Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q12-Q17):

NEW QUESTION # 12

A developer needs to preview a new page before releasing publicly. The DevOps engineer confirms that AEM as a Cloud Service is the latest version and that the correct IP has been added to a new Allow List for the Preview Service. The developer is still not able to access the page.

What should the DevOps engineer do?

- A. Unapply the default IP Allow List from the Preview Service
- B. Create an IP Allow List and apply to Publish Service
- C. Unapply the default IP Allow List from the Publish Service
- D. Reapply the default IP Allow List from the Preview Service

Answer: A

NEW QUESTION # 13

An enterprise customer of AEM as a Cloud Service has three independent development teams. Each team is responsible for publishing a different website with a unique domain and SSL certificate to the single, shared AEM program. Each team has set their own project timeline with a different launch date planned within the next 6 months.

Each team has their own upstream Git repository hosted in the corporate subnet, which they initialized using the latest aem-project-archetype.

The DevOps engineer is solely responsible for any configurations needed to enable automated deployment to all three environments (dev, stage, and prod).

Which two options should the DevOps engineer choose? (Choose two.)

- A. A fourth Git repository that contains a root pom file and a CI/CD pipeline script cloning the other three project repositories as subfolders
- B. Use Git submodules in Cloud Manager to merge the content of multiple branches across git repositories at build time
- C. A multi-module Maven project that embeds each team's Git repository as a module of the encompassing Maven project
- D. Three separate Cloud Service programs and Cloud Manager Developer/Deployment Manager role assignments for each of the three team leads

Answer: A,B

NEW QUESTION # 14

Which component should be configured in Apache to enable Dispatcher in AEM?

- A. mod_proxy.so
- B. mod_dispatcher.so
- C. mod_cache.so
- D. mod_rewrite.so

Answer: B

NEW QUESTION # 15

Which best practice should be followed when modifying pom.xml to support Cloud Manager pipelines?

- A. Configure profiles for different environments using run modes
- B. Use hardcoded repository URLs for all dependencies
- C. Minimize dependencies to improve build speed
- D. Disable unit tests to speed up the build process

Answer: A

NEW QUESTION # 16

A DevOps engineer is migrating custom index definitions in preparation to move an on-premise instance to the AEM as a Cloud Service.

The on-premise AEM instance contains indexes in the following locations:

under /apps/my-app/oak-index

under /content/my-site/oak-index

under /oak:index

The indexes must be consolidated before using the Index Converter utility.

Which two possible paths should the DevOps engineer consolidate the index to? (Choose two.)

- A. /content/my-site/oak-index
- B. /apps/my-app/oak-index
- C. /conf/my-site/settings/oak-index
- D. /oak:index

Answer: B,D

NEW QUESTION # 17

.....

With the popularization of wireless network, those who are about to take part in the AD0-E124 exam guide to use APP on the
