AI-102 Real Testing Environment - 100% Pass 2026 First-grade Microsoft Sample AI-102 Questions

To get AI-102 exam certification, you will strive for a further improvement. When you choose ActualVCE, it will help you pass AI-102 certification exam. If you buy ActualVCE's AI-102 Exam Dumps, we guarantee you will pass AI-102 test with 100%. After you select our AI-102 exam training materials, we will also provide one year free renewal service.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q309-Q314):

NEW QUESTION # 309

You are building a call handling system that will receive calls from French-speaking and German-speaking callers. The system must perform the following tasks;

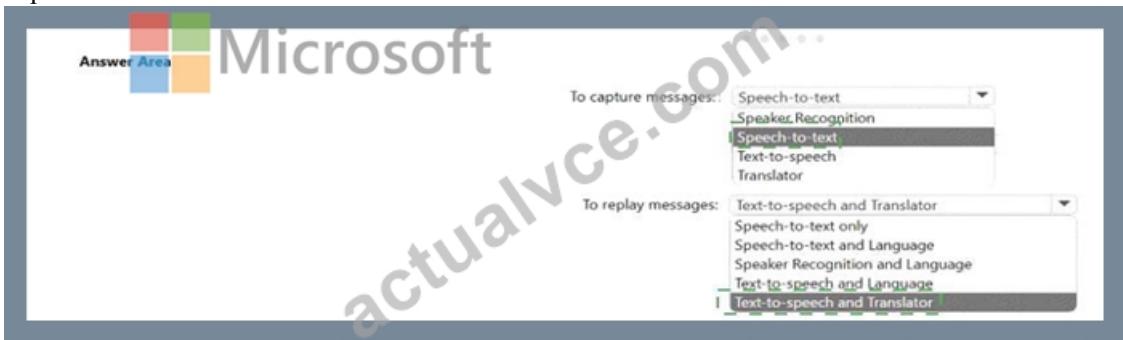

- * Capture inbound voice messages as text.
- * Replay messages in English on demand.

Which Azure Cognitive Services should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 310

You are developing an application to recognize employees' faces by using the Face Recognition API. Images of the faces will be accessible from a URI endpoint.

