PSE-Strata-Pro-24 Exam Tests - PSE-Strata-Pro-24 Reliable Exam Answers

Under the tremendous stress of fast pace in modern life, this version of our PSE-Strata-Pro-24 test prep suits office workers perfectly. It can match your office software and as well as help you spare time practicing the PSE-Strata-Pro-24 exam. As for its shining points, the PDF version can be readily downloaded and printed out so as to be read by you. It's really a convenient way for those who are fond of paper learning. With this kind of version, you can flip through the pages at liberty and quickly finish the check-up PSE-Strata-Pro-24 Test Prep. What's more, a sticky note can be used on your paper materials, which help your further understanding the knowledge and review what you have grasped from the notes. While you are learning with our PSE-Strata-Pro-24 quiz guide, we hope to help you make out what obstacles you have actually encountered during your approach for PSE-Strata-Pro-24 exam torrent through our PDF version, only in this way can we help you win the PSE-Strata-Pro-24 certification in your first attempt.

Palo Alto Networks PSE-Strata-Pro-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.
Topic 2	• Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.
Topic 3	• Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.
Topic 4	• Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.

PSE-Strata-Pro-24 Reliable Exam Answers | Online PSE-Strata-Pro-24 Lab Simulation

Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap price. We have most professional team to compiled and revise PSE-Strata-Pro-24 exam question, in order to try our best to help you pass the exam and get a better condition of your life and your work. Moreover, only need to spend 20-30 is it enough for you to grasp whole content of PSE-Strata-Pro-24 practice materials that you can pass the exam easily, this is simply unimaginable.

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q25-Q30):

NEW QUESTION # 25
What is the minimum configuration to stop a Cobalt Strike Malleable C2 attack inline and in real time?

- A. Threat Prevention and Advanced WildFire with PAN-OS 10.0
- B. Advanced Threat Prevention and PAN-OS 10.2
- C. Next-Generation CASB on PAN-OS 10.1
- D. DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x

Answer: B

Explanation:
Cobalt Strike is a popular post-exploitation framework often used by attackers for Command and Control (C2) operations. Malleable C2 profiles allow attackers to modify the behavior of their C2 communication, making detection more difficult. Stopping these attacks in real time requires deep inline inspection and the ability to block zero-day and evasive threats.
* Why "Advanced Threat Prevention and PAN-OS 10.2" (Correct Answer B)?Advanced Threat Prevention (ATP) on PAN-OS 10.2 uses inline deep learning models to detect and block Cobalt Strike Malleable C2 attacks in real time. ATP is designed to prevent evasive techniques and zero-day threats, which is essential for blocking Malleable C2. PAN-OS 10.2 introduces enhanced capabilities for detecting malicious traffic patterns and inline analysis of encrypted traffic.
* ATP examines traffic behavior and signature-less threats, effectively stopping evasive C2 profiles.
* PAN-OS 10.2 includes real-time protections specifically for Malleable C2.
* Why not "Next-Generation CASB on PAN-OS 10.1" (Option A)?Next-Generation CASB (Cloud Access Security Broker) is designed to secure SaaS applications and does not provide the inline C2 protection required to stop Malleable C2 attacks. CASB is not related to Command and Control detection.
* Why not "Threat Prevention and Advanced WildFire with PAN-OS 10.0" (Option C)?Threat Prevention and Advanced WildFire are effective for detecting and preventing malware and known threats. However, they rely heavily on signatures and sandboxing for analysis, which is not sufficient for stopping real-time evasive C2 traffic. PAN-OS 10.0 lacks the advanced inline capabilities provided by ATP in PAN-OS 10.2.
* Why not "DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x" (Option D)?While DNS Security and Threat Prevention are valuable for blocking malicious domains and known threats, PAN-OS 9.x does not provide the inline deep learning capabilities needed for real-time detection and prevention of Malleable C2 attacks. The absence of advanced behavioral analysis in PAN- OS 9.x makes this combination ineffective against advanced C2 attacks.
Reference: Palo Alto Networks documentation for Advanced Threat Prevention on PAN-OS 10.2 highlights its capability to block evasive C2 traffic in real time using deep learning.

NEW QUESTION # 26
A prospective customer has provided specific requirements for an upcoming firewall purchase, including the need to process a minimum of 200,000 connections per second while maintaining at least 15 Gbps of throughput with App-ID and Threat Prevention enabled.
What should a systems engineer do to determine the most suitable firewall for the customer?

- A. Upload 30 days of customer firewall traffic logs to the firewall calculator tool on the Palo Alto Networks support portal.
- B. Download the firewall sizing tool from the Palo Alto Networks support portal.
- C. Use the product selector tool available on the Palo Alto Networks website.
- D. Use the online product configurator tool provided on the Palo Alto Networks website.

Answer: A

Explanation:
The prospective customer has provided precise performance requirements for their firewall purchase, and the systems engineer must recommend a suitable Palo Alto Networks Strata Hardware Firewall (e.
g., PA-Series) model. The requirements include a minimum of 200,000 connections per second (CPS) and 15 Gbps of throughput with App-ID and Threat Prevention enabled. Let's evaluate the best approach to meet these needs.
Step 1: Understand the Requirements
* Connections per Second (CPS): 200,000 new sessions per second, indicating the firewall's ability to handle high transaction rates (e.g., web traffic, API calls).
* Throughput with App-ID and Threat Prevention: 15 Gbps, measured with application identification and threat prevention features active, reflecting real-world NGFW performance.
* Goal: Identify a PA-Series model that meets or exceeds these specs while considering the customer's actual traffic profile for optimal sizing.

