Fortunately, TorrentValid provides its users with the most recent and accurate Microsoft GH-900 Questions to assist them in preparing for their real GH-900 exam. Our Microsoft GH-900 exam dumps and answers have been verified by Microsoft certified professionals in the area.

## Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI</li> <li>CD pipeline implementation. Candidates also learn GitHub’s tools and best practices for conducting and managing code reviews.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.</li> </ul>

Topic 6	<ul style="list-style-type: none"> <li>• <b>Introduction to Git and GitHub:</b> This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.</li> </ul>

## Actual GH-900 Test Prep is Attributive Practice Questions to High-Efficient Learning

The passing rate of our GH-900 study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our GH-900 study materials are selected strictly based on the real GH-900 exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them and guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more GH-900 learning resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

### Microsoft GitHub Foundations Sample Questions (Q61-Q66):

#### NEW QUESTION # 61

If there are multiple README files, which of the following locations will be displayed first?

- A. /src
- B. .github
- **C. Root**
- D. /docs

**Answer: C**

Explanation:

When multiple README files exist in different locations within a GitHub repository, the README.md file located in the root directory of the repository will be displayed first by default. This file serves as the main documentation for the repository and is automatically rendered on the repository's home page.

Root Directory:

Option C is correct because the README.md file in the root directory is prioritized and displayed first on GitHub. This is the standard behavior for how GitHub presents documentation.

Incorrect Options:

Option A (.github) is incorrect because while a README.md file in the .github directory might be used for certain configurations, it is not the first to be displayed.

Option B (/src) is incorrect because the README.md in the src directory is not prioritized over the root.

Option D (/docs) is incorrect because documentation in the /docs folder is typically secondary to the root README.md.

GitHub Docs: About READMEs

#### NEW QUESTION # 62

When using Organizations, GitHub Teams is better than GitHub Free because it offers:

- **A. Authentication with SAML single sign-on and increased GitHub Actions minutes.**
- B. Expanded storage and priority support.
- C. Increased GitHub Actions minutes and additional GitHub Packages storage.
- D. Advanced tools and insights in private repositories.

**Answer: A**

Explanation:

GitHub Teams, as part of GitHub's paid plans, offers additional features and capabilities compared to GitHub Free, particularly for organizations.

GitHub Teams Benefits:

Option B is correct because GitHub Teams provides advanced security features like SAML single sign-on for secure authentication, as well as increased minutes for running GitHub Actions, which are essential for continuous integration and deployment workflows.

Incorrect Options:

Option A is incorrect because private repositories and advanced tools are features available, but the key differentiator in this context is the SAML SSO and additional GitHub Actions minutes.

Option C is incorrect because while expanded storage and priority support are valuable, SAML SSO and increased GitHub Actions minutes are more central to the differences between GitHub Free and GitHub Teams.

Option D is partially correct, but since the question asks for the best reason, Option B provides the most critical features that differentiate GitHub Teams from GitHub Free.

GitHub Docs: About GitHub Teams

### NEW QUESTION # 63

Which of the following steps are part of the Codespaces lifecycle? (Choose three.)

- A. Rollback
- **B. Rebuild**
- **C. Delete**
- **D. Create**
- E. Install
- F. Clone
- G. Commit

**Answer: B,C,D**

Explanation:

The Codespaces lifecycle on GitHub includes several key steps:

Create: This is the step where a new Codespace is initiated.

Rebuild: A Codespace can be rebuilt to ensure that the environment is up-to-date with the latest code or configurations.

Delete: Once a Codespace is no longer needed, it can be deleted to free up resources.

Committing, cloning, or installing are typical Git operations but are not considered part of the specific lifecycle steps for a GitHub Codespace.

### NEW QUESTION # 64

Which of the following best describes cloning a repository?

- **A. It creates a copy of the repository on your local machine.**
- B. It creates a copy of the repository on GitHub.com.
- C. It retrieves code updates from the remote repository.
- D. It imports your source code into a new repository.

**Answer: A**

Explanation:

Cloning a repository in GitHub refers to creating a copy of the repository on your local machine.

This allows you to work on the project offline, make changes, and later push those changes back to the remote repository. It does not involve creating a copy on GitHub.com (which would be forking), retrieving updates (which would be pulling), or importing source code into a new repository (which is done differently).

### NEW QUESTION # 65

Which of the following types of charts can a user create to get GitHub Projects insights? (Choose two.)

- **A. current charts**

- B. pie charts
- C. forecast charts
- D. Gantt charts
- E. historical charts

**Answer: A,E**

Explanation:

GitHub Projects insights allow you to create two main types of charts: current charts and historical charts. Current charts show the current status and distribution of your project items, while historical charts visualize how the state of your project items changes over time, such as with a default burn-up chart that tracks completed vs. remaining work.
