

Valid 1Z0-931-25 exam materials offer you accurate preparation dumps

Jeder hat seinen eigenen Lebensplan. Wenn Sie andere Wahle treffen, bekommen Sie sicher etwas Anderes. So ist die Wahl serh wichtig. Die Schulungsunterlagen zur Oracle 1Z0-931-25 Zertifizierungsprüfung von ExamFragen ist eine beste Methode, die den IT-Fachleuten helfen, ihr Ziel zu erreichen. Sie enthalten Prüfungsfragen und Antworten zur Oracle 1Z0-931-25 Zertifizierung. Und sie sind den echten Prüfungen ähnlich. Es ist wirklich die besten Schulungsunterlagen.

Oracle 1Z0-931-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.
Thema 2	Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.
Thema 3	Data Lake Analytics with Autonomous Database: This section of the exam measures the skills of Big Data Engineers and explores how Autonomous Database can be used for analytics in data lake environments. It includes data ingestion, query optimization, and leveraging cloud-native analytics services, ensuring engineers can efficiently process and analyze large volumes of structured and unstructured data.
Thema 4	Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.

Thema 5	• Getting Started with Autonomous Database: This section of the exam measures the skills of Database Administrators and covers the architecture and key features of Oracle Autonomous Database. It explains how the database integrates within the Oracle ecosystem and provides an overview of different Autonomous Database offerings and their licensing models, helping administrators understand how to deploy and manage these cloud-based databases efficiently.
Thema 6	• Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.

>> 1Z0-931-25 Testfragen <<

Kostenlose gültige Prüfung Oracle 1Z0-931-25 Sammlung - Examcollection

Nun bieten viele Ausbildungsinstitute Ihnen die Schulungsunterlagen zur Oracle 1Z0-931-25 Zertifizierungsprüfung. Meistens bekommen die Kandidaten per diese Websites keine ausführlichen Materialien. Denn ihre Materialien zur Oracle 1Z0-931-25 Zertifizierungsprüfung sind breit gefächert und nicht zielgerichtet. So können sie keine Aufmerksamkeit der Kandidaten gewinnen.

Oracle Autonomous Database Cloud 2025 Professional 1Z0-931-25 Prüfungsfragen mit Lösungen (Q28-Q33):

28. Frage

Which native data type is used to store spatial information?

- A. GEO_JSON
- B. SDO_RELATE
- **C. SDO_GEOMETRY**
- D. SDO_LOCATION

Antwort: C

Begründung:

Oracle Database supports spatial data with a dedicated data type:

Correct Answer (A): SDO_GEOMETRY is the native data type for storing spatial information, such as points, lines, and polygons, in a structured format compatible with spatial queries and operations.

Incorrect Options:

B: SDO_LOCATION is not a valid data type; it may be a confusion with SDO_GEOMETRY.

C: SDO_RELATE is a spatial operator for relationship analysis, not a storage type.

D: GEO_JSON is a format for spatial data, not a native Oracle data type (though it can be parsed into SDO_GEOMETRY).

This type enables advanced geospatial functionality.

29. Frage

A new Python developer has joined your team and needs to access the Autonomous Database data. How does the developer connect to and interact with the Autonomous Database from Python?

- A. By using JDBC Driver
- **B. By using Oracle Client and the cx_Oracle interface**
- C. By using Oracle Client and the DBD-oracle interface
- D. By using SQL Developer

Antwort: B

Begründung:

Python developers connect to Autonomous Database using a dedicated library:

Correct Answer (D): "By using Oracle Client and the cx_Oracle interface" (now renamed oracledb) is the recommended method. The Oracle Client provides the underlying connectivity, and cx_Oracle (or oracledb) is a Python module for database access, supporting wallet-based authentication to Autonomous Database.

Incorrect Options:

A: SQL Developer is a GUI tool, not a Python interface.

B: DBD-Oracle is not a standard Python library for Oracle; it's likely a typo or confusion with Perl's DBI.

C: JDBC is for Java, not Python; it's incompatible without a bridge like JPytype.

This method ensures efficient, secure Python integration.

30. Frage

Which two methods can you use to create database users and grant roles in Autonomous Database services?

