

300-715 Dumps Guide | 300-715 Valid Braindumps Questions

What's more, part of that Pass4training 300-715 dumps now are free: <https://drive.google.com/open?id=1igJQOzGuPIHBzGPpIfUI9uPNyZpwwss8>

If you want to ace the Implementing and Configuring Cisco Identity Services Engine (300-715) test, the main problem you may face is not finding updated 300-715 practice questions to crack this test quickly. After examining the situation, the Pass4training has come with the idea to provide you with updated and actual Cisco 300-715 Exam Dumps so you can Pass 300-715 Test on the first attempt. The product of Pass4training has many different premium features that help you use this product with ease. The study material has been made and updated after consulting with a lot of professionals and getting customers' reviews.

Individuals who Pass 300-715 Exam display a strong understanding of core ISE concepts, such as user authentication, authorization, and accounting (AAA). They can configure and manage policies for wired and wireless endpoints, guest access, and posture services, including endpoint compliance checks. Candidates can also integrate ISE with other security solutions like Cisco Firepower and AnyConnect to enhance the security posture of their organization.

Cisco 300-715 Valid Braindumps Questions & Exam Dumps 300-715 Free

We provide 1 year of free updates. In conclusion, Pass4training guarantees that if you use the product, you will pass the 300-715 exam on your first try. Its primary goal is to save students time and money, not just conduct a business transaction. Candidates can take advantage of the free trials to evaluate the quality and standard of the 300-715 Dumps before making a purchase. With the right 300-715 study material and support team passing the examination at first attempt is an achievable goal.

Cisco 300-715 Exam is designed to validate the knowledge and skills of IT professionals who are responsible for implementing and configuring Cisco Identity Services Engine (ISE). Implementing and Configuring Cisco Identity Services Engine certification exam is ideal for network administrators, security professionals, and engineers who want to enhance their knowledge of identity services and security policies. 300-715 exam is designed to test the candidate's ability to use Cisco ISE to secure network access, automate security policies, and streamline network operations.

Exam Topics

The Cisco 300-715 exam measures the applicants' expertise related to a variety of knowledge areas. The skills measured within this certification test can be grouped into seven domains that are outlined below:

- **Architecture & Deployment – 10%**

This topic checks the expertise of the examinees in configuring personas as well as describing deployment options.

- **Policy Enforcement – 25%**

Within this domain, the test takers are required to demonstrate that they are capable of configuring native LDAP and AD; describing identity store options (including LDAP, AD, PKI, OTP, Smart Card, and Local); configuring wired/wireless 802.1X network

access. Besides that, the students should be conversant with configuring 802.1X phasing deployment (including monitor mode, closed mode, low impact); configuring network access devices; applying MAB; configuring Cisco TrustSec; configuring policies such as authorization and authentication profiles.

- **Web Auth and Guest Services – 15%**

To answer the questions from this subject area, the applicants need to have the ability to customize web authentication, customize guest access services as well as customize guest and sponsor portals.

- **Profiler – 15%**

This section encompasses such skills as implementing profiler services; implementing probes; implementing CoA; configuring endpoint identity management.

- **BYOD – 15%**

Here the learners must prove that they possess competency in describing Cisco BYOD functionality (including solution components, utilization cases & requirements, as well as BYOD flow); customizing BYOD device on-boarding with the help of internal CA with Cisco wireless LAN controllers as well as Cisco switches; configuring certificates for BYOD; configuring allow list/block list.

- **Endpoint Compliance – 10%**

This objective requires that the candidates have an understanding of describing posture services, endpoint compliance, as well as client provisioning. They should also be conversant with configuring posture policy, conditions, client provisioning; configuring the compliance module; configuring Cisco ISE posture agents as well as operational modes; describing supplicant, authenticator, server, and supplicant options.

- **Network Access Device Administration – 10%**

This last part of the certification test comprises of such abilities as comparing AAA protocols and configuring TACACS+ device administration & command authorization.

The percentages provided next to the domains' titles indicate the share of the questions in the exam content. During your preparation for the test, you need to pay special attention to the topics with higher weights. However, only the mastery of all these objectives guarantees success in Cisco 300-715. Note that the above-mentioned sections are just the provisional guidelines for the candidates and other subject areas can be included in the specific delivery of the exam without any notice.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q117-Q122):

NEW QUESTION # 117

A company is attempting to improve their BYOD policies and restrict access based on certain criteria. The company's subnets are organized by building. Which attribute should be used in order to gain access based on location?

- A. IP address
- B. MAC address
- **C. static group assignment**
- D. device registration status

Answer: C

NEW QUESTION # 118

An engineer builds a five-node distributed Cisco ISE deployment. The first two deployed nodes are responsible for the primary and secondary administration and monitoring personas. Which persona configuration is necessary to have the remaining three Cisco ISE nodes serve as dedicated nodes in the Cisco ISE cube that is responsible only for handling the RADIUS and TACACS+ authentication requests, identity lookups, and policy evaluation?

A)

□

B)
☐ C)
☐ D)
☐

- A. Option C
- **B. Option D**
- C. Option A
- D. Option B

Answer: B

NEW QUESTION # 119

A network engineer needs to ensure that the access credentials are not exposed during the 802.1x authentication among components. Which two protocols should complete this task?

- A. PEAP
- **B. EAP-MD5**
- **C. EAP-TLS**
- D. LEAP
- E. EAP-TTLS

Answer: B,C

NEW QUESTION # 120

What must match between Cisco ISE and the network access device to successfully authenticate endpoints?

- A. SNMP version
- B. certificate
- **C. shared secret**
- D. profile

Answer: C

Explanation:

NEW QUESTION # 121

Refer to the exhibit.

☐ A network engineers configuring the switch to accept downloadable ACLs from a Cisco ISC server Which two commands should be run to complete the configuration? (Choose two)

- **A. ip device tracking**
- B. dot1x system-auth-control
- C. radius-server attribute 8 include-in-access-req
- **D. radius server vsa send authentication**
- E. aaa authorization auth-proxy default group radius

Answer: A,D

NEW QUESTION # 122
