Google Certified Professional - Cloud Developer Sample Questions (Q176-Q181):

NEW QUESTION # 176

You should use open questions to do which of the following?

- A. Greet the customer.
- **B. Gather more information about an issue.**
- C. Check for understanding.
- D. Obtain the customer's warranty status.

Answer: B

NEW QUESTION # 177

Your company has deployed a new API to App Engine Standard environment. During testing, the API is not behaving as expected. You want to monitor the application over time to diagnose the problem within the application code without redeploying the application.

Which tool should you use?

- **A. Stackdriver Monitoring**
- B. Stackdriver Debug Logpoints
- C. Stackdriver Debug Snapshots
- D. Stackdriver Trace

Answer: A

Explanation:

Reference: <https://rominirani.com/gcp-stackdriver-tutorial-debug-snapshots-traces-logging-and-logpoints-1ba49e4780e6>

NEW QUESTION # 178

You need to deploy a new European version of a website hosted on Google Kubernetes Engine.

The current and new websites must be accessed via the same HTTP(S) load balancer's external IP address, but have different domain names. What should you do?

- A. Generate a new Ingress resource and specify the existing IP address as the `kubernetes.io/ingress.global-static-ip-name` annotation value
- **B. Modify the existing Ingress resource with a host rule matching the new domain**
- C. Create a new Service of type LoadBalancer specifying the existing IP address as the `loadBalancerIP`
- D. Define a new Ingress resource with a host rule matching the new domain

Answer: B

Explanation:

<https://kubernetes.io/docs/concepts/services-networking/ingress/#name-based-virtual-hosting> Name-based virtual hosts support routing HTTP traffic to multiple host names at the same IP address.

NEW QUESTION # 179

You work for an ecommerce company, and you are responsible for deploying and managing multiple APIs. The operations team wants to review the traffic patterns in the `orders-prod` and `users-prod` environments. These are the only environments in the `store-prod` environment group.

You want to follow Google-recommended practices. What should you do?

- **A. Assign the Apigee Analytics Viewer IAM role to the operations team for both environments. Use Apigee API Analytics to review traffic patterns.**
- B. Assign the Apigee API Reader IAM role to each user of the operations team for both environments. Use Cloud Monitoring to review traffic patterns.

- C. Assign the Apigee Analytics Viewer IAM role to the operations team for both environments. Use Cloud Monitoring to review traffic patterns.
- D. Assign the Apigee API Reader IAM role to each user of the operations team for both environments. Use Apigee API Analytics to review traffic patterns.

Answer: A

Explanation:

NEW QUESTION # 180

You need to containerize a web application that will be hosted on Google Cloud behind a global load balancer with SSL certificates. You don't have the time to develop authentication at the application level, and you want to offload SSL encryption and management from your application. You want to configure the architecture using managed services where possible. What should you do?

- A. Host the application on Google Kubernetes Engine, and deploy cert-manager to manage SSL certificates.
- **B. Host the application on Google Kubernetes Engine and use Identity-Aware Proxy (IAP) with Cloud Load Balancing and Google-managed certificates.**
- C. Host the application on Google Kubernetes Engine, and deploy an NGINX Ingress Controller to handle authentication.
- D. Host the application on Compute Engine, and configure Cloud Endpoints for your application.

Answer: B
