

H13-624_V5.5 Brain Dumps, Real H13-624_V5.5 Exam Dumps

[Get Most Updated H13-624_V5.5-ENU Dumps for Best Preparation](#)

1. A school customer purchased two Huawei OceanStorPacific series storages for daily business deployment. The engineer needs to configure the DPC service on the two storages. Which of the following configurations of the engineer is wrong?

- A. If the upper-layer business has high requirements for data security, engineers need to configure the storage pool type as encryption type when creating a fusion storage pool.
- B. When creating a namespace, engineers need to select the security mode and application type.
- C. Before creating a fusion storage pool, engineers need to enable the file service of the node through DeviceManager before they can proceed with the subsequent creation process.
- D. When the storage network is RoCE networking, engineers can use the systemctl stop IIDpad.service command to shut down the IIDpad service.

Answer: C

2. A government customer purchased two Huawei all-flash storages for business deployment. During the use of the storage, engineers found that the storage performance often fluctuated. If the engineer wanted to locate the storage performance fluctuation problem at this time, it would involve many operations.

- 1- Check whether there are obvious changes in IO model or business load at the fluctuation time point
- 2-Analyze the latency fluctuation module through the latency location tool FTDS on the storage side
- 3- Check whether there is an obvious hit rate mutation at the fluctuation time point
- 4- Check whether there is a very small IO scenario at the fluctuation time point
- 5- Check whether there is any obvious hardware resource bottleneck on the storage side at the fluctuation time point
- 6- Check whether there are obvious storage background tasks at the fluctuation time point

I would like to ask, among the above operations, which operations can locate the problem and which operations cannot?

- A. 456 can locate the problem, but 123 cannot
- B. 123456 can help locate the problem
- C. 12 can locate the problem, but 3456 cannot
- D. 123 can locate the problem, but 456 cannot

Answer: B

3. A government customer purchased multiple Huawei distributed storage devices to provide DPC file services for upper-layer businesses.

During the DPC service configuration process, engineers need to plan and configure storage switches. Which of the following descriptions of storage switch configuration requirements is wrong?

- A. During the configuration process, if the control network does not cross subnets, but there will be cross-subnet expansion operations later, engineers must configure VLAN and flow control, but there is no clear configuration requirement for the control network gateway
- B. When the transmission protocol is RoCE, engineers need to configure VLAN and flow control
- C. Engineers can form M-LAG with multiple switches, and when the transmission protocol is IB, engineers need to enable subnet management
- D. During the configuration process, engineers need to configure the IP address of the switch management network port

Answer: A

2 / 6

First of all, you are able to make full use of our H13-624_V5.5 study torrent through three different versions: PDF, PC and APP online version of our H13-624_V5.5 training guide. For each version, there is no limit and access permission if you want to download our study materials, and at the same time the number of people is not limited. After you purchase H13-624_V5.5 Study Materials, we guarantee that your H13-624_V5.5 study material is tailor-made. The last but not least, we can provide you with a free trial service on the H13-624_V5.5 exam questions.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.

Topic 2	<ul style="list-style-type: none"> Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.
Topic 3	<ul style="list-style-type: none"> Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.
Topic 4	<ul style="list-style-type: none"> Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.

Real H13-624_V5.5 Exam Dumps - New H13-624_V5.5 Exam Camp

Pass4Leader provides HCIP-Storage V5.5 (H13-624_V5.5) practice tests (desktop and web-based) to its valuable customers so they get the awareness of the H13-624_V5.5 certification exam format. Likewise, HCIP-Storage V5.5 (H13-624_V5.5) exam preparation materials for H13-624_V5.5 exam can be downloaded instantly after you make your purchase.

Huawei HCIP-Storage V5.5 Sample Questions (Q62-Q67):

NEW QUESTION # 62

An enterprise uses Huawei OceanStor hybrid flash storage for multi-selection storage. In order to facilitate management, the administrator uses SmartQuota. The technology creates different Quota Trees on the root directory for departments A, B, and C to use separately. Regarding setting quota types, which of the following The statement is correct ()

- A. You can set catalog quota on Quota Tree
- B. User group quota can be set on Quota Tree
- C. You can set user quotas on Quota Tree
- D. You can set the default catalog quota on Quota Tree

Answer: A,B,C

NEW QUESTION # 63

A TV station uses a Huawei hybrid flash storage device with FC networking to store videos. When I use it recently, it occasionally appears The video screen freezes. Engineer A will troubleshoot the fault after arriving at the site. Which of the following is the correct troubleshooting method ()

- A. Check the storage device failure alarm indicator
- B. Check if there is a RAID group degradation alarm
- C. Check the open status of the client firewall port
- D. First check whether the client status is normal, whether the resource is tight and cause the freeze

Answer: A,B,D

NEW QUESTION # 64

Single-choice Oceanstor 9000's wiselink and smartconnecet technologies are different, which one of the following?

- A. Domain name resolution function
- B. IP filter function between nodes
- **C. Rebalance function**
- D. Domain name design and zone management

Answer: C

NEW QUESTION # 65

When delivering a Huawei flash storage project, an engineer introduced the SAN/NAS Integrated architecture to the customer. Which of the following statements is false about the architecture?

- **A. At the protocol layer, NFS/CIFS supports direct TCP offload engine (DT06), while iSCSI does not.**
- B. The software architecture consists of the following layers from top to bottom: protocol, data service, cache, file and block space management, and storage pool.
- C. The space management layer uses the active-active high reliability mode to provide reliable data protection capabilities based on actual service scenarios of customers.
- D. The protocol layer is responsible for protocol parsing and permission management. SAN and NAS are two sets of semantic logic. Therefore, different service entry components are used.

Answer: A

NEW QUESTION # 66

In an OceanStor 9000 system, the total number of nodes is 10, and the data protection levels that can be configured for it can be:

- **A. 6+4**
- **B. 6+3**
- C. RAID1
- D. 6+5

Answer: A,B

NEW QUESTION # 67

.....

As you know, getting a H13-624_V5.5 certificate is helpful to your career development. At the same time, investing money on improving yourself is sensible. You need to be responsible for your life. Stop wasting your time on meaningless things. We sincerely hope that you can choose our H13-624_V5.5 Study Guide, which may change your life and career by just a step with according H13-624_V5.5 certification. For we have helped so many customers achieve their dreams.