NEW QUESTION # 27
A customer has acquired 10 new branch offices, each with fewer than 50 users and no existing firewall.
The systems engineer wants to recommend a PA-Series NGFW with Advanced Threat Prevention at each branch location. Which NGFW series is the most cost-efficient at securing internet traffic?

- A. PA-400
- B. PA-500
- C. PA-200
- D. PA-600

Answer: A

Explanation:
ThePA-400 Seriesis the most cost-efficient Palo Alto Networks NGFW for small branch offices. Let's analyze the options:
PA-400 Series (Recommended Option)
* The PA-400 Series (PA-410, PA-415, etc.) is specifically designed for small to medium-sized branch offices with fewer than 50 users.
* It provides all the necessary security features, including Advanced Threat Prevention, at a lower price point compared to higher-tier models.
* It supports PAN-OS and Cloud-Delivered Security Services (CDSS), making it suitable for securing internet traffic at branch locations.
Why Other Options Are Incorrect
* PA-200:The PA-200 is an older model and is no longer available. It lacks the performanceand features needed for modern branch office security.
* PA-500:The PA-500 is also an older model that is not as cost-efficient as the PA-400 Series.
* PA-600:The PA-600 Series does not exist.
Key Takeaways:
* For branch offices with fewer than 50 users, the PA-400 Series offers the best balance of cost and performance.
References:
* Palo Alto Networks PA-400 Series Datasheet

NEW QUESTION # 28
What are three valid Panorama deployment options? (Choose three.)

- A. As a virtual machine (ESXi, Hyper-V, KVM)
- B. With a cloud service provider (AWS, Azure, GCP)
- C. On a Raspberry Pi (Model 4, Model 400, Model 5)
- D. As a dedicated hardware appliance (M-100, M-200, M-500, M-600)
- E. As a container (Docker, Kubernetes, OpenShift)

Answer: A,B,D

Explanation:
Panorama is Palo Alto Networks' centralized management solution for managing multiple firewalls. It supports multiple deployment

options to suit different infrastructure needs. The valid deployment options are as follows:
* Why "As a virtual machine (ESXi, Hyper-V, KVM)" (Correct Answer A)?Panorama can be deployed as a virtual machine on hypervisors like VMware ESXi, Microsoft Hyper-V, and KVM. This is a common option for organizations that already utilize virtualized infrastructure.
* Why "With a cloud service provider (AWS, Azure, GCP)" (Correct Answer B)?Panorama is available for deployment in the public cloud on platforms like AWS, Microsoft Azure, and Google Cloud Platform. This allows organizations to centrally manage firewalls deployed in cloud environments.
* Why "As a dedicated hardware appliance (M-100, M-200, M-500, M-600)" (Correct Answer E)?
Panorama is available as a dedicated hardware appliance with different models (M-100, M-200, M-500, M-600) to cater to various performance and scalability requirements. This is ideal for organizations that prefer physical appliances.
* Why not "As a container (Docker, Kubernetes, OpenShift)" (Option C)?Panorama is not currently supported as a containerized deployment. Containers are more commonly used for lightweight and ephemeral services, whereas Panorama requires a robust and persistent deployment model.
* Why not "On a Raspberry Pi (Model 4, Model 400, Model 5)" (Option D)?Panorama cannot be deployed on low-powered hardware like Raspberry Pi. The system requirements for Panorama far exceed the capabilities of Raspberry Pi hardware.

NEW QUESTION # 29
Which two products can be integrated and managed by Strata Cloud Manager (SCM)? (Choose two)

* A. Prisma SD-WAN
* B. Cortex XDR
* C. Prisma Cloud
* D. VM-Series NGFW

Answer: A,D

Explanation:
Strata Cloud Manager (SCM) is Palo Alto Networks' centralized cloud-based management platform for managing network security solutions, including Prisma Access and Prisma SD-WAN. SCM can also integrate with VM-Series firewalls for managing virtualized NGFW deployments.
Why A (Prisma SD-WAN) Is Correct
* SCM is the management interface for Prisma SD-WAN, enabling centralized orchestration, monitoring, and configuration of SD-WAN deployments.
Why D (VM-Series NGFW) Is Correct
* SCM supports managing VM-Series NGFWs, providing centralized visibility and control for virtualized firewall deployments in cloud or on-premises environments.
Why Other Options Are Incorrect
* B (Prisma Cloud):Prisma Cloud is a separate product for securing workloads in public cloud environments. It is not managed via SCM.
* C (Cortex XDR):Cortex XDR is a platform for endpoint detection and response (EDR). It is managed through its own console, not SCM.

NEW QUESTION # 30
......

This Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) software has a simple-to-use interface. By using the PSE-Strata-Pro-24 practice exam software, you can evaluate your mistakes at the end of every take and overcome them. Our software helps you to get familiar with the format of the original PSE-Strata-Pro-24 test. Software lets you customize your Palo Alto Networks PSE-Strata-Pro-24 Practice Exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this PSE-Strata-Pro-24 practice exam software.