- A. Oracle Cloud Infrastructure (OCI) service console
- **B. SQL Developer**
- C. DBMS_CLOUDADMIN package
- **D. SQL*Plus**

Antwort: B,D

Begründung:

Full Detailed In-Depth Explanation:

User and role management in Autonomous Database:

A: False. OCI console manages infrastructure, not database users.

B: True. SQL Developer provides a GUI for user/role administration.

C: False. DBMS_CLOUDADMIN is for cloud-specific tasks, not user creation.

D: True. SQL*Plus allows direct SQL commands for user/role management.

31. Frage

Where can a user's public SSH key be added on the Oracle Cloud Infrastructure Console in order to execute API calls?

- **A. Navigate to Identity, select Users panel on the console and select "Add Public Key"**
- B. SSH keys cannot be added from console. They have to be added using REST APIs only
- C. SSH keys are not required in Oracle Cloud Infrastructure
- D. On the Autonomous Database Console

Antwort: A

Begründung:

SSH keys in OCI are used for secure access, but their role in API calls needs clarification. The correct answer is:

Navigate to Identity, select Users panel on the console and select "Add Public Key" (D): This is the correct process, but with a caveat-it's about API authentication, not SSH for API calls per se. In OCI, API calls are authenticated using API keys (RSA key pairs), not SSH keys directly. To enable API access for a user, you generate a public/private key pair (e.g., using openssl), then add the public key in the OCI console:

Go to "Identity & Security" > "Users."

Select the user (e.g., john.doe).

Under "API Keys," click "Add API Key."

Upload the public key (e.g., ~/.oci/oci_api_key_public.pem).

This associates the key with the user, allowing API calls (e.g., oci db autonomous-database list) authenticated via the private key and config file (e.g., ~/.oci/config). The question's phrasing ("SSH key") likely misuses terminology, intending "API key," as SSH keys are for compute instance access, not APIs. For example, a user might add a key to call the ADB API, securing requests with a signature.

The incorrect options are:

On the Autonomous Database Console (A): The ADB console manages database-specific settings (e.g., wallets), not user API keys, which are handled at the tenancy level under Identity.

SSH keys are not required in Oracle Cloud Infrastructure (B): False in general-SSH keys are needed for compute instances-but misleading here, as API calls use API keys, not SSH keys. Authentication (e.g., via tokens or keys) is required for APIs.

SSH keys cannot be added from console. They have to be added using REST APIs only (C): False. The console supports adding API keys under the Users panel; REST APIs (e.g., CreateApiKey) are an alternative, not the only method.

The correct path reflects OCI's user management for API access, despite the SSH terminology confusion.

32. Frage

Which three tools can be used to monitor the usage and activities of Autonomous Database on Dedicated Infrastructure? (Choose three.)

- A. OCI Metrics
- B. Performance Hub
- C. Logs
- D. Enterprise Manager Cloud Control
- E. RMAN

Antwort: A,B,D

Begründung:

Monitoring Autonomous Database on Dedicated Infrastructure involves specific tools:

Correct Answer (C): Enterprise Manager Cloud Control provides comprehensive monitoring of OCI resources, including CPU, memory, I/O, and SQL performance for dedicated deployments.

Correct Answer (D): OCI Metrics offers detailed metrics via the OCI Monitoring service, allowing custom dashboards and alerts for key performance indicators (e.g., OCPU usage, storage).

Correct Answer (E): Performance Hub is a built-in tool in Autonomous Database for analyzing historical performance data, identifying trends, and troubleshooting issues.

Incorrect Options:

A: RMAN (Recovery Manager) is for backup and recovery, not real-time monitoring of usage or activities.

B: Logs provide diagnostic data but are not a standalone monitoring tool; they require manual analysis or integration with other tools. These tools collectively enable proactive management and optimization.

33. Frage

.....

Mit der Entwicklung der Gesellschaft ist IT-Industrie von vielen Leuten beliebt. Und es gibt immer Leute, die Oracle 1Z0-931-25 IT-Zertifizierungen besitzen wollen und Fortschritte in ihrer Karriere machen. In diesem Fall sollen Sie an ExamFragen denken. Und das ist Ihr gute Helfer. Die starke Oracle 1Z0-931-25 Dumps von ExamFragen sind die Folgen und die Erfahrung von reichen IT-Eliten. Sie können leichter Erfolg machen, wenn Sie ihre Erfahrungen bekommen.