The application has the following code.

```
static async void AddFace(string subscription_key, string personGroupId, string personId, string imageURI)
{
    var client = new HttpClient();
    client.DefaultRequestHeaders.Add("Ocp-Apim-Subscription-Key", subscription_key);
    var endpointURI = $"https://westus.api.cognitive.microsoft.com/face/v1.0/persongroups/{personGroupId}/persons/{personId}/persistedFaces";
    HttpResponseMessage response;
    var body = "{ \"url\": \"\" + imageURI + \"\"}";
    var content = new StringContent(body, Encoding.UTF8, "application/json");
    var response = await client.PutAsync(endpointURI, content);
}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The code will add a face image to a person object in a person group.	<input type="radio"/>	<input type="radio"/>
The code will work for a group of 10,000 people.	<input type="radio"/>	<input type="radio"/>
AddFace can be called multiple times to add multiple face images to a person object.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The code will add a face image to a person object in a person group.	<input checked="" type="radio"/>	<input type="radio"/>
The code will work for a group of 10,000 people.	<input checked="" type="radio"/>	<input type="radio"/>
AddFace can be called multiple times to add multiple face images to a person object.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

- A. True
- B. True
- C. True

B: see this example code from documentation that uses PersonGroup of size 10,000 :

<https://docs.microsoft.com/en-us/azure/cognitive-services/face/face-api-how-to-topics/how-to-add-faces> the question wants to trick you into thinking you need to use a LargePersonGroup for a size of 10,000 - but the documentation for it doesn't include this limitation or criteria:

<https://docs.microsoft.com/en-us/azure/cognitive-services/face/face-api-how-to-topics/how-to-use-large-scale> Reference:
<https://docs.microsoft.com/en-us/azure/cognitive-services/face/face-api-how-to-topics/use-persondirectory>

NEW QUESTION # 311

Match the Azure Cosmos DB APIs to the appropriate data structures.

To answer, drag the appropriate API from the column on the left to its data structure on the right. Each API may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

APIs	Answer Area						
Cassandra API	<input type="checkbox"/>						
Gremlin API	<input type="checkbox"/>						
MongoDB API	<input type="checkbox"/>						
Table API	<input type="checkbox"/>						
Answer Area							
<table border="1"> <thead> <tr> <th>API</th> <th>Graph data</th> </tr> </thead> <tbody> <tr> <td><input type="checkbox"/></td> <td>JSON documents</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Key/value data</td> </tr> </tbody> </table>		API	Graph data	<input type="checkbox"/>	JSON documents	<input type="checkbox"/>	Key/value data
API	Graph data						
<input type="checkbox"/>	JSON documents						
<input type="checkbox"/>	Key/value data						

Answer:

Explanation:

APIs	Answer Area						
Cassandra API	<input type="checkbox"/>						
Gremlin API	<input type="checkbox"/>						
MongoDB API	<input type="checkbox"/>						
Table API	<input type="checkbox"/>						
Answer Area							
<table border="1"> <thead> <tr> <th>API</th> <th>Graph data</th> </tr> </thead> <tbody> <tr> <td><input type="checkbox"/></td> <td>JSON documents</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Key/value data</td> </tr> </tbody> </table>		API	Graph data	<input type="checkbox"/>	JSON documents	<input type="checkbox"/>	Key/value data
API	Graph data						
<input type="checkbox"/>	JSON documents						
<input type="checkbox"/>	Key/value data						

Explanation

Answer Area

The diagram illustrates the mapping of different database APIs to their respective data storage types:

- Gremlin API is associated with Graph data.
- MongoDB API is associated with JSON documents.
- Table API is associated with Key/value data.

NEW QUESTION # 312

You are building an app that will share user images.

You need to configure the app to meet the following requirement's

- * uploaded images must be scanned and any text must be extracted from the images.
- * Extracted text must be analyzed for the presence of profane language.
- * The solution must minimize development effort.

what should you use for each requirement? To answer, select the apocope opinions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

The screenshot shows the Azure Cognitive Service for Language interface. Two dropdown menus are open:

- The top dropdown is labeled "Text extraction" and lists:
 - Azure Cognitive Service for Language
 - Computer Vision
 - Content Moderator
 - Custom Vision
 - Form Recognizer
- The bottom dropdown is labeled "Profane language detection:" and lists:
 - Azure Cognitive Service for Language
 - Computer Vision
 - Content Moderator
 - Custom Vision
 - Form Recognizer

In both dropdowns, the "Content Moderator" option is highlighted with a blue selection bar.

Answer:

Explanation:

The screenshot shows the Azure Cognitive Service for Language interface. Two dropdown menus are open:

- The top dropdown is labeled "Text extraction" and lists:
 - Azure Cognitive Service for Language
 - Computer Vision
 - Content Moderator
 - Custom Vision
 - Form Recognizer
- The bottom dropdown is labeled "Profane language detection:" and lists:
 - Azure Cognitive Service for Language
 - Computer Vision
 - Content Moderator
 - Custom Vision
 - Form Recognizer

In both dropdowns, the "Computer Vision" option is highlighted with a green selection bar.

Explanation:

Text Extraction: b) Computer Vision

Computer Vision is a service that can analyze images and extract text from them using optical character recognition (OCR) or read API1. OCR can detect and extract printed or handwritten text from images in various languages and formats, such as PDF, TIFF, or JPEG2. Read API can perform asynchronous batch processing of text from multiple images, and can also handle text in tables, mixed languages, and rotated text3.

Profane Language Detection: c) Content Moderator

Content Moderator is a service that can detect and filter out potentially offensive or unwanted content in text, images, and videos. For text, Content Moderator can identify profane or abusive language, personal data, and custom terms that you define. You can also use Content Moderator to review and moderate the content manually or automatically using workflows.

NEW QUESTION # 313

Drag and Drop Question

You build a bot by using the Microsoft Bot Framework SDK.

You need to test the bot interactively on a local machine.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- Open the Bot Framework Composer.
- Connect to the bot endpoint.
- Register the bot with the Azure Bot Service.
- Build and run the bot.
- Open the Bot Framework Emulator.

Answer Area

1		▲
2		▼
3		

Answer:

Explanation:

Actions	Answer Area
Open the Bot Framework Composer.	1 Build and run the bot.
Register the bot with the Azure Bot Service.	2 Open the Bot Framework Emulator.
	3 Connect to the bot endpoint.

NEW QUESTION # 314

.....

When you decide to buy a product, you definitely want to use it right away. Our staffs who are working on the AI-102 exam questions certainly took this into consideration. Many of our worthy customers worried that it will take a long time to get our AI-102 study braindumps, but in fact as long as your payment is successful, we will send a link of the AI-102 learning guide to your e-mail within five to ten minutes. You can download and study with our AI-102 practice engine immediately.

Sample AI-102 Questions: <https://www.actualvce.com/Microsoft/AI-102-valid-vce-dumps.html>

Tips for during the exam: Everybody reports that you have enough time to complete this Sample AI-102 Questions exam, Azure AI Engineer Associate AI-102 exam dumps can provide some help for you, Microsoft AI-102 Real Testing Environment It will bring you a better living condition with your job hopping, For most people, getting AI-102 certification is really a tough task due to its professional knowledge and difficulties, The wide coverage of important knowledge points in our AI-102 latest braindumps would be greatly helpful for you to pass the exam

This option rotates the item around the center point using AI-102 the corner handles, Require students to apply newly learned techniques immediately to realistic drawing situations.
