Pegasystems Certified Pega Senior System Architect 25 Sample Questions (Q130-Q135):

NEW QUESTION # 130

In an online Purchase Order Case, the customer enters their details in the Enter customer details Step, then selects the products they want to purchase in the Select products Step. The customer needs to view the selected products in the Review selected products Step before proceeding with the payment. The selected products are copied to a new field in the Review selected products Step.

Which configuration best achieves the requirement?

- A. Configure a post-processing Data Transform for the Review selected products Step.
- B. Configure an activity in the post-processing Action for the Review selected products Step.
- C. Configure a post-processing Data Transform for the Select products Step.
- D. Configure an activity in the pre-processing Action for the Select products Step.

Answer: C

NEW QUESTION # 131

Which of the following statements is true about the rule resolution process?

- A. Rule resolution applies to rules that are instances of classes derived from the Rule and Work- base classes.
- B. If a user does not have access to the selected rule, the system sends a message that it could not find an appropriate rule to execute.
- C. If the system finds more than one rule instance during rule resolution, users are provided with a choice of which rule to use depending on context.
- D. The class (context) of a rule takes precedence over the availability of the rule.

Answer: B

NEW QUESTION # 132

A list report includes columns for purchase requests and regional cost centers. A manager wants the report to show the total number of purchase requests for each of the regional cost centers. How do you configure the report definition?

- A. Filter the results so that the report includes only cost center and purchase requests.
- B. Summarize the regional cost centers by count.
- C. Use the purchase requests column to group the cost centers.
- D. Summarize the purchase requests column by count.
