## 100% Pass 2026 Accurate Adobe AD0-E725 Exam Topics Pdf

Another significant challenge of undertaking a Adobe AD0-E725 exam is defining clear goals. Many students get bogged down by the volume of material they need to learn and lose sight of their goals. Thus, our Adobe AD0-E725 Real Exam Questions in three formats provide you with the clear cut AD0-E725 preparation materials and defined goals to comprehensively prepare in the shortest possible time.

### Adobe Commerce Developer Expert Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Extend their Adobe license.
- B. Open a ticket with Adobe support.
- C. Modify the magento.app.yaml file.

**Answer: B**

Explanation:

In Adobe Commerce Cloud Pro environments, disk allocation is provisioned at the infrastructure level and cannot be changed directly by developers. Increasing disk size requires assistance from Adobe's Cloud Ops team via a support ticket.

A (license extension) is unrelated to storage.

B (magento.app.yaml) configures services and resources but cannot increase allocated disk space.

C is correct: Adobe support ticket is required.

Reference:

Adobe Commerce Cloud DevDocs - Request support for Pro environments

#### NEW QUESTION # 44

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup.

Which command should the Developer use to do this?

- A. vendor/bin/ece-tools db-dump
- B. magento-cloud snapshot:db-dump
- C. vendor/bin/ece-tools db-snapshot

**Answer: A**

#### NEW QUESTION # 45

An Adobe Commerce Developer is approached to disable several cron jobs from a customization completed by a third-party agency. The cron jobs will eventually be enabled again once a code review of the cron jobs is complete.

Using best principles, how should the Developer action this request?

- A. Edit the schedule with a date which will never happen in the crontab.xml file.
- B. Add the schedule="\* \* \* \* \*" to the <job> node in the crontab.xml file.
- C. Add the disabled="true" to the <job> node in the crontab.xml file.

**Answer: C**

Explanation:

Adobe Commerce provides a configuration flag `disabled="true"` for cron job definitions in `crontab.xml`.

When set, it prevents the job from being executed, while still keeping the job definition in place. This allows developers to temporarily disable cron jobs without deleting or altering their schedules - a best practice in scenarios where the jobs will later be re-enabled.

\* Option A (`schedule="* * * * *"`) would instead run the cron job every minute, which is the opposite of disabling it.

\* Option B (setting an impossible date) is a hack and not recommended, as it introduces fragile configuration that can confuse future maintainers.

\* Option C is the official and proper way to disable a cron job in Adobe Commerce.

Official Documentation Extracts:

\* "To disable a job, add the attribute `disabled="true"` to the `<job>` node in `crontab.xml`." - Adobe Commerce DevDocs: Configure cron jobs

\* "You can disable a cron job without removing its definition by setting `disabled="true"`. This is useful for temporary maintenance or debugging." - Adobe Commerce PHP Developer Guide: Cron configuration

#### NEW QUESTION # 46

A Developer discovers the following code snippet in `default.xml` layout:

```
<referenceBlock name="content">
<block name="custom" template="example.phtml" cacheable="false" />
</referenceBlock>
```

Which caching behavior will occur?

- A. The content block and all its child blocks will become cacheable.
- **B. All pages will be marked as non-cacheable.**
- C. Only the custom block will not be cached.

**Answer: B**

#### NEW QUESTION # 47

A client wants to calculate tax differently when an order is billed for a range of particular postcodes. They want to implement their own system instead of using a third-party system. The Developer is asked to assist in this task by creating a conditional webhook. What must be done to achieve this?

- **A. Create a `webhooks.xml` file and add the rules wanted in the form of a rule node element using the regex operator to catch a range of postcodes.**
- B. Implement a new webhook with a list postcodes and link it to the original webhook, then advise the client to monitor for the new webhook instead.
- C. Create an after plugin on the webhook class and check for a list of postcodes at the time of processing and returning true for certain postcodes.

**Answer: A**

#### NEW QUESTION # 48

.....

If you do not know how to pass the exam more effectively, I'll give you a suggestion is to choose a good training site. This can play a multiplier effect. Lead2PassExam site has always been committed to provide candidates with a real Adobe AD0-E725 Certification Exam training materials. The Lead2PassExam Adobe AD0-E725 Certification Exam software are authorized products by vendors, it is wide coverage, and can save you a lot of time and effort.
