Customize Your Salesforce AP-223 Practice Exam for Better Results

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the AP-223 exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the AP-223 real study dumps designed by our company were according to the real exam content, which would help you cope with the AP-223 Exam with great ease. The masses have sharp eyes, with so many rave reviews and hot sale our customers can clearly see that how excellent our AP-223 exam questions are. After carefully calculating about the costs and benefits, our AP-223 prep guide would be the reliable choice for you, for an ascending life.

Salesforce CPQ and Billing Consultant Accredited Professional Sample Questions (Q62-Q67):

NEW QUESTION # 62
what are the 3 reasons why you would need an app exchange solution to support generating a document is support of a revenue cloud project?

- A. Attachments
- C. Contract Redlining
- D. watermarks
- E. electronic signature

Answer: C,D,E

NEW QUESTION # 63
The order management plugin functionality allows the architect to override which of the following default package behavior in salesforce CPQ?

- A. Set the billing day of the month
- B. Set the order start date
- C. Set the activation date
- D. Set the order end date

Answer: B

Explanation:
The Order Management Plugin (OrderPlugin2) in Salesforce CPQ allows architects to override the default behavior of CPQ when generating Orders from Quotes.
According to CPQ developer documentation, the plugin can override:
Order start date
Order end date logic (in limited ways)
Order product behaviors
The key supported override is specifically:
Setting the Order Start Date programmatically

NEW QUESTION # 64
Universal Containers sell a product bundle named "Corporate IT Solutions". One of the product options inside this bundle is named Hardware Firewall Universal Containers has a requirement where if the customer has purchased a hardware firewall in the past, the hardware firewall product option should be hidden while configuring the bundle.
The CPQ admin has created a product rule to handle this requirement. What should the evaluation event of the product rule be set to?

- A. Save
- B. Always
- C. Load and Edit
- D. Load.

Answer: D

Explanation:
The requirement is:
When configuring a bundle, if the customer has previously purchased a hardware firewall, the Hardware Firewall product option should be hidden during bundle configuration.
This means the Product Rule must evaluate immediately when the bundle configuration UI loads, so that the option is hidden before the user begins configuring.
Salesforce CPQ documentation clarifies the evaluation events for Product Rules:
Evaluation Events in CPQ Product RulesEvaluation Event

When it Fires
Use Case
Load
Fires immediately when the configurator opens
Use this when hiding options or preselecting options based on external or historical data, Assets, Subscriptions, etc.
Load and Edit
Fires on initial load and every time the user makes changes
Use when rules may need re-checking with every MODIFY step.
Save
Only fires when clicking Save
Use when validating configuration before saving (e.g., preventing invalid combinations).
Always
Fires during all events including load, edit, and save
Rarely used; typically only for enforcement rules.
You need the option hidden right when the configurator loads.
The rule uses historical data (previously purchased hardware firewall).That data does not change in real time during the configuration session.
There is no need to re-check during every selection or on save.
Why Load is the correct answer:Therefore, using Load provides:
Optimal performance
Immediate user experience consistency
No unnecessary re-evaluations
Overkill; runs multiple times unnecessarily.
Negative impact on performance in large quotes/bundles.
Why the other options are incorrect:□ A. Always
Hiding an option at save time is too late.
The user should not see the firewall option at all if they already purchased it.
□ B. Save
This re-evaluates the product rule every time the user interacts.
Not required because the "past purchase" condition does not change during configuration.
Adds unnecessary processing.
□ C. Load and Edit

NEW QUESTION # 65

An Invoice Scheduler is set up with Target Date = January 15 and Bill Usage ChargesFalse.
Which setting will generate invoice lines?

- A. Order Products with Next Billing Date equal to or after January 15
- B. Order Products with Next Billing Date equal to or earlier than January 15
- C. Usage Summaries with Next Billing Date equal to or earlier than January 15
- D. Order Products with Next Charge Date equal to or earlier January 15

Answer: B

Explanation:
Invoice Scheduler Settings:
Target Date = Jan 15
Bill Usage Charges = FALSE
This means:
The scheduler will generate invoice lines for Order Products only, not usage summaries.Thus the correct rule is:
✔ A - Order Products with Next Billing Date equal to or earlier than January 15 Why the other options are wrong:Option Why
Incorrect B - Usage Summaries Ignored because Bill Usage Charges = False.
C - Next Billing Date equal to or after
Billing only generates lines for dates <= Target Date.
D - Next Charge Date
Not used by Invoice Scheduler.
Thus A is correct.

NEW QUESTION # 66

After a Contract has been created and activated, what is an appropriate use of automation to support renewals?

- A. Check both Renewal Forecasted and Renewal Quoted fields simultaneously, closest to the renewal date.
- B. Check both Renewal Forecasted and Renewal Quoted fields simultaneously, as soon as the contract is activated
- C. Renewal Forecasted should be checked as early as possible, and Renewal Quoted should be checked near Contract End Date
- D. Renewal Quoted should be checked as early as possible, and Renewal Forecasted should be checked when the quote is due for renewal

Answer: C

Explanation:
Salesforce CPQ renewal automation uses two fields:
Indicates future revenue
Should be set immediately when contract is active
Indicates the renewal quote has been created
Should be set near the contract end date
1. Renewal Forecasted2. Renewal QuotedThis matches Salesforce best practice:
Forecast early → Quote late.
Thus C is correct.

NEW QUESTION # 67

......

AS is known to all of us, no pain, no gain. It's also applied in a AP-223 exam, if we want to pass the AP-223 exam, you also need to pay the time, money as well as efforts. However, induction may be quite difficult for someone who have little time to preparing the AP-223 exam. If you face the same problem like this, our product will be your best choice, the practice materials will provide you the most excellent and best ways for the exam. Our product for the AP-223 Exam will help you to save the time as well as grasp the main knoeledge point of the AP-223 exam.
