

NCP-EUC Latest Exam Guide - Exam NCP-EUC Quick Prep

BTW, DOWNLOAD part of BootcampPDF NCP-EUC dumps from Cloud Storage: https://drive.google.com/open?id=1rzC_7XIVm77k4XxqueFEjhDJQnZJHBdR

Moreover, you do not need an active internet connection to utilize BootcampPDF desktop Nutanix NCP-EUC practice exam software. It works without the internet after software installation on Windows computers. The BootcampPDF web-based Nutanix NCP-EUC Practice Test requires an active internet and it is compatible with all operating systems.

As the authoritative provider of NCP-EUC guide training, we can guarantee a high pass rate compared with peers, which is also proved by practice. Our good reputation is your motivation to choose our learning materials. We guarantee that if you under the guidance of our NCP-EUC study tool step by step you will pass the exam without a doubt and get a certificate. Our NCP-EUC Learning Materials are carefully compiled over many years of practical effort and are adaptable to the needs of the NCP-EUC exam. We firmly believe that you cannot be an exception.

Exam NCP-EUC Quick Prep, Valid NCP-EUC Practice Questions

According to the statistic about candidates, we find that some of them take part in the Nutanix exam for the first time. Considering the inexperience of most candidates, we provide some free trail for our customers to have a basic knowledge of the NCP-EUC exam guide and get the hang of how to achieve the NCP-EUC exam certification in their first attempt. You can download a small part of PDF demo, which is in a form of questions and answers relevant to your coming NCP-EUC Exam; and then you may have a decision about whether you are content with it. In fact, there are no absolutely right NCP-EUC exam questions for you; there is just a suitable learning tool for your practices. Therefore, for your convenience and your future using experience, we sincere suggest you to have a download to before payment.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q108-Q113):

NEW QUESTION # 108

A new client has just deployed a new Frame account, During the testing phase, the security team found that they had bidirectional clipboard, capabilities, the ability to transfer files, and connectivity to unauthorized external storage devices. What should the administrator do to secure the environment, based on the security team's feedback?

- **A. Disable unauthorized storage providers and features.**
- B. Implement a Mobile Device Management solution.
- C. Deploy a device visibility & control platform.
- D. Apply Group Policies to limit the end users abilities.

Answer: A

Explanation:

According to the certification details¹, one of the objectives is to "Configure and manage security features such as role-based access control (RBAC), SSL certificates, encryption at rest, and data protection." This answer seems to align with the security team's feedback and the objective of managing security features using Nutanix technologies.

NEW QUESTION # 109

An administrator is tasked with enabling security measures through a STIG to ensure the CVM meets company requirements. Which RHEL STIG version is the Nutanix CVM compliant with?

- A. RHEL 9 STIG
- B. RHEL 7 STIG
- C. RHEL 6 STIG
- **D. RHEL 8 STIG**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to the latest Nutanix Security Guide (AOS 6.x and later) regarding SCMA (Security Configuration Management Automation):

* OS Evolution: Modern Nutanix Controller VMs (CVMs) in current Long Term Support (LTS) releases (AOS 6.5 and above) utilize an operating system based on RHEL 8 / CentOS 8.

* STIG Compliance: Consequently, the built-in SCMA policies are updated to check and enforce compliance against the RHEL 8 STIG (Security Technical Implementation Guide).

* Correction Note: Older documentation (AOS 5.x) referenced the RHEL 7 STIG. However, per your request for "latest knowledge" applicable to current supported environments, the CVM is compliant with RHEL 8 STIGs. If this question appears on a legacy exam version, the answer might still be listed as C (RHEL 7), but B is the technically correct answer for modern Nutanix software.

NEW QUESTION # 110

An administrator attempts to create a Machine Catalog for Windows 11 desktops in Citrix utilizing Machine Creation Services (MCS), but the desktops fail to register on startup.

What could be preventing registration?

- A. Insufficient CPU/Memory allocated to machines.
- B. No RDS Licenses are available.
- C. Invalid characters in Machine name.
- **D. Time is off on the machines.**

Answer: D

Explanation:

For a Citrix VDA (Virtual Delivery Agent) to successfully register with the Delivery Controller, it must establish a secure communication channel which relies heavily on Kerberos authentication.

