## 100% Pass Quiz 2026 CompTIA High-quality 220-1102 Latest Study Questions

In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of 220-1102. Our study tool can meet your needs. Our 220-1102 test torrent is of high quality, mainly reflected in the pass rate. As for our 220-1102 Study Tool, we guarantee our learning materials have a higher passing rate than that of other agency. Our 220-1102 test torrent is carefully compiled by industry experts based on the examination questions and industry trends in the past few years.

CompTIA 220-1102 Exam is an essential step for individuals who want to become certified IT professionals. It covers a wide range of topics and requires candidates to possess practical knowledge and analytical skills to succeed. With proper preparation and study, candidates can pass the exam and take their careers to the next level.

The 220-1102 exam is ideal for IT professionals who are interested in pursuing a career in technical support, help desk support, or field service technician roles. It is also beneficial for individuals who are looking to expand their knowledge and skills in the IT field. CompTIA A+ certification is recognized by major companies such as Dell, HP, and Intel, making it a valuable credential for those seeking employment in the IT industry.

## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q701-Q706):

### NEW QUESTION # 701

A technician needs to access a Windows 10 desktop on the network in a SOHO using RDP. Although the connection is unsuccessful, the technician is able to ping the computer successfully. Which of the following is MOST likely preventing the connection?

- A. The Windows 10 desktop has Windows 10 Home installed.
- B. The Windows 10 desktop is connected via Wi-Fi.
- C. The Windows 10 desktop is hibernating.
- D. The Windows 10 desktop does not have DHCP configured.

**Answer: A**

Explanation:

Explanation

The Windows 10 desktop has Windows 10 Home installed, which does not support RDP (Remote Desktop Protocol) as a host. Only Windows 10 Pro, Enterprise, and Education editions can act as RDP hosts and allow remote access to their desktops<sup>1</sup>. The Windows 10 desktop does not have DHCP configured, is connected via Wi-Fi, or is hibernating are not likely to prevent the RDP connection if the technician is able to ping the computer successfully.

### NEW QUESTION # 702

Which of the following ensures proprietary information on a lost or stolen mobile device cannot be accessed while the device is offline?

- A. Remote wipe
- B. Device data encryption
- C. Location applications
- D. Mandatory screen locks

**Answer: B**

Explanation:

Device data encryption (Option D) ensures that even if the device is lost or stolen, its data cannot be accessed without proper credentials, even while offline. Encryption protects the data at rest, making it unreadable without the decryption key.

\* Remote wipe (Option A) requires the device to be online to receive the wipe command.

\* Mandatory screen locks (Option B) provide a layer of security but can be bypassed with physical access in some cases.

\* Location applications (Option C) help track the device but don't protect data.

\* 2.7 - Explain methods for securing mobile devices, including encryption

### NEW QUESTION # 703

After a computer upgrade at an imaging lab, the upgraded computers are not able to obtain an IP address. Which of the following is most likely the issue?

- A. The switch does not support multicast traffic.
- B. The switch has port security enabled.
- C. The OS must be updated to be compatible with the imaging software.
- D. The switch is only providing IPv6 addresses.

**Answer: B**

Explanation:

When upgraded computers are not able to obtain an IP address, the issue often lies in the network configuration. Here's a Option A: The switch is only providing IPv6 addresses. This is unlikely because if the switch were providing IPv6 addresses, the devices would still receive an IP address, albeit an IPv6 one. The issue described indicates no IP address is being obtained at all.

Option B: The OS must be updated to be compatible with the imaging software. This option is unrelated to obtaining an IP address. Compatibility with imaging software would not prevent the devices from getting an IP address.

Option C: The switch has port security enabled. Correct Answer. Port security on a switch restricts access based on MAC addresses. If the MAC addresses of the upgraded computers are not recognized or have not been added to the allowed list, the switch will not provide network access, resulting in the computers not obtaining an IP address.

Reference:

Option D: The switch does not support multicast traffic. This is unrelated to obtaining an IP address. Multicast traffic deals with specific types of network communication and would not affect the basic DHCP IP address assignment process.

### NEW QUESTION # 704

A company has experienced a ransomware attack. Which of the following is the best way to recover from ransomware?

- A. Recovery mode
- **B. Backups**
- C. Anti-malware
- D. Antivirus

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation: The best way to recover from a ransomware attack is by restoring clean backups of the affected files. Ransomware encrypts files and demands a ransom for decryption, but paying the ransom is not recommended because it does not guarantee file recovery.

\* A. Antivirus - Incorrect. Antivirus software may detect and remove the ransomware, but it cannot decrypt the files.

\* C. Anti-malware - Incorrect. Anti-malware software helps prevent infection but cannot recover encrypted files.

\* D. Recovery mode - Incorrect. Recovery mode restores system files but does not recover user data from ransomware.

Best Practice:

\* Regularly back up critical data and store backups in offline or cloud-based solutions to prevent ransomware from encrypting them.

### NEW QUESTION # 705

A technician is working with a company to determine the best way to transfer sensitive personal information between offices when conducting business. The company currently uses USB drives and is resistant to change.

The company's compliance officer states that all media at rest must be encrypted. Which of the following would be the BEST way to secure the current workflow?

- A. Configure a hardened SFTP portal for file transfers between file servers
- **B. Enable BitLocker To Go with a password that meets corporate requirements**
- C. Deploy a secondary hard drive with encryption on the appropriate workstation
- D. Require files to be individually password protected with unique passwords

**Answer: B**

Explanation:

The BEST way to secure the current workflow of transferring sensitive personal information between offices when conducting business is to enable BitLocker To Go with a password that meets corporate requirements.

This is because BitLocker To Go is a full-disk encryption feature that encrypts all data on a USB drive, which is what the company currently uses, and requires a password to access the data.
