Amazon AWS Certified Cloud Practitioner Sample Questions (Q464-Q469):

NEW QUESTION # 464

What is the MINIMUM AWS Support plan level that will provide users with access to the AWS Support API?

- A. Business
- B. Basic
- C. Enterprise
- D. Developer

Answer: A

Explanation:

Explanation/Reference: <https://aws.amazon.com/premiumsupport/plans/>

NEW QUESTION # 465

Which of the following acts as an instance-level firewall to control inbound and outbound access?

- A. Network access control list
- B. AWS Trusted Advisor
- C. Security groups
- D. Virtual private gateways

Answer: C

NEW QUESTION # 466

A web developer has limited knowledge of AWS networking services such as Amazon VPC, Elastic Load Balancing, and Auto Scaling, but wants to host a highly available web application.

Which AWS service would automatically handle the deployment and reduce the complexity for the developer?

- A. AWS CloudFormation
- B. AWS Resource Access Manager
- C. AWS Elastic Beanstalk
- D. AWS CodeDeploy

Answer: C

NEW QUESTION # 467

What is a benefit of using AWS serverless computing?

- A. Monitoring and logging are not needed
- B. Application deployment and management are not required
- C. Management of infrastructure is offloaded to AWS
- D. Application security will be fully managed by AWS

Answer: C

NEW QUESTION # 468

A company wants to minimize network latency between its Amazon EC2 instances. The EC2 instances do not need to be highly available.

Which solution meets these requirements?

- A. Use EC2 instances in the same edge location and the same AWS Region.
- B. Use EC2 instances in the same edge location and the same Availability Zone.
- C. Use Amazon CloudFront as the database for the EC2 instances.
- D. Use EC2 instances in a single Availability Zone.

Answer: D

Explanation:

Using EC2 instances in a single Availability Zone is a solution that meets the requirements of minimizing network latency between the EC2 instances and not needing high availability. An Availability Zone is a physically isolated location within an AWS Region that has its own power, cooling, and network connectivity.

EC2 instances within the same Availability Zone can communicate with each other using low-latency private IP addresses. However, EC2 instances in a single Availability Zone are not highly available, because they are vulnerable to failures or disruptions that affect the Availability Zone