A common cause for registration failure on startup, particularly in new deployments or non-persistent environments, is that the Time is off on the machines. If the system clock of the virtual desktop drifts more than 5 minutes from the domain controller or the Delivery Controller, Kerberos ticket generation fails. This prevents the VDA from authenticating with the Broker Service, resulting in a "Unregistered" state in Citrix Studio. While Windows 11 has strict hardware requirements (Option A), failing to meet those usually prevents the OS from booting or installing entirely; if the OS boots but fails to register, time synchronization is the most probable infrastructure cause.

NEW QUESTION # 111

An administrator is tasked with optimizing storage for persistent VDI desktops.

How should the administrator configure the storage containers?

- A. Compression: Enabled | Deduplication: Enabled | Erasure Coding: Enabled
- **B. Compression: Enabled | Deduplication: Enabled | Erasure Coding: Disabled**

- C. Compression: Enabled | Deduplication: Disabled | Erasure Coding: Enabled
- D. Compression: Enabled | Deduplication: Disabled | Erasure Coding: Disabled

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix Storage Best Practices for Citrix/VDI:

- * Workload Type: The question specifies Persistent VDI, which typically uses Full Clones.
- * Deduplication: For Full Clones/Persistent Desktops, the data (OS and Apps) is identical across many VMs but stored independently. Deduplication (specifically Capacity Tier Deduplication) is Enabled to eliminate these redundant blocks and save significant capacity.
- * Compression: Inline Compression is Enabled by default and recommended for all VDI workloads to improve performance and capacity usage.
- * Erasure Coding (EC-X): Nutanix documentation explicitly states that Erasure Coding is Disabled for active VDI workloads. EC-X provides capacity savings for "write-cold" data (like backups or archives) but introduces a performance penalty (parity calculation overhead) on random writes, which are common in persistent desktop usage.
- * Correction: While option D suggests enabling everything, the specific best practice table for "Citrix MCS: Full Clone" lists Erasure Coding as Disabled to maintain optimal user experience.

NEW QUESTION # 112

After receiving multiple complaints from VMware Horizon-based virtual desktop users about their slower logon and application load times, an administrator performed troubleshooting on the issue to optimize the environment.

The following discoveries were made on the Nutanix cluster:

- **A. Failed to create Native clone errors.**
- B. 4% average CPU Ready time
- C. 75% average memory utilization
- D. Host power Policy set to High Performance

Answer: A

Explanation:

one of the possible causes of slower logon and application load times for VMware Horizon-based virtual desktop users is Failed to create Native clone errors. This error occurs when there is a problem with cloning virtual machines using Nutanix Native Clones technology. To troubleshoot this issue, you can check the following:

The Nutanix cluster has enough free space to create clones

The Nutanix cluster has enough CPU and memory resources to handle cloning operations The Nutanix cluster is running a compatible version of AOS and AHV with VMware Horizon The VMware Horizon environment is configured correctly to use Nutanix Native Clones The VMware Horizon agent is installed and updated on the master image

NEW QUESTION # 113

.....

In order to meet the different demands of the different customers, these experts from our company have designed three different versions of the NCP-EUC reference guide. All customers have the right to choose the most suitable version according to their need after buying our study materials. The PDF version of the NCP-EUC exam prep has many special functions, including download the demo for free, support the printable format and so on. We can make sure that the PDF version of the NCP-EUC Test Questions will be very convenient for all people. Of course, if you choose our study materials, you will have the chance to experience our PDF version.

Exam NCP-EUC Quick Prep: https://www.bootcamppdf.com/NCP-EUC_exam-dumps.html

With the PDF version, you can access the collection of actual Nutanix NCP-EUC questions with your smart devices like smartphones, tablets, and laptops, Get the NCP-EUC Exam Dumps in Easy formats, When you are faced with the real exam, you can pass Nutanix NCP-EUC test easily, Nutanix NCP-EUC Latest Exam Guide Our company has realized that a really good product is not only reflected on the high quality but also the consideration service, We guarantee your 100% success in NCP-EUC
