Therefore if you choose AZ-500 study materials of us, we will help you pass the exam and get the certificate successfully.

Microsoft Azure Security Technologies Sample Questions (Q365-Q370):

NEW QUESTION # 365

You have an Azure subscription that contains an Azure Data Lake Storage Gen2 account named storage1.

You deploy an Azure Synapse Analytics workspace named synapsews1 to a managed virtual network. You need to enable access from synapsews1 to storage1. What should you configure?

- A. a network security group (NSG)
- B. a virtual network gateway
- C. peering
- D. a private endpoint

Answer: D

NEW QUESTION # 366

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use Azure Security Center for the centralized policy management of three Azure subscriptions.

You use several policy definitions to manage the security of the subscriptions.

You need to deploy the policy definitions as a group to all three subscriptions.

Solution: You create a policy initiative and assignments that are scoped to resource groups.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead use a management group.

Management groups in Microsoft Azure solve the problem of needing to impose governance policy on more than one Azure subscription simultaneously.

Topic 1, Litware, inc

Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is a digital media company that has 500 employees in the Chicago area and 20 employees in the San Francisco area.

Existing Environment

Litware has an Azure subscription named Sub1 that has a subscription ID of 43894a43-17c2-4a39-8cfc-3540c2653ef4.

Sub1 is associated to an Azure Active Directory (Azure AD) tenant named litwareinc.com. The tenant contains the user objects and the device objects of all the Litware employees and their devices. Each user is assigned an Azure AD Premium P2 license. Azure AD Privileged Identity Management (PIM) is activated.

The tenant contains the groups shown in the following table.

The Azure subscription contains the objects shown in the following table.

Azure Security Center is set to the Free tier.

Planned changes

Litware plans to deploy the Azure resources shown in the following table.

Litware identifies the following identity and access requirements:

* All San Francisco users and their devices must be members of Group1.

* The members of Group2 must be assigned the Contributor role to Resource Group2 by using a permanent eligible assignment.

* Users must be prevented from registering applications in Azure AD and from consenting to applications that access company information on the users' behalf.

Platform Protection Requirements

Litware identifies the following platform protection requirements:

* Microsoft Antimalware must be installed on the virtual machines in Resource Group1.

* The members of Group2 must be assigned the Azure Kubernetes Service Cluster Admin Role.

* Azure AD users must be able to authenticate to AKS1 by using their Azure AD credentials.

* Following the implementation of the planned changes, the IT team must be able to connect to VM0 by using JIT VM access.

* A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in Resource Group1.

Role1 must be available only for Resource Group1.

Security Operations Requirements

Litware must be able to customize the operating system security configurations in Azure Security Center.

NEW QUESTION # 367

You have an Azure subscription that contains the virtual machines shown in the following table.

Subnet1 and Subnet2 have a Microsoft Storage service endpoint configured.

You have an Azure Storage account named storageac1 that is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 368
