Salesforce Platform Developer I (PDI) Sample Questions (Q157-Q162):

NEW QUESTION # 157

Given the code below, which three statements can be used to create the controller variable? Public class accountlistcontroller{ public list<account>getaccounts(){ return controller.getrecords(); } } Choose 3 answers

- A. Apexpages.standardsetcontroller controller=new apexpages.standardsetcontroller(database.getquerylocator('select id from account'));
- B. Apexpages.standardsetcontroller controller = new apexpages.standardsetcontroller (database.getquerylocator([select id from account]));
- C. Apexpages.standardsetcontroller controller = new apexpages.standardsetcontroller (database.query('select id from account'));
- D. Apexpages.standardcontroller controller= new apexpages.standardcontroller(database.getquerylocator('select id from account'));
- E. Apexpages.standardcontroller controller= new apexpages.standardcontroller([select id from account]);

Answer: B,C,E

NEW QUESTION # 158

A developer created these three Rollup Summary fields in the custom object, Project__c:

The developer is asked to create a new field that shows the ratio between rejected and approved timesheets for a given project. Which should the developer use to implement the business requirement in order to minimize maintenance overhead?

- A. Roll-up summary field
- **B. Formula field**
- C. Record-triggered flow
- D. Apex trigger

Answer: B

NEW QUESTION # 159

Universal Containers has a large number of custom applications that were built using a third-party JavaScript framework and exposed using Visualforce pages. The company wants to update these applications to apply styling that resembles the look and feel of Lightning Experience.

What should the developer do to fulfill the business request in the quickest and most effective manner?

- A. Rewrite all Visualforce pages as Lightning components.
- B. Enable Available for Lightning Experience, Lightning Communities, and the mobile app on Visualforce pages used by the custom application.
- **C. Incorporate the Salesforce Lightning Design System CSS stylesheet Into the JavaScript applications.**
- D. Set the attribute enableLightning to true in the definition.

Answer: C

Explanation:

* The quickest way to make Visualforce pages styled like Lightning Experience is by incorporating SLDS. This provides consistent styling without rewriting the applications.

Why not other options?

* A: Rewriting all Visualforce pages as Lightning components is time-consuming and not efficient.

* B: There is no attribute enableLightning in Visualforce.

* C: Enabling Lightning Experience compatibility does not apply styling automatically.

References:

* Salesforce Lightning Design System (SLDS)

NEW QUESTION # 160

A company that uses a Custom object to track candidates would like to send candidate information automatically to a third -party human resource system when a candidate is hired. What can a developer do to accomplish this task?

- A. Create an auto response rule to the candidate.
- B. Create a Process Builder with an outbound message action.
- C. Create an escalation rule to the hiring manager.
- **D. Create a workflow rule with an outbound message action.**

Answer: D

NEW QUESTION # 161

An Apex method, getAccounts, that returns a list of Accounts given a searchTerm, is available for Lightning Web Components to use.

What is the correct definition of a Lightning Web Component property that uses the getAccounts method?

- **A. □**
- B. □
- C. □
- D. □

Answer: A
