Don't worry about channels to the best FCP_FMG_AD-7.4 study materials because we are the exactly best vendor in this field for more than ten years. And so many exam candidates admire our generosity of the FCP_FMG_AD-7.4 Practice Questions offering help for them. Up to now, no one has ever challenged our leading position of this area. With our FCP_FMG_AD-7.4 training guide, you will be doomed to pass the exam successfully.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q33-

Q38):

NEW QUESTION # 33

Exhibit.

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. An administrator can also lock the Local-FortiGate_root policy package.
- B. FortiManager is in workflow mode.
- C. The FortiManager ADOM is locked by the administrator.
- D. The FortiManager ADOM workspace mode is set to Normal

Answer: A,D

NEW QUESTION # 34

An administrator has assigned a global policy package to custom ADOM1. Then the administrator creates a new policy package. Fortinet. in the custom ADOM1. What happens to the Fortinet policy package when it is created?

- A. You can select the option to assign the global policies.
- B. The global policy package is automatically assigned.
- C. You must assign the global policy package from the global ADOM.
- D. You must reapply the global policy package to ADOM1.

Answer: B

Explanation:

When a new policy package is created in a custom ADOM (Administrative Domain) that already has a global policy package assigned to it, FortiManager automatically applies the global policies to the newly created policy package. This means that the global header and footer policies, which are part of the global policy package assigned to the ADOM, will be automatically included in the new policy package. This helps ensure consistency in policy enforcement across all policy packages within the ADOM and simplifies the management of common policies across different devices or sites managed within the same ADOM.

NEW QUESTION # 35

What will be the result of reverting to a previous revision version in the revision history?

- A. It will generate a new version ID and remove all other revision history versions.
- B. It will install configuration changes to managed device automatically.
- C. It will modify the device-level database.
- D. It will tag the device settings status as Auto-Update.

Answer: C

Explanation:

* Option C: It will modify the device-level database. This is correct. Reverting to a previous revision version in the revision history affects the device-level database by restoring it to the state saved in the selected revision. This ensures that any changes made after the selected revision are discarded, and the device configuration is returned to the earlier state.

Explanation of Incorrect Options:

* Option A: It will install configuration changes to managed devices automatically is incorrect because reverting a revision does not automatically push changes to the devices; it merely reverts the configuration on the FortiManager.

* Option B: It will tag the device settings status as Auto-Update is incorrect because "Auto-Update" is not a status related to the revision history mechanism.

* Option D: It will generate a new version ID and remove all other revision history versions is incorrect as reverting to a previous revision does not delete all other versions; it creates a new revision point for tracking.

FortiManager References:

* Refer to the "Revision Management" section in the FortiManager Administration Guide, which provides an overview of how revisions are managed and utilized for restoring configurations.

NEW QUESTION # 36

You are moving managed FortiGate devices from one ADOM to a new ADOM.
Which statement correctly describes the expected result?

- A. The shared policy package will not be moved to the new ADOM automatically.
- B. Policy packages will be imported into the new ADOM automatically.
- C. Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- D. The shared device settings will be installed automatically.

Answer: A

Explanation:

When you move devices from one ADOM to another ADOM, shared policy packages and objects do not move to the new ADOM. You will need to import policy packages from managed devices.

NEW QUESTION # 37

Refer to the exhibit. In the event that the monitored interface for the primary FortiManager device fails, which action must you perform to return FortiManager high availability (HA) to a working state?

FortiManager cluster settings

The screenshot displays the FortiManager web interface for Cluster Settings. The left sidebar shows the navigation menu with 'System Settings' expanded and 'HA' selected. The main content area is titled 'Cluster Settings' and shows the following configuration:

- Foalover Mode:** Manual (selected), VRRP
- Operation Mode:** Standalone (selected), Primary, Secondary
- Peer IP and Peer SN:** A table with columns for IP Type, Peer IP, Peer SN, and Action. The first row shows IPv4, 10.0.1.242, FMG-VM0A169, and delete/add icons.
- Cluster ID:** 1 (range 1-64)
- Group Password:** (empty field)
- File Quota:** 4096 MB (range 2048-20480)
- Heart Beat Interval:** 10 Seconds
- Foalover Threshold:** 30 (range 1-255)
- VIP:** 10.0.1.245
- VRRP Interface:** port2
- Priority:** 1 (range 1-253)
- Unicast:** Disabled (toggle)
- Monitored IP:** A table with columns for IP, Interface, and Action. The first row shows 10.0.1.241, port2, and delete/add icons.
- Download Debug Log:** Download button

- A. The FortiManager HA failover is transparent to administrators and does not require any additional action.
- B. Manually promote one of the working secondary devices to the primary role, and reboot the old primary device to remove the peer IP address of the failed device.
- C. Reconfigure the primary device to remove the peer IP address of the failed device from its configuration.
- D. Reboot the current primary device to force a secondary device to become the new primary.

Answer: A

Explanation:

No action is required because of VRRP activated on the HA configuration. The Failover will occur automatically once the monitored interface is lost.

NEW QUESTION # 38

.....

Our FCP_FMG_AD-7.4 preparation materials are willing to give you some help if you want to be better in your daily job and get a promotion on matter on the salary or on the position.
