

ACA-100 Exam Lab Questions - ACA-100 Exam Torrent

What's more, part of that ITdumpsfree ACA-100 dumps now are free: https://drive.google.com/open?id=1_60Huu9StUikoQ6on3QtKw8IMs4INIQ5

Preparing for the ACA-100 real exam is easier if you can select the right test questions and be sure of the answers. The ACA-100 test answers are tested and approved by our certified experts and you can check the accuracy of our questions from our free demo. Expert for one-year free updating of ACA-100 Dumps PDF, we promise you full refund if you failed exam with our dumps.

Appian ACA-100 Exam Syllabus Topics:

Section	Objectives
Security and Access Control	- User roles and groups - Object-level security and permissions
Application Design and Development	- Interface design principles and components - Application building blocks (records, interfaces, processes)
Data Management	- Data types and data stores - Record types and data relationships
Deployment and Troubleshooting	- Monitoring and basic troubleshooting concepts - Application deployment lifecycle
Process Modeling	- Process model design and execution - User input tasks and automation flows
Appian Platform Fundamentals	- Platform architecture and components overview - Appian design environment and application structure

Avail [Updated 2026]! Appian ACA-100 Exam Questions | Alleviate Exam Stress

Our services before, during and after the clients use our ACA-100 study materials are considerate. Before the purchase, the clients can download and try out our ACA-100 study materials freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our ACA-100 Study Materials if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

Appian Certified Analyst Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which Appian component would you use to display a large amount of data in a user-friendly, interactive way?

- A. Milestone Component
- B. Dropdown Component
- C. Pie Chart Component
- D. Record Grid Component

Answer: D

NEW QUESTION # 41

Within the "initiate" phase, who is expected to lead and facilitate requirements gathering discussions?

- A. Product Owner
- B. Scrum Master
- C. Testers
- **D. Appian Analyst**

Answer: D

Explanation:

During the "initiate" phase of a project, the Appian Analyst is expected to lead and facilitate requirements gathering discussions. The Appian Analyst works closely with stakeholders to understand business needs and translate them into technical requirements that the development team can implement.

Role of Appian Analyst:

The Appian Analyst acts as a bridge between business stakeholders and the development team.

They are responsible for ensuring that the gathered requirements are clear, actionable, and aligned with the project goals.

Why Not Other Options?:

A . Scrum Master: Facilitates the Scrum process but does not lead requirements gathering.

B . Product Owner: Prioritizes the backlog but often relies on the Analyst for detailed requirements gathering.

C . Testers: Focus on verifying that the application meets the requirements but do not typically gather them.

References:

Appian Community Success Guide: Roles in Appian Projects

The Appian Analyst plays a crucial role in the successful initiation of a project by ensuring that the requirements are well understood and documented.

NEW QUESTION # 42

Which Appian object's primary purpose is to define the structure of related data for use in a process model?

- A. Constant
- B. Expression Rule
- **C. Custom Data Type (CDT)**
- D. Record

Answer: C

Explanation:

A Custom Data Type (CDT) in Appian is primarily used to define the structure of related data. It represents a structured data type composed of multiple fields, and it is often used in process models to define the shape of data that will be passed between different activities or stored in the database.

Custom Data Type (CDT) Overview:

CDTs allow developers to define a complex data structure that can include various data types, such as text, numbers, dates, and even nested CDTs.

They are essential for passing structured data within a process model and between Appian applications and external systems.

Why Not Other Options?:

B . Record: Used to represent a view of data from an external or internal source, focusing on displaying and interacting with that data rather than defining its structure.

C . Constant: Stores a fixed value that can be used throughout the application, but it does not define complex data structures.

D . Expression Rule: Encapsulates logic and calculations but does not define data structures.

References:

Appian Documentation on Custom Data Types: Custom Data Types (CDT)

Using CDTs ensures that the data used within process models is structured and consistent, enabling robust data handling across the application.

NEW QUESTION # 43

An organization wants to automate identification of its dissatisfied customers based on the ticket description and assign the appropriate team to provide a quick resolution.

What is the best way to auto-classify the dissatisfied customers as part of processing?

- A. Using an image analysis connected system
- B. Using a SAIL form
- C. Using a decision table
- **D. Using a natural language connected system**

Answer: D

Explanation:

The organization aims to automate the identification of dissatisfied customers based on the ticket description. To achieve this, leveraging natural language processing (NLP) capabilities is the most efficient method. Appian provides connected systems that allow integration with external NLP services. These services can analyze text data (such as ticket descriptions) to determine the sentiment or classify the text into predefined categories (like "dissatisfied customer").

Natural Language Connected System:

Appian can integrate with third-party NLP platforms such as Google Cloud Natural Language, AWS Comprehend, or Azure Text Analytics via connected systems.

These services analyze the text provided in the ticket description to detect sentiment, keywords, or specific categories indicating dissatisfaction.

Based on the analysis, the system can automatically assign the appropriate team to handle the case.

Why Not Other Options?:

B . Decision Table: While decision tables are useful for rule-based decisions, they are not suitable for interpreting unstructured text like ticket descriptions.

C . Image Analysis Connected System: This option is irrelevant as the task involves text processing, not image analysis.

D . SAIL Form: SAIL forms are primarily used for user interface creation and are not intended for text analysis or classification.

Implementation in Appian:

Create a connected system to integrate with the chosen NLP service.

Configure the NLP service to analyze the text data and return the sentiment or classification results.

Based on the results, use process models to route the ticket to the appropriate team for resolution.

NEW QUESTION # 44

You are designing a user interface that requires a confirmation message when the user attempts to delete a row.

Review the image with the confirmation message:

"Are you sure you want to delete the item?"

According to best practices, which button labels should you choose?

- A. False, True
- B. Reject, Approve
- **C. Cancel, Delete**
- D. Back, Next

Answer: C

Explanation:

According to UI/UX best practices, the button labels in a confirmation dialog should be clear and directly related to the action the user is about to take. "Cancel" allows the user to abort the action, while "Delete" confirms the action to delete the item. This approach ensures that the user understands exactly what will happen when they click either button, reducing the risk of accidental deletion or confusion.

NEW QUESTION # 45

.....

In order to serve you better, we have a complete system for ACA-100 training materials. We offer you free demo to have a try

before buying, so that you can have a better understanding of what you are going to buy. After payment, you can obtain the download link and password within ten minutes for ACA-100 Training Materials. And we have a professional after-service team, they process the professional knowledge for the ACA-100 exam dumps, and if you have any questions for the ACA-100 exam dumps, you can contact with us by email, and we will give you reply as soon as possible.
