- B. Write, Read, Value Help (write access)
- C. Value Help (value help access)
- D. Write, Read (write access)
- E. Read, Value Help (read access)

Answer: A,C,E

NEW QUESTION # 36
Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Business Catalogs
- B. Assigned Spaces
- C. Assigned Technical Catalogs
- D. Assigned Pages

Answer: A

Explanation:
In SAP S/4HANA, SAP Fiori tiles and target mappings relevant to segregation of duties (SoD) are found in Business Catalogs. Business Catalogs group Fiori apps, tiles, and target mappings that correspond to specific business processes or roles, ensuring that authorizations are aligned with functional requirements. These catalogs are designed to support SoD by organizing applications and their associated authorizations in a way that prevents conflicting access, such as separating financial and procurement duties. By assigning Business Catalogs to business roles, administrators can enforce SoD principles, ensuring users only access apps relevant to their responsibilities. Assigned Pages and Assigned Spaces are related to the Fiori Launchpad's user interface organization, not directly to SoD or authorization management. Assigned Technical Catalogs contain technical objects, not business-specific tiles or mappings. Business Catalogs are thus the primary mechanism for maintaining SoD-compliant access, providing a structured approach to authorization management in SAP Fiori environments, ensuring security and compliance across business processes.

NEW QUESTION # 37
What does a status text value of "Old" mean during the maintenance of authorizations for an existing role?

- A. Field values were changed as a result of the merge process.
- B. Field values were unchanged and no new authorization was added.
- C. The field delivered with content was changed but the old value was retained.
- D. Field values have not been changed.

Answer: C

Explanation:
* Context:During role maintenance in SAP, status values indicate changes or actions applied to field values.
* Solution Explanation:
* A status of "Old" means the field value was delivered with content but has since been modified, retaining the old value.
SAP Security References:
* SAP Role Maintenance Guide (Transaction PFCG)
* SAP Authorization Concept Documentation

NEW QUESTION # 38
What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".
- B. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.
- C. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- D. Assign the authorization object to be checked to the chosen transaction code in the SAP Default authorization data using transaction SU22 and set Check Indicator to "Check".

Answer: C

NEW QUESTION # 39
......
