The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the 300-710 certification which is crucial for you successfully, I highly recommend that you should choose the 300-710 certification preparation materials from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the 300-710 Exam Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.

Preparation Phase

Career Prospects

The professionals can improve their career possibilities by obtaining the certificate. With the CCNP Security certification, there are many career opportunities that the individuals can explore. Some of the available positions include an IT Security Consultant, a Senior Network Engineers, a Cybersecurity Specialist, an Infrastructure Engineer, a Network Security Specialist, a Network Security Engineer, a Network Specialist, and a Network Administrator, among others. The average remuneration outlook for the certificate holders is \$100,000 per year.

Accurate Cisco 300-710 Test - 300-710 Latest Test Materials

If you want to take the 300-710 exam then keep in your mind that proper Securing Networks with Cisco Firepower preparation is the key to success. Without Cisco 300-710 test preparation, you can do nothing. For well Cisco 300-710 exam preparation, I would like to recommend you Exams4sures. Exams4sures is the top-rated and leading platform that offers the best Securing Networks with Cisco Firepower, 300-710 exam study material. Exams4sures provides the latest and real 300-710 PDF Questions and practice tests that will assist you to pass the Cisco 300-710 test on the first try. Exams4sures latest Securing Networks with Cisco Firepower dumps are the best to prepare and pass the Securing Networks with Cisco Firepower, version 300-710 certification test. These genuine 300-710 exam dumps assist you to achieve excellent scores in the 300-710 test. Exams4sures design this Cisco 300-710 practice test material with the help of the world's most respected professionals.

Cisco 300-710 Exam Topics:

Section	Weight	Objectives
Management and Troubleshooting	25%	- Troubleshoot with FMC CLI and GUI - Configure dashboards and reporting in FMC - Troubleshoot using packet capture procedures - Analyze risk and standard reports

Deployment	30%	- Implement NGFW modes • Routed mode • Transparent mode - Implement NGIPS modes • Passive • Inline - Implement high availability options • Link redundancy • Active/standby failover • Multi-instance - Describe IRB configurations
Configuration	30%	- Configure system settings in Cisco Firepower Management Center - Configure these policies in Cisco Firepower Management Center • Access control • Intrusion • Malware and file • DNS • Identity • SSL • Prefilter - Configure these features using Cisco Firepower Management Center • Network discovery • Application detectors (Open AppID) • Correlation • Actions - Configure objects using Firepower Management Center • Object Management • Intrusion Rules - Configure devices using Firepower Management Center • Device Management • NAT • VPN • QoS • Platform Settings • Certificates
Integration	15%	- Configure Cisco AMP for Networks in Firepower Management Center - Configure Cisco AMP for Endpoints in Firepower Management Center - Implement Threat Intelligence Director for third-party security intelligence feeds - Describe using Cisco Threat Response for security investigations - Describe Cisco FMC PxGrid Integration with Cisco Identity Services Engine (ISE) - Describe Rapid Threat Containment (RTC) functionality within Firepower Management Center

Cisco Securing Networks with Cisco Firepower Sample Questions (Q190-Q195):

NEW QUESTION # 190

APPLICATIONS ASSOCIATED WITH ATTACKS			
The following applications have been identified as associated with attacks. You should identify applications in this list that have low business relevance and evaluate whether it would be helpful to control them on your network.			
Apps Associated with High Impact Events	Count	Apps Associated with Low Impact Events	Count
DNS	16	Chrome	283
Internet Explorer	14	Internet Explorer	110
Web browser	8	DCE/RPC client	74
FTP client	6	Web browser	47
NetBIOS-ssn (SMB) client	6	Firefox	36

TOP ATTACKERS AND TARGETS			
The top attackers and target machines observed in the attack attempts on your network are listed below. For high impact attacks in particular, you should ensure that targets are well protected from potential attackers by patching these machines and blocking potentially malicious traffic.			
High Impact Events			
Attackers	Attacks	Targets	Attacks
5.196.214.27	3	31.31.196.236	6
10.1.1.15.12	3	185.118.166.155	6
10.1.152.30	3	37.48.82.212	4
10.1.26.6	2	185.86.77.12	4
10.1.39.21	2	192.161.54.60	4

A security engineer must improve security in an organization and is producing a risk mitigation strategy to present to management for approval. Which action must the security engineer take based on this Attacks Risk Report?

- A. Block Internet Explorer
- **B. Inspect DNS traffic**
- C. Block NetBIOS.
- D. Inspect TCP port 80 traffic

Answer: B

Explanation:

Based on the Attacks Risk Report, DNS is associated with a high number of impact events (16). DNS traffic is critical for network operations but can also be exploited for malicious activities such as DNS tunneling, DDoS attacks, and data exfiltration. To improve security, the security engineer should focus on inspecting DNS traffic. This involves deploying DNS security solutions and monitoring DNS traffic for anomalies to detect and mitigate potential threats.

Steps:

- * Implement DNS security tools such as DNS filtering, DNSSEC, and DNS anomaly detection.
- * Configure the firewall to inspect DNS traffic for malicious activities.
- * Regularly analyze DNS logs to identify and respond to threats.

This action addresses a significant risk identified in the report and helps to mitigate potential attacks exploiting DNS.

NEW QUESTION # 191

Which limitation applies to Cisco FMC dashboards in a multi-domain environment?

- A. Only the administrator of the top ancestor domain is able to view dashboards.
- **B. Child domains are not able to view dashboards that originate from an ancestor domain.**
- C. Child domains have access to only a limited set of widgets from ancestor domains.
- D. Child domains are able to view but not edit dashboards that originate from an ancestor domain.

Answer: B

Explanation:

Section: Management and Troubleshooting

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/60/configuration/guide/fpmc-config-guide-v60/Using_Dashboards.html

NEW QUESTION # 192

Which command is run on an FTD unit to associate the unit to an FMC manager that is at IP address 10.0.0.10, and that has the registration key Cisco123?

- A. configure manager local 10.0.0.10 Cisco123
- **B. configure manager add Cisco123 10.0.0.10**

- C. configure manager local Cisco123 10.0.0.10
- D. configure manager add 10.0.0.10 Cisco123

Answer: D

Explanation:

<https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/215540-configure-verify-and-troubleshoot-firep.html>

NEW QUESTION # 193

Which connector is used to integrate Cisco ISE with Cisco FMC for Rapid Threat Containment?

- A. FTD RTC
- B. FMC RTC
- C. ISEGrid
- D. pxGrid

Answer: D

NEW QUESTION # 194

Which command is typed at the CLI on the primary Cisco FTD unit to temporarily stop running high-availability?

- A. configure high-availability disable
- B. configure high-availability suspend
- C. configure high-availability resume
- D. system support network-options

Answer: A

Explanation:
