

Exam Discount CTFL-UT Voucher, Testking CTFL-UT Learning Materials

What's more, part of that Itcerttest CTFL-UT dumps now are free: <https://drive.google.com/open?id=1qM1WQvnyTL12C0nrVluVUbGs7PzvCDE1>

You may doubt about such an amazing data, which is unimaginable in this industry. But our CTFL-UT exam questions have made it. You can imagine how much efforts we put into and how much we attach importance to the performance of our CTFL-UT study materials. We use the 99% pass rate to prove that our CTFL-UT practice materials have the power to help you go through the exam and achieve your dream. Most candidates show their passion on our CTFL-UT guide materials, because we guarantee all of the customers that you will pass for sure with our CTFL-UT exam questions.

The CTFL-UT exam is an entry-level certification that is suitable for anyone who is interested in usability testing. It is also suitable for professionals who are looking to enhance their skills in this area. ISTQB Certified Tester-Foundation Level - Usability Testing certification is recognized globally, and it is a valuable addition to any software testing professional's resume. CTFL-UT exam is conducted online, and candidates can take it from anywhere in the world. CTFL-UT exam has a multiple-choice format, and candidates are required to answer 40 questions in 60 minutes.

The CTFL-UT Exam covers a wide range of topics, including usability testing planning, designing and conducting usability tests, analyzing and interpreting test results, and reporting usability test findings. It also covers important concepts such as user experience, usability heuristics, and accessibility testing. CTFL-UT exam is designed for individuals who have a basic understanding of software testing and wish to specialize in usability testing.

Testking CTFL-UT Learning Materials & CTFL-UT Latest Practice Materials

Since One of the significant factors to judge whether one is competent or not is his or her CTFL-UT certificates. So to get CTFL-UT real exam and pass the CTFL-UT exam is important. Generally speaking, certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our CTFL-UT practice materials can satisfy your demands if you are now in preparation for a certificate. We will be your best friend to help you achieve success!

ISQI ISTQB Certified Tester-Foundation Level - Usability Testing Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which of the following is the highest WCAG conformance level, promising the most accessible content?

- A. Double A (AA)
- **B. Triple A (AAA)**
- C. Single A (A)
- D. Quadruple A (AAAA)

Answer: B

Explanation:

The Web Content Accessibility Guidelines (WCAG) define three levels of conformance for web content accessibility:

Level A (Single A) is the minimum level of compliance.

Level AA (Double A) is the standard recommended for most websites, balancing accessibility and design.

Level AAA (Triple A) is the highest and most comprehensive level of accessibility, covering the widest range of needs.

There is no such level as "Quadruple A (AAAA)," making option D invalid.

Thus, WCAG Triple A (AAA) promises the most accessible content, even though it may not always be practically achievable for all types of content.

#####

NEW QUESTION # 12

Which of the following elements are addressed by the WCAG?

- i. Resizability of text
- ii. Visually appealing design
- iii. Text alternatives
- iv. Keyboard accessibility
- v. Mouse input

- A. i, ii, & iii are true, iv & v are false
- B. i & iii are true, ii, iv & v are false
- C. iv & v are true, i, ii & iii are false
- **D. i, iii, iv & v are true, ii is false**

Answer: D

Explanation:

The Web Content Accessibility Guidelines (WCAG) provide standards to ensure websites are accessible to people with disabilities.

They specifically address:

- i. Text resizing (SC 1.4.4),
- iii. Text alternatives for non-text content (SC 1.1.1),
- iv. Keyboard accessibility (SC 2.1.1),
- v. Device independence, which includes not relying solely on mouse input.

Visually appealing design (ii) is not an accessibility requirement and is thus not a WCAG focus. The correct answer is D: i, iii, iv & v are true; ii is false.

#####

NEW QUESTION # 13

Why are positive usability findings of high importance? Which of the following statements is wrong?

- A. Positive findings are of high importance because they can be used in the report to justify the costs of the test.
- B. Positive usability findings should be used to communicate to the development team which features should not be modified or deleted.
- C. Positive usability findings allow a better view of the usability of the product.
- D. Positive usability findings make it easier to sell the need for correcting usability problems by giving a balanced view.

Answer: A

Explanation:

Positive usability findings play a key role in reinforcing what is working well in the user interface. They help:

A: Build developer confidence and soften criticism when pointing out issues.

C: Provide a complete picture of usability strengths and weaknesses.

D: Inform developers what should remain unchanged during redesign.

However, B is incorrect because justifying usability test costs should not rely solely on positive findings. Cost justification should come from the overall impact of usability on user satisfaction, performance, and business outcomes-not just good results.

#####

NEW QUESTION # 14

You're defining usability test tasks for a web shop for mobile phones and smartphones. Finding out whether users are able to place an order easily has been identified as the main goal of the usability test.

Which of the following is a reasonable task definition to include in the test?

- A. Enter the item number "1469483" in the search box and click "OK". Put the first item in the cart by clicking "add to bag". Then, click on "checkout" in order to start the order process. After that, fill in the form and click on "submit".
- B. Your phone broke and you're looking for a new smartphone. Your budget is 200\$ and it should have an infrared sensor as you like to operate your home entertainment system with it. Find a suited smartphone and order it!
- C. Which mobile operating system do you prefer?
- D. Put the first phone you find in your shopping cart!

Answer: B

Explanation:

Option B represents a realistic, goal-oriented scenario that reflects how an actual user would interact with the website. It incorporates context, user intent, constraints, and desired outcome-all characteristics of well- designed usability tasks. Option A is vague and lacks real-world motivation. Option C is too prescriptive and limits insight into user behavior, while D is a survey question, not a usability task. According to Nielsen Norman Group and ISO 25062, the best usability tasks are scenario-based, realistic, and outcome-driven- making B the correct answer.

#####

NEW QUESTION # 15

Which of the following statements best describe Rapid Iterative Testing and Evaluation?

- A. Testing is quantitative
- B. Testing is informal and many potential users can be accessed
- C. Testing happens on a regular basis, e.g. each Monday
- D. Testing focuses on instant redesigns and confirming made changes

Answer: D

Explanation:

Rapid Iterative Testing and Evaluation (RITE) is a usability method in which usability issues are identified and addressed in short cycles. Unlike traditional usability testing, RITE allows for immediate redesigns and retesting of the improved version within the same study. The goal is to refine the design quickly based on observed usability issues. Option A confuses scheduling with methodology, B is too vague, and D inaccurately characterizes RITE as quantitative, while it is typically qualitative. Therefore, C accurately reflects the purpose and approach of RITE.
