Exam AI-102 Price & Reliable AI-102 Learning Materials

Our Microsoft AI-102 web-based practice exam software also simulates the Designing and Implementing a Microsoft Azure AI Solution (AI-102) environment. These Microsoft AI-102 mock exams are also customizable to change the settings so that you can practice according to your preparation needs. DumpsKing web-based AI-102 Practice Exam software is usable only with a good internet connection.

Microsoft AI-102 exam measures the candidate's ability to design and implement AI solutions that meet business requirements. It covers a wide range of topics, such as data preprocessing, feature engineering, model training, model deployment, and monitoring. Candidates should have a good understanding of machine learning algorithms, programming languages such as Python and R, and Azure services such as Azure Storage, Azure Kubernetes Service, and Azure Functions.

If you are looking to demonstrate your skills in designing and implementing Microsoft Azure AI solutions, then the Microsoft AI-102: Designing and Implementing a Microsoft Azure AI Solution exam is the right choice for you. AI-102 Exam covers all the essential topics related to designing and implementing AI solutions using Azure services and tools. Passing AI-102 exam will help you earn the

Microsoft Certified: Azure AI Engineer Associate certification, which is highly valued by employers and recognized globally.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q238-Q243):

NEW QUESTION # 238
You are developing the smart e-commerce project.
You need to implement autocompletion as part of the Cognitive Search solution.
Which three actions should you perform? Each correct answer presents part of the solution. (Choose three.) NOTE: Each correct selection is worth one point.

- A. Add a suggester for each of the three product name fields.
- B. Make API queries to the search endpoint and include the product name fields in the searchFields query parameter.
- C. Set the analyzer property for the three product name variants.
- D. Add a suggester that has the three product name fields as source fields.
- E. Make API queries to the autocomplete endpoint and include suggesterName in the body.
- F. Set the searchAnalyzer property for the three product name variants.
- G. Use the default standard Lucene analyzer ("analyzer": null) or a language analyzer (for example, "analyzer": "en.Microsoft") on the field.

Answer: C,D,E

Explanation:
Scenario: Support autocompletion and autosuggestion based on all product name variants.
Call a suggester-enabled query, in the form of a Suggestion request or Autocomplete request, using an API. API usage is illustrated in the following call to the Autocomplete REST API.
POST /indexes/myxboxgames/docs/autocomplete?search&api-version=2020-06-30
{
"search": "minecraf",
"suggesterName": "sg"
}
In Azure Cognitive Search, typeahead or "search-as-you-type" is enabled through a suggester. A suggester provides a list of fields that undergo additional tokenization, generating prefix sequences to support matches on partial terms. For example, a suggester that includes a City field with a value for "Seattle" will have prefix combinations of "sea", "seat", "seatt", and "seattl" to support typeahead.

Topic 2, Contoso, Ltd.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab. note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
General Overview
Contoso, Ltd. is an international accounting company that has offices in France. Portugal, and the United Kingdom. Contoso has a professional services department that contains the roles shown in the following table.
Infrastructure
Contoso has the following subscriptions:
* Azure
* Microsoft 365
* Microsoft Dynamics 365
Azure Active (Azure AD) Directory
Contoso has Azure Active Directory groups for securing role-based access. The company uses the following group naming conventions:
* ICountryJ-[Levell-[Role]
* [Level]-[Role]
Intellectual Property
Contoso has the intellectual property shown in the following table.
Text-based content is provided only in one language and is not translated.
Planned Projects

Contoso plans to develop the following:
* A document processing workflow to extract information automatically from PDFs and images of financial documents
* A customer-support chatbot that will answer questions by using FAQs
* A searchable knowledgebase of all the intellectual property
Technical Requirements
Contoso identifies the following technical requirements:
* All content must be approved before being published.
* All planned projects must support English, French, and Portuguese.
* All content must be secured by using role-based access control (RBAC).
* RBAC role assignments must use the principle of least privilege.
* RBAC roles must be assigned only to Azure Active Directory groups.
* AI solution responses must have a confidence score that is equal to or greater than 70 percent.
* When the response confidence score of an AI response is lower than 70 percent, the response must be improved by human input.
Chatbot Requirements
Contoso identifies the following requirements for the chatbot:
* Provide customers with answers to the FAQs.
* Ensure that the customers can chat to a customer service agent.
* Ensure that the members of a group named Management-Accountants can approve the FAQs.
* Ensure that the members of a group named Consultant-Accountants can create and amend the FAQs.
* Ensure that the members of a group named the Agent-CustomerServices can browse the FAQs.
* Ensure that access to the customer service agents is managed by using Omnichannel for Customer Service.
* When the response confidence score is low. ensure that the chatbot can provide other response options to the customers.
Document Processing Requirements
Contoso identifies the following requirements for document processing:
* The document processing solution must be able to process standardized financial documents that have the following characteristics:
* Contain fewer than 20 pages.
* Be formatted as PDF or JPEG files.
* Have a distinct standard for each office.
* The document processing solution must be able to extract tables and text from the financial documents.
* The document processing solution must be able to extract information from receipt images.
* Members of a group named Management-Bookkeeper must define how to extract tables from the financial documents.
* Members of a group named Consultant-Bookkeeper must be able to process the financial documents.
Knowledgebase Requirements
Contoso identifies the following requirements for the knowledgebase:
* Supports searches for equivalent terms
* Can transcribe jargon with high accuracy
* Can search content in different formats, including video
* Provides relevant links to external resources for further research

NEW QUESTION # 239
Match the Azure services to the appropriate locations in the architecture.
To answer, drag the appropriate service from the column on the left to its location on the right. Each service may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

Answer:

Explanation:

NEW QUESTION # 240
You are developing a text processing solution.
You develop the following method.
You call the method by using the following code.
GetKeyPhrases(textAnalyticsClient, "the cat sat on the mat");
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/cognitive-services/text-analytics/how-tos/text-analytics-how-to-keyword-extraction

NEW QUESTION # 241
You have an Azure Cognitive Search resource named Search 1 that is used by multiple apps You need to secure Search 1. The solution must meet the following requirements:
* Prevent access to Search1 from the internet.
* Limit the access of each app to specific queries
What should you do? To answer, select the appropriate options in the answer area NOTE Each correct answer is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 242
You plan to build a chatbot to support task tracking.
You create a Conversational Language Understanding service named Iu1.
You need to build a Conversational Language Understanding model to Integrate into the chatbot. The solution must minimize development time to build the model.
Which four actions should you perform In sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Add a new application.
2 - Add example utterances.
3 - Train the application.
4 - Publish teh application.

NEW QUESTION # 243
......

Microsoft AI-102 exam materials are successful with high efficiency and high quality to navigate you throughout the process. If you pay attention to using our AI-102 practice engine, thing will be solved easily. We have favorable quality reputation in the mind of exam candidates these years by trying to provide high quality Designing and Implementing a Microsoft Azure AI Solution AI-102 Study Guide with the lowest prices while the highest quality.
