AP-201 Reliable Test Vce - AP-201 Detail Explanation

The Salesforce AP-201 exam questions are being offered in three different formats. These formats are AP-201 PDF dumps files, desktop practice test software, and web-based practice test software. All these three AP-201 exam dumps formats contain the Real AP-201 Exam Questions that assist you in your B2B Commerce for Administrators Accredited Professional practice exam preparation and finally, you will be confident to pass the final Salesforce AP-201 exam easily.

Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which requirement must be met before an Administrator can perform a search index?

- A. All products must have a SKU assigned.
- **B. At least one product must have a ProductCode assigned.**
- C. All products must have at least one image assigned.
- D. At least one product must be marked Active.

Answer: B

Explanation:

Before performing a search index in Salesforce B2B Commerce, it is crucial that at least one product has a ProductCode assigned (D). The ProductCode is a unique identifier for products in Salesforce B2B Commerce, and it is essential for indexing and searching products within the platform. While images (A) and SKUs (B) enhance product listings and navigation, they are not prerequisites for

indexing. Ensuring products are marked as Active (C) is important for them to appear in search results, but the presence of a ProductCode is fundamental to the indexing process itself.

NEW QUESTION # 56

Which tool should an Administrator use to add products, categories, and images in one step?

- A. CSV Import feature
- B. Apex Code
- C. Data Loader
- D. Data Import Wizard

Answer: A

Explanation:

To add products, categories, and images in one step, an Administrator should use the B. CSV Import feature in Salesforce B2B Commerce. This feature enables the bulk upload of product information, including associated categories and images, streamlining the process of populating the storefront with new or updated product listings.

NEW QUESTION # 57

An Administrator has given another administrator access to the store to validate the B2B Commerce installation, but the welcome email was never received. In which two ways can the second Administrator access the store without changing the setup?

- A. Log in from the Contact page in the Commerce app.
- B. Check the Debug Logs for the welcome email.
- C. Enable Guest Access in Experience Builder.
- D. Log in using the link in the More Information section of the Store page.
- E. Reset this user's password from Setup and have the user login again.

Answer: A,E

Explanation:

If a second administrator did not receive the welcome email for B2B Commerce, they can still access the store without changing the setup by logging in from the Contact page in the Commerce app (C). This method allows administrators with existing Salesforce credentials to access the B2B Commerce environment directly through the Commerce app, bypassing the need for a welcome email. Additionally, Resetting the user's password from Setup and having the user login again (E) is a common workaround for access issues. This approach ensures that the user can reset their password and gain access to the store without relying on the initial welcome email. Checking Debug Logs (A), Enabling Guest Access in Experience Builder (B), and Logging in using the link in the More Information section of the Store page (D) are not standard practices for this particular scenario.

NEW QUESTION # 58

An Administrator is trying to figure out what steps remain before their store can be deployed. They have completed assigning a Catalog to the Store and assigning Buyer Groups to the Store.

Which two steps must the administrator complete as part of the Store setup wizard?

- A. Load shipping costs
- B. Build the search index
- C. Assign Price Books to a store
- D. Configure checkout flow
- E. Load tax rates

Answer: C,D

Explanation:

As part of the Store setup wizard, the remaining steps the Administrator must complete include:

B) Assign Price Books to a store: This ensures that the correct pricing is applied to products within the store.

E) Configure checkout flow: This involves setting up the steps and processes that customers will go through during checkout, including payment and shipping options.

Completing these steps ensures that the store is fully functional and ready for deployment, providing a seamless shopping experience.

for customers.

NEW QUESTION # 59

Which three sub-flows are part of the standard B2B Main Checkout Flow template? 09m 39s

- A. Taxes
- B. Error
- C. Shipping Method
- D. Inventory
- E. Billing Address

Answer: A,C,E

Explanation:

The standard B2B Main Checkout Flow template includes sub-flows for Shipping Method (A), Billing Address (B), and Taxes (E). These sub-flows are integral to the checkout process, ensuring that shipping, billing, and tax calculations are handled efficiently and accurately during the checkout procedure.

NEW QUESTION # 60

.....

Try to have a positive mindset, keep your mind focused on what you have to do. Self-discipline is important if you want to become successful. Learn to reject temptations.
