## Free PDF Quiz Trustable Palo Alto Networks - Reliable CloudSec-Pro Test Cost

The TestKingIT is currently in use by a lot of students and they have rated it as one of the best study materials for the preparation of Palo Alto Networks Cloud Security Professional (CloudSec-Pro) test. The customers are satisfied because the TestKingIT comes with free demos and up to 1 year of free updates. We have a 24/7 support team which means the user can get help anytime if they face any problem. Our support team will always help the customers whenever they face issues. Customers can start using the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) instantly after purchasing it from us. Buy It Now and Take The First Step Towards Success!

## Palo Alto Networks Cloud Security Professional Sample Questions (Q43-Q48):

### NEW QUESTION # 43

A business unit has acquired a company that has a very large AWS account footprint. The plan is to immediately start onboarding the new company's AWS accounts into Prisma Cloud Enterprise tenant immediately. The current company is currently not using AWS Organizations and will require each account to be onboarded individually.

The business unit has decided to cover the scope of this action and determined that a script should be written to onboard each of these accounts with general settings to gain immediate posture visibility across the accounts.

Which API endpoint will specifically add these accounts into the Prisma Cloud Enterprise tenant?

- A. <https://api.prismacloud.io/account/aws>
- B. <https://api.prismacloud.io/cloud/>

- C. <https://api.prismacloud.io/cloud/aws>
- D. <https://api.prismacloud.io/accountgroup/aws>

**Answer: C**

Explanation:

To add AWS accounts to the Prisma Cloud Enterprise tenant, the correct API endpoint is option C: <https://api.prismacloud.io/cloud/aws>. This endpoint is specifically designed for integrating cloud accounts with Prisma Cloud, enabling centralized visibility and security posture management across multiple cloud environments.

By using this API endpoint, each AWS account can be individually onboarded to the Prisma Cloud platform, allowing for immediate posture visibility and consistent security policy enforcement across the newly acquired company's extensive AWS footprint. This process aligns with Prisma Cloud's capabilities for multi- cloud security and compliance management, ensuring that the onboarding of cloud accounts is both efficient and aligned with the platform's best practices for cloud security.

#### NEW QUESTION # 44

Which step is included when configuring Kubernetes to use Prisma Cloud Compute as an admission controller?

- A. copy the Console address and set the config map for the default namespace.
- B. [copy the admission controller configuration from the Console and apply it to Kubernetes.](#)
- C. enable Kubernetes auditing from the Defend > Access > Kubernetes page in the Console.
- D. create a new namespace in Kubernetes called admission-controller.

**Answer: B**

Explanation:

When configuring Kubernetes to use Prisma Cloud Compute as an admission controller, a crucial step involves D. copy the admission controller configuration from the Console and apply it to Kubernetes. This step is essential for integrating Prisma Cloud Compute's security controls directly into the Kubernetes admission process, enabling real-time security assessments and policy enforcement for new or modified resources within the cluster.

#### NEW QUESTION # 45

Which two attributes are required for a custom config RQL? (Choose two.)

- A. cloud.account
- B. [json.rule](#)
- C. [api.name](#)
- D. tag

**Answer: B,C**

Explanation:

For a custom config Resource Query Language (RQL) in Prisma Cloud, two essential attributes are "json.rule" and "api.name." The "json.rule" attribute allows users to specify the JSON structure that defines the criteria or conditions of the query, essentially dictating what the query is looking for within the cloud environment. The "api.name" attribute identifies the specific API endpoint that the query will target, providing context and scope for the query. Together, these attributes enable users to craft precise and targeted queries that can assess the configuration and security posture of cloud resources, aiding in compliance checks, security assessments, and other governance tasks.

#### NEW QUESTION # 46

Which three types of classifications are available in the Data Security module? (Choose three.)

- A. Compliance standard
- B. [Financial information](#)
- C. [Malware](#)
- D. [Personally identifiable information](#)
- E. Malicious IP

**Answer: B,C,D**

Explanation:

Palo Alto Networks' Enterprise DLP service and provides data classification that includes built-in data profiles with data patterns that match sensitive information such as PII, health care, financial information and Intellectual Property. In addition to protecting your confidential and sensitive data, your data is also protected against threats-known and unknown (zero-day) malware-using the Palo Alto Networks' WildFire service.

**NEW QUESTION # 47**

Put the steps involved to configure and scan using the IntelliJ plugin in the correct order.

Scan using the Prisma Cloud plugin

Add Prisma Cloud plugin

Install IntelliJ IDE

Configure the Prisma Cloud plugin

**Answer:**

Explanation:

Scan using the Prisma Cloud plugin

Add Prisma Cloud plugin

Install IntelliJ IDE

Configure the Prisma Cloud plugin

Install IntelliJ IDE

Add Prisma Cloud plugin

Configure the Prisma Cloud plugin

Scan using the Prisma Cloud plugin

Explanation:

- \* Install IntelliJ IDE
- \* Add Prisma Cloud plugin
- \* Configure the Prisma Cloud plugin
- \* Scan using the Prisma Cloud plugin

To configure and use the Prisma Cloud plugin for scanning within the IntelliJ Integrated Development Environment (IDE), you must follow a series of steps in a specific order to ensure proper setup and functionality.

Firstly, you need to have the IntelliJ IDE installed on your system. Without the IDE, you cannot add or use the Prisma Cloud plugin, as it is designed to work within this development environment.

Secondly, after installing the IntelliJ IDE, you add the Prisma Cloud plugin. This involves navigating to the plugin marketplace within IntelliJ and selecting the Prisma Cloud plugin for installation.

Once the plugin is added to your IntelliJ IDE, the next step is to configure the Prisma Cloud plugin. This configuration may include setting up your Prisma Cloud credentials, specifying your scan options, and other settings that tailor the plugin's functionality to your needs.

Finally, after the plugin is installed and configured, you can proceed to scan your project using the Prisma Cloud plugin. This will check your code against security policies and compliance standards, providing feedback and recommendations for any identified issues.

Following these steps ensures that the Prisma Cloud plugin is properly integrated into your IntelliJ development workflow, allowing for continuous security and compliance checks as part of the development process.

## NEW QUESTION # 48

.....

It doesn't matter if it is the first time you participate in the c online training or if you prepare this exam for some time. It is a simple and smart way to prepare the CloudSec-Pro practice exam with our latest learning materials. There are free demo and valid questions and answers in our CloudSec-Pro Pass Guide. If you spend some time and pay attention to CloudSec-Pro test answers, there is no reason to not pass test and get the certification.
