최신 Accredited Professional Certification Salesforce-Media-Cloud 무료샘플문제 (Q44-Q49):

질문 # 44

A System Administrator of an advertising publishing company that uses Advertising Sales Management (ASM) is going through the migration from source org to target org.

During the migration, the System Administrator runs into an error related to permissions and licenses on the target org.

Which two reasons could have caused the error?

Choose 2 answers

- A. The target org does not have the necessary integration procedures and Data Raptors.
- B. The source org does not have the required platform license definitions and add-on licenses.
- C. The System Administrator user profile on the target org does not have the required permission set licenses or add-on licenses.
- D. The target org does not have the required platform license definitions and add-on licenses.

정답: C,D

설명:

Comprehensive and Detailed Explanation From Exact Extract:

Permission and license errors in migration typically arise because the target org lacks the required platform license definitions or add-on licenses, or because the admin user profile does not have the necessary permission set licenses assigned. The source org licenses don't impact target org migration errors, and missing integration procedures/Data Raptors usually cause functional issues but not license errors.

질문 # 45

A publisher needs to check ad server inventory as part of the media plan creation process.

Which ad server is supported by standard Media Cloud Advertising Sales Management (ASM) features?

- A. Openx
- B. Campaign Manager 360
- C. Google Ad Manager
- D. Sizmek

정답: C

설명:

Comprehensive and Detailed Explanation From Exact Extract:

Google Ad Manager (GAM) is the only ad server with out-of-the-box integration supported in Media Cloud ASM. This enables inventory checks, campaign booking, and reporting directly through Media Cloud interfaces. Other servers require custom integrations.

질문 # 46

A customer is using Media Cloud and they need to report on how well a digital advertising campaign is performing. The company is using Google Ad Manager (GAM) as one of their primary data sources.

Which product should a Consultant implement to analyze campaign performance?

- A. Standard Salesforce Reporting and Dashboards
- B. Marketing Cloud Intelligence
- C. Custom Reporting Solution
- D. CRM Analytics

정답: B

설명:

Comprehensive and Detailed Explanation From Exact Extract:

Marketing Cloud Intelligence provides advanced analytics capabilities by integrating data from Media Cloud and GAM to deliver comprehensive campaign performance analysis beyond standard reports or custom solutions.

질문 # 47

A publisher is working with Agents, which is Home's agency, to advertise Home's products.

How should a Consultant create and relate these records in Advertising Sales Management (ASM)?

- A. Create a Home Account and create an Agents Account with a Brand Record Type.

- B. Create a Home Account and Agents as a Contact on the Home Account.
- C. Create Home and Agents as Accounts without specific Record Types.
- D. Create a Home Account and create an Agents Account with an Agency Record Type.

정답: D

설명:

Comprehensive and Detailed Explanation From Exact Extract:

In Media Cloud ASM, Advertisers and Agencies are modeled as Accounts with different Record Types. The agency should be an Account with the Agency Record Type to reflect its role properly in the hierarchy and relationships. Contacts belong to Accounts but Agencies are best represented as distinct Account records for clarity and reporting. Brand Record Type is typically used for product branding, not agencies.

질문 # 48

A Sales Executive creates a quote. When the quote status is changed to Client Approved, it should automatically be submitted for approval. The approver needs to be a queue instead of an individual Salesforce user.

How can this be achieved in the system?

- A. Invoke Approval Process on Quote and keep Queue as Approver.
- B. Invoke Approval Process created on a custom object having lookup to Quote and keep Queue as Approver.
- C. Invoke Approval Process created on Opportunity linked to the Quote and keep Queue as Approver.
- D. Invoke Approval Process created on individual QuoteLineItem and keep Queue as Approver.

정답: A

설명:

Comprehensive and Detailed Explanation From Exact Extract:

Approval processes on the Quote object can be configured to automatically submit for approval when status changes, and queues can be assigned as approvers. This is a standard Salesforce approval process setup and does not require custom objects or linked objects.
