A lot of applicants have studied with TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) practice material and passed the OGEA-103 exam on the first try with their hard work and consistency. The Lead2Passed assures the customers that they will pass the OGEA-103 Exam on the first try by studying from OGEA-103 exam material and if they fail to do it so they can claim their money back (terms and conditions apply). Buy It Now!

The Open Group is an independent organization that aims to promote the development and adoption of open, vendor-neutral technology standards and certifications. One of their most popular certifications is the TOGAF (The Open Group Architecture Framework) certification, which is designed to help individuals and organizations develop and implement effective enterprise architectures.

## **Start Preparation with The Open Group OGEA-103 Exam Dumps**

These people who used our products have thought highly of our OGEA-103 study materials. If you decide to buy our products and take it seriously consideration, we can make sure that it will be very easy for you to simply pass your exam and get the OGEA-103 certification in a short time. We are also willing to help you achieve your dream. Now give yourself a chance to have a try on our OGEA-103 Study Materials. You will have no regret spending your valuable time on our OGEA-103 learning guide.

## **The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q71-Q76):**

### **NEW QUESTION # 71**

When considering the scope of an architecture, what dimension considers to what level of detail the architecting effort should go?

- A. Project

- B. Depth
- C. Breadth
- D. Architecture Domains

**Answer: B**

Explanation:

The scope of an architecture is the extent and level of detail of the architecture work. The scope of an architecture can be defined along four dimensions: project, breadth, depth, and architecture domains. The project dimension considers the boundaries and objectives of the architecture project, such as the time frame, budget, resources, and deliverables. The breadth dimension considers the coverage and completeness of the architecture across the enterprise, such as the organizational units, business functions, processes, and locations. The depth dimension considers the level of detail and specificity of the architecture, such as the granularity, abstraction, and precision of the architectural elements and relationships. The architecture domains dimension considers the aspects or segments of the architecture, such as the business, data, application, and technology domains.

Therefore, the depth dimension is the one that considers to what level of detail the architecting effort should go.

The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 25: Architecture Scope : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 25.2: Scope Dimensions : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 25.2.1: Project, Breadth, Depth, and Architecture Domains

#### NEW QUESTION # 72

Consider the following ADM phases objectives.

Which phase does each objective match?

- A. 1F-2F-3E-4G
- B. 1E-2F-3E-4G
- C. 1F-2G-3F-4F
- D. 1G-2E-3F-4E

**Answer: B**

Explanation:

Explanation

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F:

To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented Reference: The TOGAF Standard | The Open Group Website, Section 3.2 ADM Phases.

#### NEW QUESTION # 73

Which of the following best describes the class of information known as the Reference Library within the Architecture Repository?

- A. A record of the governance activity across the enterprise
- B. Guidelines and templates used to create new architectures
- C. Specifications to which architectures must conform
- D. Processes to support governance of the Architecture Repository

**Answer: B**

Explanation:

The class of information known as the Reference Library within the Architecture Repository contains guidelines and templates used to create new architectures. The Reference Library provides a set of resources that can be leveraged or customized for specific architecture development purposes. It includes generic building blocks, patterns, models, standards, frameworks, methods, techniques, best practices, etc. Reference: The TOGAF® Standard | The Open Group Website, Section 2.4 Architecture Repository.

#### NEW QUESTION # 74

Which of the following is included as part of Architecture Governance?

- A. Interacting with the CxO level on Enterprise Architecture

- B. Ensuring compliance with internal and external standards and regulatory obligations
- C. Managing Stakeholders and their requirements
- D. Creating and maintaining the Statement of Architecture Work through out the ADM cycle

**Answer: B**

Explanation:

Explanation

Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements.

Reference: The TOGAF Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

### NEW QUESTION # 75

Which of the following statements about architecture partitioning are correct\*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 2 & 4
- B. 1 & 3
- C. 1 & 4
- D. 2 & 3

**Answer: B**

Explanation:

Explanation

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture.

Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries. Reference: The TOGAF Standard | The Open Group Website, Section 2.5 Architecture Partitioning.

### NEW QUESTION # 76

.....

OGEA-103 questions and answers are written to the highest standards of technical accuracy by our professional experts. With our OGEA-103 free demo, you can check out the questions quality, validity of our The Open Group practice torrent before you choose to buy it. You just need 20-30 hours to study with our OGEA-103 practice dumps, and you can attend the actual test and successfully pass. The OGEA-103 vce torrent will be the best and valuable study tool for your preparation.
