Action
- B. Page Subtitle
- C. In Flow Back
- **D. Page Title**

答案: D

解題說明:

Full Detailed in Depth Explanation:

The oj-sp-dashboard-landing-page is a Redwood component used to create dashboard-style pages in Oracle applications. According to the Redwood Pattern Book and component documentation, the Page Title (Option A) is a required property to define the dashboard's identity and purpose, ensuring clarity for users. Options B (Page Subtitle), C (In Flow Back), and D (Primary

Action) are optional: subtitles enhance context but aren't mandatory, "In Flow Back" relates to navigation flows (not required), and primary actions are configurable but not essential for the component's basic functionality.

問題 #17

You need to create a customer-facing portal to list products from Fusion Apps. What can you use to achieve this?

- A. An AppUI extension that has a vanity URL setup
- **B. A stand-alone Visual Builder instance hosting the app**
- C. An Oracle APEX app that is installed in the Fusion Cloud Apps database

答案: B

解題說明:

Full Detailed in Depth Explanation:

A stand-alone VB instance (B) can host a customer-facing portal with Fusion data via REST, supporting external access. AppUI extensions (A) are internal to Fusion, and APEX (C) isn't standard for this use case.

問題 #18

Which three patterns are used in the Redwood Reference App? (Choose three.)

- **A. Dashboard Landing Page**
- B. Data Grid Page
- C. Vertical Foldout
- **D. Smart Filter and Search**
- E. Welcome Page
- **F. Start Page**

答案: A,D,F

解題說明:

Full Detailed in Depth Explanation:

The Redwood Reference App showcases common patterns from the Redwood Pattern Book. Start Page (A) provides an entry point, Dashboard Landing Page (B) displays KPIs, and Smart Filter and Search (E) enable data filtering- all featured in the reference app. Vertical Foldout (C) and Welcome Page (D) are valid patterns but not highlighted in the reference app, while Data Grid Page (F) is a pattern but not a core focus of the reference app's design.
